Every language has been influenced in some way by other languages In many cases this influence is reflected in words which have been absorbed from other languages as the names for newer items or ideas such as perestroika manga or intifada from Russian Japanese and Arabic respectively In other cases the influence of other languages goes deeper and includes the addition of new sounds grammatical forms and idioms to the pre existing language For example English s structure has been shaped in such a way by the effects of Norse French Latin and Celtic though English is not alone in its openness to these influences Any features can potentially be transferred from one language to another if the sociolinguistic and structural circumstances allow for it Further new languages pidgins creoles and mixed languages can come into being as the result of language contact In thirty three chapters The Oxford Handbook of Language Contact examines the various forms of contact induced linguistic change and the levels of language which have provided instances of these influences In addition it provides accounts of how language contact has affected some twenty languages spoken and signed from all parts of the world

Chapters are written by experts and native speakers from years of research and fieldwork Ultimately this Handbook provides an authoritative account of the possibilities and products of contact induced linguistic change **Cherokee Reference**

Grammar Brad Montgomery-Anderson,2015-09-08 The Cherokees have the oldest and best known Native American writing system in the United States Invented by Sequoyah and made public in 1821 it was rapidly adopted leading to nineteenth century Cherokee literacy rates as high as 90 percent This writing system the Cherokee syllabary is fully explained and used throughout this volume the first and only complete published grammar of the Cherokee language Although the Cherokee Reference Grammar focuses on the dialect spoken by the Cherokees in Oklahoma the Cherokee Nation and the United Keetoowah Band of Cherokee Indians it provides the grammatical foundation upon which all the dialects are based In his introduction author Brad Montgomery Anderson offers a brief account of Cherokee history and language revitalization

initiatives as well as instructions for using this grammar. The book then delves into an explanation of Cherokee pronunciation, orthography, parts of speech, and syntax. While the book is intended as a reference grammar for experienced scholars, Montgomery Anderson presents the information in accessible stages, moving from easier examples to more complex linguistic structures. Examples are taken from a variety of sources, including many from the Cherokee Phoenix. Audio clips of various text examples throughout can be found on the accompanying CDs. The volume also includes three appendices: a glossary keyed to the text, a typescript for the audio component, and a collection of literary texts, two traditional stories, and a historical account of a search party traveling up the Arkansas River. The Cherokee Nation, as the second largest tribe in the United States and the largest in Oklahoma, along with the United Keetoowah Band and the Eastern band of Cherokees, have a large number of people who speak their native language. Like other tribes, they have seen a sharp decline in the number of native speakers, particularly among the young, but they have responded with ambitious programs for preserving and revitalizing Cherokee culture and language. Cherokee Reference Grammar will serve as a vital resource in advancing these efforts to understand Cherokee history, language, and culture on their own terms.

Prominence in Austronesian Bethwyn Evans, Åshild Næss, Jozina Vander Klok, 2024-01-29. The cognitive concept of prominence is increasingly seen as key to understanding the organisation of grammar. This volume explores the encoding of prominence in languages from across the Austronesian family. The contributions show how prominence is relevant to understanding asymmetries at different levels of grammatical structure, from discourse and information structure to argument expression and socio-pragmatics. Moreover, common themes across contributions point to crosslinguistic tendencies that underpin the conventionalisation of communicative patterns for coordinating interlocutors' attention and to points of departure for further crosslinguistic exploration of how grammatical asymmetries can be explained in terms of prominence.

A Grammar of Papapana Ellen Smith-Dennis, 2021-01-18. This monograph is not only the first comprehensive grammar of Papapana, a previously undocumented and under-described endangered language, but the first full reference grammar of any Oceanic language of Bougainville, Papua New Guinea, despite this region displaying considerable linguistic innovation and language contact phenomena with numerous typologically significant features. This book describes Papapana on various levels, including phonology, morphology, and syntax in noun phrases and the verb complex, and syntax at the clause and sentence level. Throughout the grammar, the described phenomena are related to the current research on typological and Oceanic linguistics. Typologically unusual features of Papapana include multiple reduplication, inverse number marking in the noun phrase, and postverbal subject indexing. The book also describes the sociolinguistic and historical context within which Papapana is spoken and highlights linguistic changes resulting from language contact. The monograph fills an important gap in terms of grammatical descriptions of Bougainville Oceanic languages and makes a significant contribution to the field of Oceanic linguistics and to future comparative linguistic and typological research.
