design or creative methods have been shown to uncover support and enhance the abilities of people living with dementia. Papers report on new ideas and findings relating to three main themes: engagement, empowerment and identity. They cover ethics of inclusion and solutions for shifting the culture of care to be focused on both personal independence and reconnecting with the community; new ways of designing with people living with dementia; strategies for breaking negative stereotypes and preconceived opinions; and approaches to retaining personhood and dignity. Offering a timely source of information on new design and creative methods to a broad community of industrial communication, interactive and inclusive designers, this book is also meant to address and inspire various stakeholders and organizations in dementia care.

Design for Dementia, Mental Health and Wellbeing Kristina Niedderer, Geke Ludden, Tom Denning, Vjera Holthoff-Detto, 2024-07-22

This edited volume offers the first overview and reflective discussion of how design can contribute to people's wellbeing and mental health in the context of dementia, mental illness and neurodiversity. This book explores and promotes holistic, salutogenic and preventive strategies that recognise and respond to people's needs, wants, wishes and rights to further health, wellbeing and equality. Bringing together years of experience as designers and clinicians, the contributors to the book emphasise how design can be a collaborative, creative process as well as an outcome of this process, and they reveal how this is guided by mental health and design policy. Through its three parts, the book explores themes of ethics, citizenship and power relationships in co-design, providing an overview of current developments and approaches in co-design of the culturally and value-sensitive adaptation of design interventions and their applications, many of which are a result of co-design and of policy and related standards in and for design and mental health. In this way, the book demonstrates how design can help to support people, their care partners and care professionals in promoting mental health and wellbeing, and it offers a rich resource on how to create a sustainable future for care in this domain. The book provides a unique and holistic overview and resource for designers, researchers, students, policy providers and health and care professionals to help support the development and adoption of person-centred design processes and interventions.
