Important Missing Dimensions in Our Current Understanding of the Mind Dr. King, Our current scientific achievements in understanding the working of the mind are commendable However in its over insistence on objectivity science seems to have overlooked some important dimensions of the mind There are many questions science fails to provide satisfactory answer Interestingly many of these questions were addressed by ancient philosophies and probably in the true scientific spirit we should look at these philosophies with an open mind This second part of the 3 part series *Marvels of the Mind* focuses on these missed dimensions and how ancient philosophies address them A range of ancient philosophies amazingly well conceptualized that look at different aspects of the mind are discussed in the current book There is the ancient philosophy of Plato who points out the limitations of our sense perception the elaborate psychology of ancient Buddhists that almost parallels with our scientific understanding the philosophy of Sankara who even questions the reality of existence and the concept of domains beyond mind that are the focus of ancient Upanishads All these and more are explained clearly in this second part of the series These philosophies compel us to rethink on our current definition of science and its approach The book also provides a smooth transition point from science to philosophy and finally to domains beyond both these

Revelation Plain and Simple Jonathan Mackinney, 2006-05 *Mindfulness, Now and Zen: The sceptics guide to Ultimate Reality* Wally Barr, 2017-02-22 This book explores how each of us knows what we know It considers claims that we see only

illusions and that behind it all there is an indescribably beautiful reality both a God and a Nirvana The book goes on to explain in simple terms how these two ideas so different on the surface may not be so different at all Ranging across the centuries the book draws on the teachings of a wide variety of thinkers from vastly different cultural philosophical and religious backgrounds The message they each bring is distilled into one consistent story in which our everyday sense of reality can be thought of as a deceptive and rather pale reflection of what's really going on And although our thinking processes are seriously limited the book describes how we can all transcend these limitations and experience Ultimate Reality through the simple practice of mindfulness for mindfulness meditation offers freedom from thinking

The Inner Evolution of Man John Brokaar, 2022-05-04 TO FIND ONESELF IN THE DUALITY OF CONTRADICTIONS ONE MUST FIRST LEARN TO KNOW ONESELF THIS HOWEVER IS NOT A NATURAL PROCESS As contemporary human beings we exist in a one and two dimensional world of fearful desire for food wealth sex recognition and immortality Unaware of its illusory state where perception manifests our reality we are equally unaware of our own hybrid state As beings of physical and metaphysical features for which the attainment of the Higher Dimensions is our very birthright This attainment does not come naturally though it requires our awareness of the conceptual world as well as the acceptance of our conditioned mechanicalness within it These observations and contemplations aim to offer such awareness and to enhance the Seeker of Truth with the means to discover understand and accept his or her undivided Self This book combines philosophy including gnostic thought religion as well as the observed psychology and sociology of contemporary ways within the arenas of politics geopolitics and corporatism through the lens of spirituality and magic It is this that defines the supernatural wonders into which the Seeker of Truth must cross his or her own threshold As with all things of substance the answer to these mysteries will not be found in selected subjects or even the sum of their parts as in such one only finds Chaos It is only in knowing the Whole of the Self that complete acceptance of All can emerge

The Sugar Frosted Nutsack Mark Leyner, 2012-03-26 From the bestselling and wildly imaginative novelist Mark Leyner a romp through the excesses and exploits of gods and mortals High above the bustling streets of Dubai in the world's tallest and most luxurious skyscraper reside the gods and goddesses of the modern world Since they emerged 14 billion years ago from a bus blaring a tune remarkably similar to the Mister Softee jingle they've wreaked mischief and havoc on mankind Unable to control their jealousies the gods have splintered into several factions led by the immortal enemies XOXO Shanice La Felina Fast Cooking Ali and Mogul Magoo Ike Karton an unemployed butcher from New Jersey is their current obsession Ritualistically recited by a cast of drug addled bards The Sugar Frosted Nutsack is Ike's epic story A raucous tale of gods and men confronting lust ambition death and the eternal verities it is a wildly fun wickedly fast gambol through the unmapped corridors of the imagination

Memory Keith A. Crawford, Stuart J. Foster, 2007-12-01 The Second World War stands as the most devastating and destructive global conflict in human history More than 60 nations representing 1 7 billion people or three quarters of the world s population were consumed by its horror Not surprisingly therefore World War II stands as a landmark episode in history education throughout the world and its prominent place in school history textbooks is almost guaranteed As this book demonstrates however the stories that nations choose to tell their young about World War II do not represent a universally accepted truth about events during the war Rather wartime narratives contained in school textbooks typically are selected to instil in the young a sense of national pride common identify and shared collective memory To understand this process War Nation Memory describes and evaluates school history textbooks from many nations deeply affected by World War II including China France Germany Japan USA and the United Kingdom It critically examines the very different and complex perspectives offered in many nations and analyses the ways in which textbooks commonly serve as instruments of socialisation and in some cases propaganda Above all War Nation Memory demonstrates that far from containing neutral knowledge history textbooks prove fascinating cultural artefacts consciously shaped and legitimated by powerful ideological cultural and sociopolitical forces dominant in the present Writing for Publication Georgina Tuari Stewart, Nesta
