Case Studies in Food Engineering J. Peter Clark, 2009-08-12 This volume presents case studies in food engineering It is organized in three broad sections The first concerns processes that are primarily physical such as mixing and the second processes that also involve biochemical changes such as thermal sterilization While the third section addresses some broader issues such as how to tour a plant how to choose among building a new plant expanding or renovating and how to develop processes

Food Process Engineering F. Xavier Malcata, 2020-12-13 Food Process Engineering Safety Assurance and Complements pursues a logical sequence of coverage of industrial processing of food and raw material where safety and complementary issues are germane Measures to guarantee food safety are addressed at start and the most relevant intrinsic and extrinsic factors are reviewed followed by description of unit operations that control microbial activity via the supply of heat supply or the removal of heat Operations prior and posterior are presented as is the case of handling cleaning disinfection and rinsing and effluent treatment and packaging complemented by a brief introduction to industrial utilities normally present in a food plant Key Features Overviews the technological issues encompassing properties of food products Provides comprehensive mathematical simulation of food processes Analyzes the engineering of foods at large and safety and complementary operations in particular with systematic derivation of all relevant formulae Discusses equipment features required by the underlying processes

Case Studies in Food Product Development M Earle, R Earle, 2007-12-18 New product development is vital for the future of the

food industry Many books have been written on NPD theory over the last 40 years but much can still be learnt by studying actual experiences of NPD Case studies in food product development describes specific NPD projects in a variety of industries internationally and also records overall comments written by the very people who have completed the projects Part one outlines new product development in the food industry and part two views product development strategy and management in different companies and organisations Parts three four and five are twelve case studies on respectively the product development process technological development consumer and market research Part six considers product development in practice and the final chapter demonstrates how product developers are being educated The case studies are written by experienced product developers talking openly about experiences with their own products It is hoped that those faced with similar challenges will gain from these real life experiences Mary and Dick are also co authors with Allan Anderson of Food product development which has achieved international success Case studies in food product development is a complement and a practical companion to this book Describes new product development in a variety of international industries Outlines new product development in the food industry and views product management and strategy in different organisations Includes case studies focusing on the product development process technological development and consumer and market research Food Engineering ,1974 *Combat-Ready Kitchen* Anastacia Marx de Salcedo,2015-08-04

Americans eat more processed foods than anyone else in the world We also spend more on military research These two seemingly unrelated facts are inextricably linked If you ever wondered how ready to eat foods infiltrated your kitchen you'll love this entertaining romp through the secret military history of practically everything you buy at the supermarket In a nondescript Boston suburb in a handful of low buildings buffered by trees and a lake a group of men and women spend their days researching testing tasting and producing the foods that form the bedrock of the American diet If you stumbled into the facility you might think the technicians dressed in lab coats and the shiny kitchen equipment belonged to one of the giant food conglomerates responsible for your favorite brand of frozen pizza or microwavable breakfast burritos So you'd be surprised to learn that you've just entered the U S Army Natick Soldier Systems Center ground zero for the processed food industry Ever since Napoleon armies have sought better ways to preserve store and transport food for battle As part of this quest although most people don't realize it the U S military spearheaded the invention of energy bars restructured meat extended life bread instant coffee and much more But there's been an insidious mission creep because the military enlisted industry huge corporations such as ADM ConAgra General Mills Hershey Hormel Mars Nabisco Reynolds Smithfield Swift Tyson and Unilever to help develop and manufacture food for soldiers on the front line over the years combat rations or the key technologies used in engineering them have ended up dominating grocery store shelves and refrigerator cases TV dinners the cheese powder in snack foods cling wrap The list is almost endless Now food writer Anastacia Marx de Salcedo scrutinizes the world of processed food and its long relationship with the military unveiling the twists turns successes failures

and products that have found their way from the armed forces and contractors laboratories into our kitchens In developing these rations the army was looking for some of the very same qualities as we do in our hectic fast paced twenty first century lives portability ease of preparation extended shelf life at room temperature affordability and appeal to even the least adventurous eaters In other words the military has us chowing down like special ops What is the effect of such a diet eaten as it is by soldiers and most consumers day in and day out year after year We don't really know We're the guinea pigs in a giant public health experiment one in which science and technology at the beck and call of the military have taken over our kitchens
