Design Of Steel Transmission Pole Structures Ascesei 48 05:

Design of Steel Transmission Pole Structures American Society of Civil Engineers, 2012 This Standard provides a uniform basis for the design detailing fabrication testing assembly and erection of steel tubular structures for electrical transmission poles These guidelines apply to cold formed single and multipole tubular steel structures that support overhead transmission lines The design parameters are applicable to guyed and self supporting structures using a variety of foundations including concrete caissons steel piling and direct embedment Standard ASCE SEI 48 11 replaces the previous edition ASCE SEI 48 05 and revises some formulas that are based on other current industry standards This Standard includes a detailed commentary and appendixes with explanatory and supplementary information This Standard will be a primary reference for structural engineers and construction managers involved in designing and building electrical transmission lines as well as engineers and others involved in the electric power transmission industry

Design of Steel Transmission Pole Structures William L. Magee, 2006 Standard ASCE 48 05 specifies requirements for cold formed tubular members and connections for steel electrical transmission pole structures

Cold-Formed Steel Design Wei-Wen Yu, Roger A. LaBoube, 2010-09-23 The definitive text in the field thoroughly updated and expanded Hailed by professionals around the world as the definitive text on the subject Cold Formed Steel Design is an indispensable resource for all who design for and work with cold formed steel No other book provides such exhaustive coverage of both the theory and practice of cold formed steel construction Updated and expanded to reflect all the important developments that have occurred in the field over the past decade this Fourth Edition of the classic text provides you with more of the detailed up to the minute technical information and expert guidance you need to make optimum use of this incredibly versatile material for building construction Wei Wen Yu and Roger LaBoube respected authorities in the field draw upon decades of experience in cold formed steel design research teaching and development of design specifications to provide guidance on all practical aspects of cold formed steel design for manufacturing civil engineering and building applications Throughout the book they describe the structural behavior of cold formed steel members and connections from both the theoretical and experimental perspectives and discuss the rationale behind the AISI and North American design provisions Cold Formed Steel Design Fourth Edition features Thoroughly up to date 2007 North American AISI S100 design specifications Both ASD and LRFD methods for USA and Mexico LSD Limit States Design method for Canada A new chapter on the Direct Strength Method Updates and revisions of all 14 existing chapters In depth design examples and explanation of design provisions Cold Formed Steel Design Fourth Edition is a necessary tool of the trade for structural engineers manufacturers construction managers and architects It is also an excellent advanced text for college students and researchers in structural engineering architectural engineering construction engineering and related disciplines
