Pacific Automobilmism Gijs Mom, 2022-09-13 The beginning of the 21st century has seen important shifts in mobility cultures around the world as the West's media driven car culture has contrasted with existing local mobilities from rickshaws in India and minibuses in Africa to cycling in China In this expansive volume historian Gijs Mom explores how contemporary mobility has been impacted by social political and economic forces on a global scale as in light of local mobility cultures the car as an adventure machine seems to lose cultural influence in favor of the car's status character

New Frontiers of the Automobile Industry Alex Covarrubias V., Sigfrido M. Ramírez Perez, 2019-11-28

Analysing developments in digital technologies and institutional changes this book provides an overview of the current frenetic state of transformation within the global automobile industry An ongoing transition brought about by the relocation of marketing design and production centres to emerging economies and experimentation with new mobility systems such as electrical autonomous vehicles this process poses the question as to how original equipment manufacturers OEMs and newcomers can remain competitive and ensure sustainability With contributions from specialists in the automobile sector this collection examines the shifts in power and geographical location occurring in the industry and outlines the key role that public policy has in generating innovation in entrepreneurial states Offering useful insights into the challenges facing emerging economies in their attempts to grow within the automobile industry this book will provide valuable reading for those researching internationalization and emerging markets business strategy and more specifically the automotive industry

Inside China's Automobile Factories Lu Zhang, 2015 In *Inside China's Automobile Factories* Lu Zhang explores the current conditions subjectivity and collective actions of autoworkers in the world's largest and fastest growing automobile manufacturing nation Based on years of fieldwork and extensive interviews conducted at seven large auto factories in various regions of China Zhang provides an inside look at the daily factory life of autoworkers and a deeper understanding of the roots of rising labor unrest in the auto industry Combining original empirical data and sophisticated analysis that moves from the shop floor to national political economy and global industry dynamics the book develops a multilayered framework for understanding how labor relations in the auto industry and broader social economy can be expected to develop in China in the coming decades

China's Economy Arthur R. Kroeber, 2016-03-01 *China's Economy What Everyone Needs to Know* is a concise introduction to the most astonishing economic growth story of the last three decades In the 1980s China was an impoverished backwater struggling to escape the political turmoil and economic mismanagement of the Mao era Today it is the world's second biggest economy the largest manufacturing and trading nation the consumer of half the world's steel and coal the biggest source of international tourists and one of the most influential investors in developing countries from

southeast Asia to Africa to Latin America China's growth has lifted 700 million people out of poverty It has also created a monumental environmental mess with smog blanketed cities and carbon emissions that are a leading cause of climate change Multinational companies make billions of dollars in profits in China each year but traders around the world shudder at every gyrations of the country's unruly stock markets Most surprising of all its capitalist economy is governed by an authoritarian Communist Party that shows no sign of loosening its grip How did China grow so fast for so long Can it keep growing and still solve its problems of environmental damage fast rising debt and rampant corruption How long can its vibrant economy co exist with the repressive one party state What do China's changes mean for the rest of the world China's Economy What Everyone Needs to Know answers these questions in straightforward language that you don't need to be an economist to understand but with a wealth of detail drawn from academic research interviews with dozens of company executives and policy makers and a quarter century of personal experience Whether you're doing business in China negotiating with its government officials or a student trying to navigate the complexities of this fascinating and diverse country this is the one book that will tell you everything you need to know about how China works where it came from and where it's going

The Political Economy of Automotive Industrialization in East Asia Richard F. Doner, Gregory W. Noble, John Ravenhill, 2021-04-21

East Asia is a powerhouse of automobile production Yet across the region national automobile industries have had strikingly different patterns of development Despite starting from equally low levels of performance and initially similar strategies countries have experienced vastly different results From Thailand's success as an assembly hub for foreign automakers and China's unexpected achievements in building its own car industry to South Korea's impressive development of an integrated industry to the Philippines persistent weakness these divergent paths offer a fascinating window into the determinants of economic growth The Political Economy of Automotive Industrialization in East Asia provides a political explanation for why development strategies and performance have been so uneven within one of the world's most important regions Utilizing interviews and original language research from multiple nations this book explains that factors such as market size and neoclassical economic policies alone cannot explain these patterns of development Richard F Doner Gregory W Noble and John Ravenhill instead highlight the significance of two sets of factors countries very different capabilities for implementing policies and the political forces that help to explain the emergence of effective institutions Through cross national analyses of China Taiwan South Korea Indonesia Malaysia the Philippines and Thailand the book sets up a clear structure for understanding industrial development and how it enables or constrains the capabilities of domestic firms Brief comparisons with Brazil Mexico and other developing countries confirm the utility of the analytic framework and demonstrate how it is superior both to accounts in mainstream economics and much of political science which fail to give sufficient emphasis to the role of public and public private institutions or provide an explanation of the political bases of those institutions In a world where auto assemblers and suppliers are facing new challenges in an ever evolving industry such as the transition to electric

and autonomous vehicles this book offers a crucial perspective on the centrality of institutional capacities and political economy By tracing the divergent trajectories of seven nations *The Political Economy of Automotive Industrialization in East Asia* offers lessons beyond the automobile industry that illustrate the broader importance of institutions to economic growth

New Worlds of Work Ulrich Jürgens, Martin Krzywdzinski, 2016-04-15 New industrial centres are emerging in the so called BRIC countries Brazil Russia India and China where large numbers of plants have been constructed in recent years creating many manufacturing jobs But what does industrial work look like in these locations Up until now much of the interest in developing country industrialization has concentrated on the poor working conditions that characterize some export oriented sectors in emerging economies most notoriously in the garment industry In contrast the concern of this book is with the modern facilities of multinational or local manufacturers that reflect aspirations for a process of industrial upgrading that might foreshadow the future for these countries The book provides an analysis of work its context and the situation of employees in plants in the BRICs focussing on three main questions What differences and common features can be ascertained in a comparison both of countries and firms in terms of workplace HR management and production systems What evidence is there for either a high road or low road developmental path in the BRICs How are corporate standards implemented in these local contexts The book addresses an academic audience as well as managers and trade unionists For the former it offers a systematic comparison of the four countries and the companies under study For the latter it offers a vivid account of challenges the companies face in the BRIC countries as well as the solutions adopted by the companies
