Principles of Health Interoperability HL7 and SNOMED Tim Benson, 2010-05-06 Joined up healthcare makes information available when and where it is needed to improve safety efficiency and effectiveness Politicians may take interoperability between healthcare computer systems for granted but it is non trivial Healthcare integration projects are notoriously under estimated and come in over budget and over time Joined up healthcare depends on standards The two leading standards are the SNOMED CT which is a clinical terminology semantics and HL7 Version 3 which is a specialised healthcare interoperability language syntax Both are new complex and fit for purpose Tim Benson believes there is an unmet need for a book on Healthcare Integration Some health informatics textbooks include chapters on HL7 and or SNOMED but these are usually quite short and cannot provide even an adequate introduction There is little of much value on the Internet or in journals or conference proceedings
