Introduction to Cataloging and Classification Daniel N. Joudrey, Arlene G. Taylor, David P. Miller, 2015-09-29 A new edition of this best-selling textbook reintroduces the topic of library cataloging from a fresh, modern perspective. Not many books merit an eleventh edition, but this popular text does. Newly updated, *Introduction to Cataloging and Classification* provides an introduction to descriptive cataloging based on contemporary standards, explaining the basic tenets to readers without previous experience as well as to those who merely want a better understanding of the process as it exists today. The text opens with the foundations of cataloging, then moves to specific details and subject matter such as Functional Requirements for Bibliographic Records (FRBR), Functional Requirements for Authority Data (FRAD), the International Cataloging Principles (ICP), and RDA. Unlike other texts, the book doesn't presume a close familiarity with the MARC bibliographic or authorities formats, ALA's Anglo-American Cataloging Rules 2nd Edition revised (AACR2R), or the International Standard Bibliographic Description (ISBD). Subject access to library materials is covered in sufficient depth to make the reader comfortable with the principles and practices of subject cataloging and classification. In addition, the book introduces MARC BIBFRAME and other approaches used to communicate and display bibliographic data. Discussions of formatting, presentation, and administrative issues complete the book. Questions useful for review and study appear at the end of each chapter.

The authors answer those questions by providing concrete, innovative ways to integrate media literacy across the curriculum and teach students to be independent, skilled, and reflective thinkers. Through dozens of suggested activities, teaching strategies, and lessons, this book's

unique vision allows schools to Integrate media literacy into teaching at all grade levels and core content areas Address key education standards Teach 21st century skills and higher order critical thinking Engage students by bridging schoolwork with their lives outside the classroom In addition to dozens of activity ideas the text and companion website include self reflection exercises voices from the field a glossary of terms and seven annotated original classroom tested lesson plans that illustrate different approaches to media literacy in the classroom In a time of hectic schedules and ever increasing expectations the authors help teachers reframe their instruction to focus on the skills students need to succeed in the digital age
