*Specters of Cavafy* Maria Boletsi, 2024-07-02 The Greek Alexandrian poet C P Cavafy 1863 1933 has been recognized as a central figure in European modernism and world literature His poetry explored the conditions for animating the past and making lost worlds or people haunt the present Yet he also described himself as a poet of the future generations Indeed his writings address concerns and desires that permeate the twentieth and twenty first centuries How does poetry concerned with the past memory loss and death carry futurity How does it haunt and how is it haunted by future presents Specters of

Cavafy broaches these questions by proposing spectral poetics as a novel approach to Cavafy's work. Drawing from theorizations of specters and haunting, it develops spectrality as a lens for revisiting Cavafy's poetry and prose fiction and nonfiction as well as his poetry's bearing on our present. By examining Cavafy's spectral poetics, the book's first part shows how conjurations work in his writings and how the spectral permeates the entanglement of modernity and haunting and of irony and affect. The second part traces the afterlives of specific poems in the Western imagination since the 1990s in Egypt's history of debt and colonization and in Greece during the country's recent debt crisis. Beyond its original contribution to Cavafy studies, the book proposes tools and modes of reading that are broadly applicable in literary and cultural studies.

**Entangled Emancipation** Alexandria N. Ruble, 2023-11-01 In 1900 German legislators passed the Civil Code, a controversial law that designated women as second-class citizens with regard to marriage, parental rights, and marital property. Despite the upheavals in early twentieth-century Germany—the fall of the German Empire after the First World War, the tumultuous Weimar Republic, and the destructive Third Reich—the Civil Code remained the law of the land. After Nazi Germany's defeat in 1945 and the founding of East and West Germany, legislators in both states finally replaced the old law with new versions that expanded women's rights in marriage and the family. *Entangled Emancipation* reveals how the complex relationship between the divided Germans in the early Cold War catalysed but sometimes blocked efforts to reshape legal understandings of gender and the family after decades of inequality. Using methods drawn from gender history and discourse analysis, the book restores the history of the women's movements in East and West Germany. *Entangled Emancipation* ultimately explores the parallel processes through which East and West Germany reimagined, negotiated, and created new civil laws governing women's rights after the Second World War.

**Journey to the Edge of Reason** Stephen Budiansky, 2021 A remarkable account of the brilliant, troubled mathematician and philosopher Kurt Gödel. From his famous Incompleteness Theorem, which shook the foundations of mathematical truth, to his perilous escape from Nazi Vienna, this book weaves together his creative genius, mental illness, and idealism in the face of adversity.

**A Modern History of European Cities** Rosemary Wakeman, 2020-01-23 Rosemary Wakeman's original survey text comprehensively explores modern European urban history from 1815 to the present day. It provides a journey to cities and towns across the continent in search of the patterns of development that have shaped the urban landscape as indelibly European. The focus is on the built environment, the social and cultural transformations that mark the patterns of continuity and change, and the transition to modern urban society. Including over 60 images that serve to illuminate the analysis, the book examines whether there is a European city and, if so, what are its characteristics. Wakeman offers an interdisciplinary approach that incorporates concepts from cultural and postcolonial studies as well as urban geography and provides full coverage of urban society not only in western Europe but also in eastern and southern Europe, using various cities and city types to inform the discussion. The book provides detailed coverage of the often neglected urbanization post 1945, which allows us to more clearly understand the

modernizing arc Europe has followed over the last two centuries

*Women Leadership in Emerging Markets* Shireen Chengadu, Caren Scheepers, 2017-07-06 This book focuses on the increase in female leadership over the last fifty years and the concrete benefits and challenges this leads to in organizations It moves beyond the typical focus on developed Western contexts and answers the call for research on how women in emerging markets rise above the proverbial glass ceiling The authors integrate two underdeveloped topics that are highly relevant to modern business women in leadership roles and women in emerging markets They examine how women leaders in a range of professional services including accounting consulting law engineering and medicine have managed to navigate their careers while considering the role emerging markets play in their work Based on cutting edge research the topics are brought to life through examples and profiles of leading women across Africa the Middle East and the Far East These narratives told in the leaders own words are key to understanding women s achievements and the barriers they face Students of leadership diversity gender studies and human resource management will learn much from this insightful book

**Antonio Gramsci: A Pedagogy to Change the World** Nicola Pizzolato, John D. Holst, 2017-06-12 This volume provides evidence for the argument of a central place of pedagogy in the interpretation of Gramsci s political theory Gramsci s view that every relationship of hegemony is necessarily a pedagogical relationship makes it imperative to dismiss narrow and formal interpretations of his educational theories as applying to schooling only This book argues that what is required rather is an inquiry into the Italian thinker s broad conceptualisation of pedagogy which he thought of as a quintessential political activity central to understanding and transforming society Preceded by a broad introduction that positions Gramsci in his context and in the literature the essays in this book critically revisit the many passages of the Prison Notebooks and pre prison writings where Gramsci addresses the nexus between politics and pedagogy Some essays apply those concepts to specific contexts The book for the first time brings to the attention of an English speaking audience voices from the current historiography in Italy and Latin America We are forced at regular intervals to consider how Gramsci might still be useful in particular national territories in an international context How can we carry on with pessimism of the intelligence but find some basis for optimism of the will From the foreword of Anne Showstack Sassoon Visiting Professor of Politics at the Department of Politics at Birbeck University of London

**Where Do Cities Come From and Where Are They Going To? Modelling Past and Present Agglomerations to Understand Urban Ways of Life** Francesca Fulminante, John William Hanson, Scott G. Ortman, Luis M. A. Bettencourt, 2021-01-25 Over the last decade there has been a surge of interest in urbanization and economic development sparked by the realization that making urban life sustainable is one of the greatest challenges facing us in the 21st century this is now one of the core sustainable development goals of the United Nations This

has exerted considerable pressure on researchers to come up with more scientific ways of studying urbanism and economic activity over the long run which has resulted not only in the development of new theoretical frameworks but also in the collection of vast amounts of data from a range of settings This has led to the realization that although there are significant differences between settlements in different settings there are nonetheless important regularities and commonalities between a diverse group of settlements in range of geographical and historical contexts including both ancient and modern ones This suggests that a common feature of settlements is their ability to generate increased social connectivity greater division of labour and specialization and enhanced technological invention and innovation albeit with costs to levels of equality quality of life and standards of living as well as impacts on the environment which cannot be separated from the emergence of confederations and states and the creation of settlement systems hierarchies and networks We believe that this field of enquiry now stands at a critical juncture Although it is now feasible to talk about many aspects of ancient and modern urbanism with relative confidence such as the numbers of cities or their sizes much of the discussion of these themes within historical and archaeological circles has been on a discursive or qualitative level while it is often difficult to harmonize the different models that have been applied to date into a consistent empirical and theoretical framework A new approach to settlements throughout different contexts should now be within our grasp however thanks to both the ease with which information can be disseminated and the facilities that recent developments in IT offer us to model analyse and statistically test data
