Design As Politics Tony Fry:

Design as Politics Tony Fry, 2010-11-01 Design as Politics confronts the inadequacy of contemporary politics to deal with unsustainability Current solutions to unsustainability are analysed as utterly insufficient for dealing with the problems but further than this the book questions the very ability of democracy to deliver a sustainable future Design as Politics argues that finding solutions to this problem of which climate change is only one part demands original and radical thinking Rather than reverting to failed political ideologies the book proposes a post democratic politics. In this Design occupies a major role not as it is but as it could be if transformed into a powerful agent of change a force to create and extend freedom The book does no less than position Design as a vital form of political action Design and Politics Katarina Serulus, 2018-10-08 The unique position of design in the political context of postwar Belgium In the postwar era design became important as a marker of modernity and progress at world fairs and international exhibitions and in the global markets The Belgian state took a special interest in this vanguard phenomenon of industrial design as a vital political and economic strategic tool in the context of the Cold War and the creation of the European community This book describes the unique position that design occupied in the political context of postwar Belgium as it analyses the public promotion of design between 1950 and 1986 It traces this process from the first government backed manifestations and institutions in the 1950s through the 1960s and 1970s until design lost its privileged position as a state backed institution a process which culminated in the closure of the Brussels Design Centre in 1986 in the midst of the Belgian federalisation process A key figure in this history is the policymaker Josine des Cressonni res who played a leading role in the national and international design community and succeeded in connecting very different political worlds through the medium of design The Design Politics of the **Passport** Mahmoud Keshavarz, 2018-12-13 The Design Politics of the Passport presents an innovative study of the passport and its associated social political and material practices as a means of uncovering the workings of design politics It traces the histories technologies power relations and contestations around this small but powerful artefact to establish a framework for understanding how design is always enmeshed in the political and how politics can be understood in terms of material objects Combining design studies with critical border studies alongside ethnographic work among undocumented migrants border transgressors and passport forgers this book shows how a world made and designed as open and hospitable to some is strictly enclosed confined and demarcated for many others and how those affected by such injustices dissent from the immobilities imposed on them through the same capacity of design and artifice The Adaptive Nature of Design Ethics Discourse Philippe d'Anjou, 2025-06-30 How do designers navigate the ethical discursive territories of design thinking and practice when the same common terms they consistently use across the different design ethics paradigms like fair right good convey different meanings Delving into the dynamic and adaptable nature of ethical language and terminology in design The Adaptive Nature of Design Ethics Discourse argues that it is intrinsically flexible what can be described as chameleonic

Engaging in a meta ethical investigation this book elucidates the interconnections of key terms of design ethics discourse and explores the way in which different frameworks of design ethics both diverge and intersect The book challenges existing perspectives on ethical discourse in design by highlighting the complexities of such discourse and the tensions that emerge when universal language encounters various ethical views By shedding light on these tensions The Adaptive Nature of Design Ethics Discourse provides alternative ways to apprehend the ethical sense of responsibility of designers as well as a foundation for rethinking the discursive fabric of design ethics practice. This pivotal work is intended for researchers educators students and practitioners across all design disciplines including among others architecture engineering product design systems design and urban planning Craft is Political D Wood, 2021-04-22 Throughout the 21st century various craft practices have drawn the attention of academics and the general public in the West In Craft is Political D Wood has gathered a collection of essays to argue that this attention is a direct response to and critique of the particular economic social and technological contexts in which we live Just as Ruskin and Morris viewed craft and its ethos in the 1800s as a kind of political opposition to the Industrial Revolution Wood and her authors contend that current craft activities are politically saturated when perspectives from the Global South Indigenous ideology and even Western government policy are examined Craft is Political argues that a holistic perspective on craft in light of colonialism post colonialism critical race theory and globalisation is overdue A great diversity of case studies is included from craft and design in Turkey and craft markets in New Zealand to Indigenous practitioners in Taiwan and Finnish craft education Craft is Political brings together authors from a variety of disciplines and nations to consider politicised craft Designs for the Pluriverse Arturo Escobar, 2018-03-15 In Designs for the Pluriverse Arturo Escobar presents a new vision of design theory and practice aimed at channeling design s world making capacity toward ways of being and doing that are deeply attuned to justice and the Earth Noting that most design from consumer goods and digital technologies to built environments currently serves capitalist ends Escobar argues for the development of an autonomous design that eschews commercial and modernizing aims in favor of more collaborative and placed based approaches Such design attends to questions of environment experience and politics while focusing on the production of human experience based on the radical interdependence of all beings Mapping autonomous design s principles to the history of decolonial efforts of indigenous and Afro descended people in Latin America Escobar shows how refiguring current design practices could lead to the creation of more just and sustainable social orders The Politics of Furniture Fredie Floré, Cammie McAtee, 2017-02-10 In many different parts of the world modern furniture elements have served as material expressions of power in the post war era They were often meant to express an international and in some respects apolitical modern language but when placed in a sensitive setting or a meaningful architectural context they were highly capable of negotiating or manipulating ideological messages. The agency of modern furniture was often less overt than that of political slogans or statements but as the chapters in this book reveal it had the potential of becoming a persuasive and

malleable ally in very diverse politically charged arenas including embassies governmental ministries showrooms exhibitions design schools libraries museums and even prisons This collection of chapters examines the consolidating as well as the disrupting force of modern furniture in the global context between 1945 and the mid 1970s The volume shows that key to understanding this phenomenon is the study of the national as well as transnational systems through which it was launched promoted and received While some chapters squarely focus on individual furniture elements as vehicles communicating political and social meaning others consider the role of furniture within potent sites that demand careful negotiation whether between governments cultures or buyer and seller In doing so the book explicitly engages different scholarly fields design history history of interior architecture architectural history cultural history diplomatic and political history postcolonial studies tourism studies material culture studies furniture history and heritage and preservation studies Taken together the narratives and case studies compiled in this volume offer a better understanding of the political agency of post war modern furniture in its original historical context At the same time they will enrich current debates on reuse relocation or reproduction of some of these elements The Routledge Companion to Design Studies Penny Sparke, Fiona Fisher, 2016-06-17 Since the 1990s in response to dramatic transformations in the worlds of technology and the economy design a once relatively definable discipline complete with a set of sub disciplines has become unrecognizable Consequently design scholars have begun to address new issues themes and sub disciplines such as sustainable design design for well being empathic design design activism design anthropology and many more The Routledge Companion to Design Studies charts this new expanded spectrum and embraces the wide range of scholarship relating to design theoretical practice related and historical that has emerged over the last four decades Comprised of forty three newly commissioned essays the Companion is organized into the following six sections Defining Design Discipline Process Defining Design Objects Spaces Designing Identities Gender Sexuality Age Nation Designing Society Empathy Responsibility Consumption the Everyday Design and Politics Activism Intervention Regulation Designing the World Globalization Transnationalism Translation Contributors include both established and emerging scholars and the essays offer an international scope covering work emanating from and relating to design in the United Kingdom mainland Europe North America Asia Australasia and Africa This comprehensive collection makes an original and significant contribution to the field of Design Studies Design and Agency John Potvin, Marie-Eve Marchand, 2020-05-14 Design and Agency brings together leading international design scholars and practitioners to address the concept of agency in relation to objects organisations and people The authors set out to expand the scope of design history and practice avoiding the heroic narratives of a typical modernist approach They consider both how the agents of design construct and express their identities and subjectivities through practice while also investigating the distinctive contribution of design in the construction of individual identity and subjectivity Individual chapters explore notions of agency in a range of design disciplines and historical periods including the agency of women in

effecting changes to the design of offices and working practices the role of Jeffrey Lindsay and Buckminster Fuller in developing the design of a geodesic dome Le Corbusier's Casa Curutchet a re consideration of the gendered historiography of the Jugendstil movement and Bruce Mau's design exhibitions Taken together the essays in Design and Agency provide a much needed response to the traditional texts which dominate design history With a broad chronological span from 1900 to the present and an equally broad understanding of the term design it expands how we view the discipline and shows how design itself can be an agent for social cultural and economic change Design, Ecology, Politics Joanna Boehnert, 2018-02-08 Design Ecology Politics links social and ecological theory to design theory and practice critiquing the ways in which the design industry perpetuates unsustainable development Boehnert argues that when design does engage with issues of sustainability this engagement remains shallow due to the narrow basis of analysis in design education and theory The situation is made more severe by design cultures which claim to be apolitical Where design education fails to recognise the historical roots of unsustainable practice it reproduces old errors New ecologically informed design methods and tools hold promise only when incorporated into a larger project of political change Design Ecology Politics describes how ecological literacy challenges many central assumptions in design theory and practice By bringing design ecology and socio political theory together Boehnert describes how power is constructed reproduced and obfuscated by design in ways which often cause environmental harms She uses case studies to illustrate how communication design functions to either conceal or reveal the ecological and social impacts of current modes of production The transformative potential of design is dependent on deep reaching analysis of the problems design attempts to address Ecologically literate and critically engaged design is a practice primed to facilitate the creation of viable sustainable and just futures With this approach designers can make sustainability not only possible but attractive **Design and the Question of History** Tony Fry, Clive Dilnot, Susan Stewart, 2015-02-26 Design and the Question of History is not a work of Design History Rather it is a mixture of mediation advocacy and polemic that takes seriously the directive force of design as an historical actor in and upon the world Understanding design as a shaper of worlds within which the political ethical and historical character of human being is at stake this text demands radically transformed notions of both design and history Above all the authors posit history as the generational site of the future Blindness to history it is suggested blinds us both to possibility and to the foreclosure of possibilities enacted through our designing The text is not a resolved continuous work presented through one voice Rather the three authors cut across each other presenting readers with the task of disclosing to themselves the commonalities repetitions and differences within the deployed arguments issues approaches and styles from which the text is constituted This is a work of friendship of solidarity in difference an act of cultural politics It invites the reader to take a position it seeks engagement over agreement <u>Design</u> D.J. Huppatz, 2019-10-17 Design is everywhere It shapes not only our present but also our future An essential introductory guide Design The Key Concepts covers fundamental design concepts thinking

service context interaction experience and systems Each concept is situated within a broad context enabling the reader to understand design's contemporary practice and its relationship to issues such as new technology social and economic development globalization and sustainability Concepts are also explained by use of concise illustrated case studies of contemporary objects spaces systems and methods such as Uber the iPhone Kickstarter and IKEA Chapter summaries and supporting discussion questions make this an engaging and accessible introduction for students and those new to the field An annotated bibliography provides direction for further reading Design after Capitalism Matthew Wizinsky, 2022-03-15 How design can transcend the logics structures and subjectivities of capitalism a framework theoretical grounding and practical principles The designed things experiences and symbols that we use to perceive understand and perform our everyday lives are much more than just props They directly shape how we live In Design after Capitalism Matthew Wizinsky argues that the world of industrial capitalism that gave birth to modern design has been dramatically transformed Design today needs to reorient itself toward deliberate transitions of everyday politics social relations and economies Looking at design through the lens of political economy Wizinsky calls for the field to transcend the logics structures and subjectivities of capitalism to combine design entrepreneurship with social empowerment in order to facilitate new ways of producing those things symbols and experiences that make up everyday life After analyzing the parallel histories of capitalism and design Wizinsky offers some historical examples of anticapitalist noncapitalist and postcapitalist models of design practice. These range from the British Arts and Crafts movement of the nineteenth century to contemporary practices of growing furniture or biotextiles and automated forms of production Drawing on insights from sociology philosophy economics political science history environmental and sustainability studies and critical theory fields not usually seen as central to design he lays out core principles for postcapitalist design offers strategies for applying these principles to the three layers of project practice and discipline and provides a set of practical guidelines for designers to use as a starting point The work of postcapitalist design can start today Wizinsky says with the next project The Politics of the Artificial Victor Margolin, 2018-01-11 Emerging from the world of commercial art and product styling design has now become completely integrated into human life Its marks are all around us from the chairs we sit on to the Web sites on our computer screens One of the pioneers of design studies and still one of its most distinguished practitioners Victor Margolin here offers a timely meditation on design and its study at the turn of the millennium and charts new directions for the future development of both fields Divided into sections on the practice and study of design the essays in The Politics of the Artificial cover such topics as design history design research design as a political tool sustainable design and the problems of design s relation to advanced technologies Margolin also examines the work of key practitioners such as the matrix designer Ken Isaacs Throughout the book Margolin demonstrates the underlying connections between the many ways of reflecting on and practicing design He argues for the creation of an international interdisciplinary field of design research and proposes a new ethical agenda for designers and researchers that

encompasses the responsibility to users the problems of sustainability and the complicated questions of how to set boundaries for applying advanced technology to solve the problems of human life Opinionated and erudite Victor Margolin s The Politics of the Artificial breaks fresh ground in its call for a new approach to design research and practice Designers engineers architects anthropologists sociologists and historians will all benefit from its insights **Introduction to Design Theory** Michalle Gal, Jonathan Ventura, 2023-07-31 Introduction to Design Theory introduces a comprehensive systematic and didactic outline of the discourse of design Designed both as a course book and a source for research this textbook methodically covers the central concepts of design theory definitions of design its historical milestones and its relations to culture industry body ecology language society gender and ideology Demonstrated by a shift towards the importance of the sociocultural context in which products are manufactured and embedded this book showcases design theory as an emerging sub discipline of design unique in its practice based approach and its broad perception of design It offers an in depth understanding of the central concepts such as form and function theory and practice through a discussion of key case studies and historical examples such as the advent of the view of design in antiquity the introduction of mass production to modernist design or the ideological shifts in design in the mid twentieth century as well as analytical tools for further dissection and learning in practice With a focus on a combination of several theoretical knowledge foundations aesthetics and philosophy critical theories cultural studies design history and design anthropology the reader is enabled to approach design as a central pivot around which contemporary culture revolves reflecting reaffirming or challenging social and cultural structures Aimed towards undergraduate and postgraduate students as well as teachers and scholars from across the design disciplines Introduction to Design Theory invites readers to engage with design from an interdisciplinary perspective departing from the traditional academic compartmentalisation of practice history and philosophy **Design Ethics beyond Duty and Virtue** Philippe d'Anjou, 2017-06-20 Freedom is compelling in design it has to be acknowledged accepted and comprehended in all its existential complexity to better understand and engage the intricate ethical domain of design practice The book addresses that issue by thoroughly examining design ethics and design in general within an existentialist philosophical framework Its inquiry reveals a puzzling and unsettling reality of design ethics and hence what constitutes an ethical design practice where there is no exit for designers but complete acceptance of their freedom and responsibility This book makes a unique original and invaluable contribution to the design literature and design ethics scholarship Scholars professors students and professionals in all design disciplines as well as any person involved in arts humanities philosophy social sciences and engineering will find philosophical insights that will challenge design thinking and inspire them to rethink design ethics as an agency of human existence making instead of code compliance Making a case for existentialist design ethics this book lays the ground for a radical transformation of how we conceive design ethics in design practice and the role of designers in the world **Design and the Question of History** Tony Fry, Clive Dilnot, Susan Stewart, 2015-02-26 Design

and the Question of History is not a work of Design History Rather it is a mixture of mediation advocacy and polemic that takes seriously the directive force of design as an historical actor in and upon the world Understanding design as a shaper of worlds within which the political ethical and historical character of human being is at stake this text demands radically transformed notions of both design and history Above all the authors posit history as the generational site of the future Blindness to history it is suggested blinds us both to possibility and to the foreclosure of possibilities enacted through our designing The text is not a resolved continuous work presented through one voice Rather the three authors cut across each other presenting readers with the task of disclosing to themselves the commonalities repetitions and differences within the deployed arguments issues approaches and styles from which the text is constituted This is a work of friendship of solidarity in difference an act of cultural politics It invites the reader to take a position it seeks engagement over agreement

Staging and the Arts in Nineteenth-Century France Camilla Murgia, 2023-09-22 This book discusses the mechanisms and patterns of staging in nineteenth century France Often associated with theatre and performance staging also applies to visual arts It is thoroughly embedded in a more general cultural development comprising the dissemination of knowledge political awareness and consumerism The notion of staging applies to a process of appearing revealing and disappearing that puts forward new ways for the individual to be seen and to make the self and the other visible Staging determines and questions the process of appearing and disappearing by generating connections and interactions between multiple layers of reality i e artistic theatrical literary and visual but according to what criteria through what mechanisms and with what materials What are the repercussions of staging and even more important what does staging not show This book argues that the notion of staging goes beyond interdisciplinarity Looking at the different ways staging was used and conceived introduces new approaches to understanding visual culture in nineteenth century France **Design in Crisis** Tony Fry, Adam Nocek, 2020-12-29 This book is an essential contribution to the transdisciplinary field of critical design studies The essays in this collection locate design at the center of a series of interrelated planetary crises from climate change nuclear war and racial and geopolitical violence to education computational culture and the loss of the commons In doing so the essays propose a range of needed interventions in order to transform design itself and its role within the shifting realities of a planetary crisis It challenges the widely popular view that design can contribute to solving world problems by exposing how this attitude only intensifies the problems we currently face In this way the essays critique the dominant modes of framing the meaning and scope of design as a largely Anglo European problem solving practice By drawing on post development theory decolonial theory black studies continental philosophy science and technology studies and more the contributions envision a critical and speculative practice that problematises both its engagement with planet and itself The essays in this collection will appeal to design theorists and practitioners alike but also to scholars and students generally concerned with how the past and future of design is implicated in the unfolding complexity of ecological devastation racial and political
