Principles and Practice of Emergency Research Response Robert A. Sorenson, 2024-08-31 Unlocking the Future of Infectious Disease Research Response In a world where emerging infectious diseases constantly threaten humanity advances in science and technology promise defense against future pathogens before they cause pandemics The field of emergency research response and preparedness remains in its infancy however Not until the 2014 West African Ebola outbreak was accelerated research broadly recognized as a crucial component of emergency response Many outbreaks and one global pandemic later it is clear the world must be prepared to launch accelerated research responses to prevent or mitigate infectious disease outbreaks epidemics and pandemics Yet this nascent field is rife with critical scientific ethical and policy questions How can local national and global systems collaborate across disciplines and political boundaries to protect health security How can we conduct rigorous research in fragile or failed nation states What is needed for equitable distribution of vaccines and therapeutic medicines in short supply How can we accelerate trials of vaccines and therapeutics during an emergency without compromising scientific rigor or ethical standards How do we integrate communities and stakeholders into research preparedness and response The editors bring decades of experience to their collaboration with renowned research scientists and health policy experts Together they have crafted a compendium that proposes normative standards and offers practical guidance for preparedness and rapid research response This pioneering open access textbook presents principles and practices forged from experience in health emergencies insights that illuminate a path forward for research response and preparedness The goal is to stop outbreaks from becoming avoidable pandemics and to mitigate illness death and social disruption if they cannot be stopped Principles and Practice of Emergency Research Response merges historical understanding with insights into possible futures It will serve as an

indispensable compass for curtailing infectious disease threats through research global health policy changes and research capacity improvements where they are most needed The editors hope that this book will be an ongoing reference for governments health organizations development agencies researchers policy experts ethicists and social scientists To facilitate focused and enhanced learning it incorporates pedagogical tools such as abstracts learning objectives discussion questions real life examples and learning tracks Robust global health security requires effective preparation for and response to emerging and re emerging pathogens This volume should help guide us towards a more resilient future

The Molecular Basis of Viral Infection, 2015-01-13 Virology is in a sense both one of the most important precursors and one of the most significant beneficiaries of structural and cellular molecular biology Numerous breakthroughs in our understanding of the molecular interactions of viruses with host cells are ready for translation into medically important applications such as the prevention and treatment of viral infections This book collects a wide variety of examples of frontline research into molecular aspects of viral infections from virological immunological cell and molecular biological structural and theoretical perspectives Contributors are world leaders in their fields of study and represent prestigious academic and research institutions Review articles vary vastly in scope some focus on a narrowly defined scientific problem of one particular virus with careful introduction for the non specialist others are essays in general and comparative virology with forays into specific viral species or molecules The different perspectives complement each other and collectively the contributions provide an impression of the fast moving frontlines of virology while showing how the problems have evolved Structural data are presented through high quality illustrations
