Daniel Johnston Henry Glassie, 2020-03-03 DANIEL JOHNSTON raised on a farm in Randolph County returned from Thailand with a new way to make monumental pots Back home in North Carolina he built a log shop and a whale of a kiln for wood firing Then he set out to create beautiful pots grand in scale graceful in form and burned bright in a blend of ash and salt With mastery achieved and apprentices to teach Daniel Johnston turned his brain to massive installations First he made a hundred large jars and lined them along the rough road that runs past his shop and kiln Next he arranged curving clusters of big pots inside pine frames slatted like corn cribs to separate them from the slick interiors of four fine galleries in succession Then in concluding the second phase of his professional career Daniel Johnston built an open air installation on the grounds around the North Carolina Museum of Art where 178 handmade wood fired columns march across a slope in a straight line 350 feet in length that dips and lifts with the heave while the tops of the pots maintain a level horizon In 2000 when he was still Mark Hewitt s apprentice Daniel Johnston met Henry Glassie who has done fieldwork on ceramic traditions in the United States Brazil Italy Turkey Bangladesh China and Japan Over the years during a steady stream of intimate interviews Glassie gathered the understanding that enabled him to compose this portrait of Daniel Johnston a young artist who makes great pots in the eastern Piedmont of North Carolina

the book **The Italian Style** Romano Benini, 2018-12-28 The Italian style is the aspect that makes Italian products immediately recognizable and the junction between culture and Italian economy. In this book the author describes the fundamental components that define Italian style in manufacturing work and economics and the cultural and social origins of the attention to aesthetic results and quality as an important component of Italian style. Fashion, food, furniture, automation and the many aspects of Italian economy with the importance of the design reveal a lifestyle that shows us how another style of consumption is possible, linked to quality and durability and not to quantity and waste. The relation between economy and culture allows us to describe a society in which the values of tradition are maintained and meet innovation in a sustainable and generative way of quality.

**Maiolica: Italian Renaissance Ceramics in the Metropolitan Museum of Art** Timothy Wilson, 2016-08-29 The form of tin-glazed earthenware known as maiolica reveals much about the culture and spirit of Renaissance Italy. Engagingly decorative, often spectacularly colorful, sometimes whimsical or frankly bawdy, these magnificent objects, which were generally made for use rather than simple ornamentation, present a fascinating glimpse into the realities of daily life. Though not as well known as Renaissance painting and sculpture, maiolica is also prized by collectors and amateurs of the decorative arts the world over. This volume offers highlights of the world-class collection of maiolica at the Metropolitan Museum. It presents 135 masterpieces that reflect more than four hundred years of exquisite artistry, ranging from early pieces from Pesaro, including an eight-figure group of the Lamentation, the largest most ambitious piece of sculpture produced in a Renaissance maiolica workshop, to everyday objects such as albarelli, pharmacy jars, bella donna plates, and humorous genre scenes. Each piece has been newly photographed for this volume and each is presented with a full discussion, provenance, exhibition history, publication history, notes on form and glaze, and condition report. Two essays by Timothy Wilson, widely considered the foremost scholar in the field, provide overviews of the history and technique of maiolica, as well as an account of the formation of The Met's collection. Also featured is a wide-ranging introduction by Luke Syson that examines how the function of an object governed the visual and compositional choices made by the pottery painter. As the latest volume in The Met's series of decorative arts highlights, *Maiolica* is an invaluable resource for scholars and collectors, as well as an absorbing general introduction to a multifaceted subject.

interpretations Examining ancient Greece the ceramic imagery of the Maya culture the ceramics of China Persia and Japan European tin glaze traditions and the narrative imagery appearing on later European porcelains Matthias Ostermann attempts wherever possible not only to present ceramic narratives in their cultural and historical contexts but also to refer to some of the older myths and sources that may have served as inspiration Applied arts writer David Whiting contributes an essay on the development of ceramic narratives in the twentieth century while illustrations present the work of more than 75 contemporary international ceramic artists who explore narrative in distinctive and different ways These include the exploration of mythologies and existing stories personal visions private stories and memory the human figure relationships and identity political and social commentary and finally the ceramic object itself seen as message and metaphor This book will serve as a beginning for further study of this fascinating and little explored subject and as a celebration of the work of all ceramic artists whose passion is the ceramic narrative
