Nolt,2014-12-17 This book offers a completely new and unique introduction to the economics of international relations It treats all the traditional major themes of international relations theory while giving each a refreshing new twist with the incorporation of the influence of private power particularly in the realm of war and peace It reframes the history of the modern global economy and politics by

thoroughly purging the myth of the market a systematic blindness to private power It not only draws on but also illuminates major themes and empirical findings of comparative politics business history business strategy business cycle theory social evolutionary theory as well as the practical wisdom of traders and investors Part one introduces the major concepts of competing theories of international relations emphasizing a unique approach corporatism Part two introduces the critical importance dynamic and oppositional analysis of issues Part three traces the rise of the modern world from the mercantilist period until the rise of modern corporate organizations and the demise of imperialism in the crucible of World War I Part four begins with the origins of the contemporary dominance of business internationalism before and during World War II then analyzes three major facets of the postwar era the unification of much of Europe the industrialization of the Third World and the Cold War and its aftermath The final chapter considers the present and future of a fairly peaceful yet economically unstable world This book presents a refreshing and exciting portrayal of the global economy which challenges every major subject from money to markets to the business cycle This book eschews the economics of dull averages to restore the drama of contending business forces struggling for wealth and in the process influencing war and peace WALNECK'S CLASSIC
