ICEL 2018 13th International Conference on e-Learning Professor Eunice Ivala,2018-07-05

Educational Technology Beyond Content Brad Hokanson,Gregory Clinton,Andrew A. Tawfik,Amy Grincewicz,Matthew Schmidt,2020-04-09 This book is the outcome of a research symposium sponsored by the Association for Educational Communications and Technology AECT Consisting of twenty four chapters including an introduction and conclusion it argues that informational content should not be the main element of education and that to provide more for learners it is necessary to go beyond content and address other skills and capabilities It also discusses the false premise that learning is complete when the information is known not when learners seek more their own directions answers and ideas The authors assert that the ability to synthesize solve problems and generate ideas is not based on specific content although

education often focuses solely on teaching content Further they state that content can be separated from the learning process and that instructional design and educational technology must be about the skills habits and beliefs to be learned

The Handbook of Design for Sustainability Stuart Walker,2013-11-07 Sustainability has emerged as a central issue for contemporary societies and for the world community as a whole Furthermore many of the social and environmental concerns that are embodied in the term sustainability are directly or indirectly related to design Designers help to define our human made environment how it is produced how it is used and how long it endures Despite some forty years of development and increased awareness of the critical relationships that exist between design decisions and modes of production energy use environmental impacts the nature of work and human exploitation design for sustainability is still not widely understood or followed The Handbook of Design for Sustainability presents a comprehensive state of the art overview of this crucial subject its development its methods its practices and its potential futures Bringing together leading international scholars and new researchers to provide a substantive insight into the latest thinking and research within the field The Handbook covers a breadth of historical and theoretical understandings and includes a series of original essays that explore methods and approaches for designers and design educators The Handbook presents the first systematic overview of the subject that in addition to methods and examples includes historical perspectives philosophical approaches business analyses educational insights and emerging thinking It is an invaluable resource for design researchers and students as well as design practitioners and private and public sector organizations wishing to develop more sustainable directions **Designing**

Boyko, Rachel Cooper, Nick Dunn, 2020-09-17

Designing Future Cities for Wellbeing draws on original research that brings together dimensions of cities we know have a bearing on our health and wellbeing including transportation housing energy and foodways and illustrates the role of design in delivering cities in the future that can enhance our health and wellbeing It aims to demonstrate that cities are a complex interplay of these various dimensions that both shape and are shaped by existing and emerging city structures governance design and planning Explaining how to consider these interconnecting dimensions in the way in which professionals and citizens think about and design the city for future generations health and wellbeing therefore is key The chapters draw on UK case and research examples and make comparison to international cities and examples This book will be of great interest to researchers and students in planning public policy public health and design

Urban Design Under Neoliberalism

Francisco Vergara Perucich,2019-05-01 This book discusses the status of urban design as a disciplinary field and as a practice under the current and pervasive neoliberal regime The main argument is that urban design has been wholly reshaped by neoliberalism In this transformation it has become a discipline that has neglected its original ethos designing good cities aligning its theory and practice with the sole profit oriented objectives typical of advanced capitalist societies The book draws on Marxism inspired scholars for a conceptual analysis of how neoliberalism influenced the emergence of urbanism and urban design It looks specifically at how in urbanism s everyday dimensions it is possible to find examples of resistance and emancipation Based on empirical evidence archival resources and immersion in the socio spatial reality of Santiago de Chile the book illustrates the way neoliberalism compromises urban designers ethics and practices and therefore how its theories become instrumental to the neoliberal transformation of urban society represented in contemporary urbanisms It will be a valuable resource for academics and students in the fields of architecture urban studies sociology and geography

Positive Computing Rafael A. Calvo,Dorian Peters,2014-11-28 A case for building a digital environment that can make us happier and healthier not just more productive and a theoretical framework for doing so On the eve of Google s IPO in 2004 Larry Page and Sergey Brin vowed not to be evil Today a growing number of technologists would go further trying to ensure that their work actively improves people s lives Technology so pervasive and ubiquitous has the capacity to increase stress and suffering but it also has the less heralded potential to improve the well being of individuals society and the planet In this book Rafael Calvo and Dorian Peters investigate what they term positive computing the design and development of technology to support psychological well being and human potential Calvo and Peters explain that technologists growing interest in social good is part of a larger public concern about how our digital experience affects our emotions and our quality of life which itself reflects an emerging focus on humanistic values in many different disciplines Synthesizing theory knowledge and empirical methodologies from a variety of fields they offer a rigorous and coherent foundational framework for positive computing Sidebars by experts from psychology neuroscience human computer interaction and other disciplines supply essential context Calvo and Peters examine specific well being factors including

positive emotions self awareness mindfulness empathy and compassion and explore how technology can support these factors Finally they offer suggestions for future research and funding Sidebars Timothy N Bickmore Jeremy Bailenson danah boyd Jane Burns David R Caruso Mihaly Csikszentmihalyi Felicia Huppert Mary Helen Immordino Yang Adele Krusche and J Mark G Williams Jane McGonigal Jonathan Nicholas Don Norman Yvonne Rogers **Architecture and Health** Dina Battisto, Jacob J.
