*Cast Upon the Breakers* Alger Horatio,2017-07-15 Orphans Juvenile fiction [The Gospel of Wealth in the American Novel \(Routledge Revivals\)](#) Arun Mukherjee,2015-08-11 Business and the businessman have had a fundamental place in American society since the inception of the nation This tenet the gospel of wealth is a central concern in the novels of Theodore Dreiser and his contemporaries First published in 1987 this study sets this group of writers in their historical context and shows how they elaborated the idea of wealth as an object of quasi religious quest What had previously been associated with disease and darkness avarice and dishonour now came to emblematised the virtues of thrift prudence and diligence The underlying argument is that the dominant group of a society legitimises its power through the appropriation of the vocabulary of religion and the American business leaders were successful in doing this both in their own practice and through the more insidious medium of art A detailed analysis this reissue will be of particular value to students of American literature with an interest in the relationship between linguistic symbols and social order and historical attitudes towards wealth in literature **Mind vs. Money** Alan Kahan,2017-07-12 For the past 150 years Western intellectuals have trumpeted contempt for capitalism and capitalists They have written novels plays and manifestos to demonstrate the evils of the economic system in which they live Dislike and contempt for the bourgeoisie the middle classes industry and commerce have been a prominent trait of leading Western writers and artists *Mind vs Money* is an analytical history of how and why so many intellectuals have opposed capitalism It is also an argument for how this opposition can be tempered Historically intellectuals have expressed their rejection of capitalism through many different movements including nationalism anti-Semitism socialism fascism communism and the 1960s counterculture Hostility to capitalism takes new forms today The anti-globalization Green communitarian and New Age movements are all examples Intellectuals give such movements the

legitimacy and leadership they would otherwise lack What unites radical intellectuals of the nineteenth century communists and fascists of the twentieth and anti globalization protestors of the twenty first along with many other intellectuals not associated with these movements is their rejection of capitalism Kahan argues that intellectuals are a permanently alienated elite in capitalist societies In myriad forms and on many fronts the battle between Mind and Money continues today Anti Americanism is one of them Americans like to see their country as a beacon of freedom and prosperity But in the eyes of many European and American intellectuals when America is identified with capitalism it is transformed from moral beacon into the Great Satan This is just one of the issues Mind vs Money explores The conflict between Mind and Money is the great unresolved conflict of modern society To end it we must first understand it
