**Design & Intuition** Cecilia Lewis Kausel, 2012 Scholarship has sought to explain design primarily as developments and trends by understanding the influential ideas of a period These processes are resourceful to the analysis however they don't explain why people become attached to design and cultivate it in time For this purpose we must also gain understanding of collective cognitive processes and the meaning of design to people The study traces the development of respective design observed first in ancient structures and then in interiors and artefacts that are associated to architecture by design Design form migrates usually from technology to material culture i.e. from buildings to interiors and crafts though this direction is not fixed in creativity Sometimes this pattern is not followed and arches pilasters tower crenellations and pediments appear in historic costume Technology holds implications for visual culture thus this study also looks at the inspiration in mechanical instruments observed in XXI century design As the book unfolds a cultural phenomenon emerges Architectural evocations in other crafts reflect that the public has its own dialogue with design The attachments and responses of the public to design are many times a phenomenon worthy of being analyzed The book gives out interesting findings about the mind and how it transforms design It also exemplifies a new methodology for the observation of collective responses to design

Building the Body of Christ Daniel C. Cochran, 2020-11-17 In Building the Body of Christ Daniel C Cochran argues that monumental Christian art and architecture played a crucial role in the formation of individual and communal identities in late antique Italy The ecclesiastical buildings and artistic programs that emerged during the fourth and fifth centuries not only reflected Christianity's changing status within the Roman Empire but also actively shaped those who used them Emphasizing the importance of materiality and the body in early Christian thought and practice Cochran shows how bishops and their supporters employed the visual arts to present a Christian identity rooted in the sacred past but expressed in the present through church unity and episcopal authority He weaves together archaeological and textual evidence to contextualize case studies from Rome Aquileia and Ravenna showing how these sites responded to the diversity of early Christianity as expressed through private rituals and the imperial appropriation of the saints Cochran shows how these early ecclesiastical buildings and artistic programs worked in conjunction with the liturgy to persuade individuals to adopt alternative beliefs practices and values that contributed to the formation of institutional Christianity and the Christianization of late antique Italy

Stocks, 2022-07-26 In this new edition of *Experiments in Egyptian Archaeology* Denys A. Stocks introduces further experimental research on stoneworking in Ancient Egypt through archaeological and pictorial evidence A further 20 years of

research has been added to the original publication and the book now includes the results of experiments that test and evaluate over 250 reconstructed and replica tools bringing alive the methods and practices of Ancient Egyptian craftworking. This practical approach to understanding the fundamentals of Ancient Egyptian stoneworking highlights the evolution of tools and techniques and how these come together to produce the wonders of Egyptian art and architecture. A new chapter on Predynastic industrial transitions and convergence explores how the surge in technology particularly in the expanding production of stone vessels and in the production of faience artifacts drove the expansion of the economy of the Late Predynastic period in Egypt. Introducing the results of new research to enrich our understanding of the fundamental development of stoneworking and other supporting technologies in Ancient Egypt, this book remains an important volume for students and researchers wishing to understand Ancient Egyptian technology and development.

*The Five Wounds of Saint Francis* Rev. Fr. Solanus M. Benfatti, 2011-09-30 Many saints have borne the stigmata wounds resembling those of Christ's crucifixion. While some of those saints have written about their experience, little is known of the personal experience of the first of all saints to brandish this extraordinary sign, Francis of Assisi. They were and have remained his carefully guarded secret. In *The Five Wounds of Saint Francis*, author Fr. Solanus Benfatti, CFR, explores the significance of this miraculous event in the Saint's life through careful analysis of pertinent medieval literature and recent scholarly studies. He establishes the historicity of the event, which has been called into question, and draws surprising and inspiring conclusions, leaving the reader with a afresh understanding of Saint Francis's spiritual experience.

**Clay Lab for Kids** Cassie Stephens, 2017-05-01 In *Clay Lab for Kids*, art teacher and winner of the Netflix bake off show *Nailed It*, Cassie Stephens presents 52 hands-on projects made with kid-friendly clays that get kids working creatively and thinking three dimensionally. Squishy, colorful, and infinitely shapable, clay just might be the most versatile art material for kids. Author/artist/teacher Cassie Stephens has created all new clay projects for kids of all skill levels. Start with the basics of rolling, coiling, and pinching pots, and move up to making Jurassic fossils, animal marionettes, monster magnets, and boxes with secret compartments. All of the projects use kid-friendly, no kiln clay, air-dry, homemade, and polymer and water-based paints, perfect for home and classroom. Plus, there's an entire chapter of recipes for mixing up inexpensive homemade clays in the kitchen. When creating with clay, kids are introduced to a wide range of cognitive and manual skills; they'll work three dimensionally, make figurative models, use their imaginations in making jewelry and toys, design with color, and decorate with paints. The popular *Lab for Kids* series features a growing list of books that share hands-on activities and projects on a wide host of topics, including art, astronomy, bugs, geology, math, and even how to create your own circus, all authored by established experts in their fields. Each lab contains a complete materials list, clear step-by-step photographs of the process, as well as finished samples. The labs can be used as singular projects or as part of a yearlong curriculum of experiential learning. The activities are open-ended, designed to be explored over and over, often with different results. Geared toward being taught or guided by adults, they are enriching for a

**Star Trek: Designing Starships Volume 4: Discovery** Ben Robinson, Marcus Riley, Matt McAllister, 2019-09-03 A chronological history of the Klingon fleet from the Star Trek television programs and films including the TV series Star Trek Discovery      *The Oxford Handbook of the Valley of the Kings* Richard H. Wilkinson, Kent R. Weeks, 2016 This Handbook offers an invaluable and up to date resource on this critical and fascinating World Heritage site      Schlüteriana III Kevin E. Kandt, 2015-11-06 This third volume of the new serial publication Schlüteriana continues the commemoration of the 300th anniversary of Schlüter's death and is dedicated solely to the funerary monuments created by the sculptor his school and followers in Berlin and the Brandenburg region of north eastern Germany The single text presented here is subtitled Part Two Germany and serves as the second installment of a comprehensive in depth survey focused on this highly important genre in the sculptor's oeuvre It completes the examination initiated by Part One Poland published in Schlüteriana II which dealt with Schlüter's tomb art created during his earlier sojourn in Polish territories The primary aim of this current publishing project is to bring about a more complete overall understanding of the artist's production from both his Polish and German years In these two articles we have concentrated on his funerary sculpture by providing in an essay catalogue format greatly enhanced by an exhaustive photographic documentation of each object discussed a fundamental description of monuments closely associated with the artist and his circle including comparative analysis based upon key examples from European Baroque art Certain sepulchral monuments created by the sculptor and his assistants in Berlin may already be somewhat better known to the lay public and art historians however those works from his Polish years have thus far still been somewhat neglected and inadequately received into the realm of Schlüter's total output This two part study which attempts to present all the works together along with supplemental commentary on pertinent historical social and iconographic contexts of the times when this art was created will hopefully begin to enrich our understanding of the inter relationships they share and contribute to a fuller reconstruction of Andreas Schlüter's artistic development throughout his entire career Schlüteriana III is being published in remembrance not only of Schlüter's death in 1714 but also as a tribute to a Berlin scholar who spent many years of her career deeply involved with research into the master's greatest work of architecture the Berlin Stadtschloss Her kindness and generosity in the free exchange of information led to many stimulating discussions about the artist which still after more than two decades inspire this author's own studies until today      **Again to the Life of Eternity** Frank A. Vaughan, 1996 This work postulates that the set of 116 designs by William Blake illustrated herein is not a series of individual responses to the pieces of text they accompany nor is it a series of responses to the individual poems of Thomas Gray The designs are also more than illustrations or corrections of Gray's speakers or of Gray himself In the Gray designs

Blake was using the opportunity given him by John and Ann Flaxman in 1797 to explore and explain visually the reformist malaise in the reactionary nineties when the general economic well being and optimism had been replaced by the effects of war and fear For Blake the collapse into the later 1790s is the failure of the imaginative will to sustain the impetus that the American and French Revolutions had begun Blake saw several causes for this failure of will and created a set of designs rich in allusions and dense with visual conventions These visual topoi are personal topical classical biblical and literary Thus there is a need for a study of the Gray designs that sees them as they are a unity rich with visual conventions partaking of Blake's revolutionary pattern of development and desire to reshape in specific ways the mind of his audience

Michelangelo, Drawing, and the Invention of Architecture

Cammy Brothers, 2008 Michelangelo's fame as a painter and sculptor tends to eclipse his reputation as an architect but his impact here was just as profound In this book Cammy Brothers takes an unusual approach to Michelangelo's architectural designs arguing that they are best understood in terms of his experience as a painter and sculptor By following the steps by which Michelangelo arrived at his extraordinary inventions the author questions conventional notions of spontaneity as a function of genius Rather she explores the idea of drawing as a mode of thinking using its evidence to reconstruct the process by which Michelangelo arrived at new ideas By turning the flexibility and fluidity of his figurative drawing methods to the subject of architecture Michelangelo demonstrated how it could match the expressive possibilities of painting and sculpture
