Emerging Solutions for Future Manufacturing Systems Luis M. Camarinha-Matos, 2004-09-13 Industries and particularly the manufacturing sector have been facing difficult challenges in a context of socio economic turbulence characterized by complexity as well as the speed of change in causal interconnections in the socio economic environment In order to respond to these challenges companies are forced to seek new technological and organizational solutions In this context two main

characteristics emerge as key properties of a modern automation system agility and distribution Agility because systems need not only to be flexible in order to adjust to a number of a priori defined scenarios but rather must cope with unpredictability Distribution in the sense that automation and business processes are becoming distributed and supported by collaborative networks Emerging Solutions for Future Manufacturing Systems includes the papers selected for the BASYS 04 conference which was held in Vienna Austria in September 2004 and sponsored by the International Federation for Information Processing IFIP

Proceedings of EUCOMES 08 Marco Ceccarelli, 2008-11-27 The EUCOMES08 Second European Conference on Mechanism Science is the second event of a series that has been started in 2006 as a conference activity for an European community working in Mechanism Science The rst event was held in Obergurgl Austria in 2006 This year EUCOMES08 Conference has come to Cassino in Italy taking place from 17 to 20 September 2008 The aim of the EUCOMES Conference is to bring together European researchers industry professionals and students from the broad ranges of disciplines referring to Mechanism Science in an intimate collegial and stimulating environment In this second event we have received an increased attention to the initiative as can be seen by the fact that the EUCOMES08 Proceedings will contain contributions by authors even from all around the world This means also that there is a really interest to have not only a conference frame but even a need of aggregation for an European Community well identified in Mechanism Science with the aim to strengthen common views and collaboration activities among European researchers and institutions I believe that a reader will take advantage of the papers in these Proceedings with further satisfaction and motivation for her or his work These papers cover the wide field of the Mechanism Science The program of EUCOMES08 Conference has included technical sessions with oral presentations which together with informal conversations during the social program have enabled to offer wide opportunities to share experiences and discuss scientific achievements and current trends in the areas encompassed by the EUCOMES08 conference
