Case Studies in Plant Taxonomy Tod F. Stuessy, 1994 Presents ten case studies and three examples designed to help students learn to make taxonomic judgments Topics include the significance of systematics and classification explanation of the taxonomic hierarchy collection and types of data used and case studies **Plant Taxonomy** Rajni Gupta, 2012-01-01 Prithipalsingh Indian taxonomist contributed articles Case Studies in Paleoethnobotany Deborah Pearsall, 2018-07-06 Case Studies in Paleoethnobotany focuses on interpretation in paleoethnobotany In it the reader is guided through the process of analyzing archaeobotanical data and of using that data to address research questions Part I introduces archaeobotanical remains and how they are deposited preserved sampled recovered and analyzed Five issue oriented case studies make up Part II and illustrate paleoethnobotanical inference and applications A recurrent theme is the strength of using multiple lines of evidence to address issues of significance This book is unique in its explicit focus on interpretation for consumers of paleoethnobotanical knowledge Paleoethnobotanical inference is increasingly sophisticated and contributes to our understanding of the past in ways that may not be apparent outside the field or to all practitioners The case study format allows in depth exploration of the process of interpretation in the context of significant issues that will engage readers No other work introduces paleoethnobotany and illustrates its application in this way This book will appeal to students interested in ancient plant people interrelationships as well as archaeologists paleoethnobotanists and paleoecologists The short methods chapters and topical case studies are ideal for instructors of classes in archaeological methods environmental archaeology and ethnobiology **Case Studies in Biocultural Diversity from Southeast Asia** F. Merlin Franco, Magne Knudsen, Noor Hasharina Hassan, 2022-07-27 This open access book demonstrates the linkages between local languages traditional knowledge and biodiversity at the landscape level in Asia providing a fresh approach to discussions on Asia s biocultural diversity The book carries forward earlier analyses but importantly focuses on traditional ecological calendars folk medicine and folk names in the context of the vital importance of maintaining biological cultural and linguistic diversity It does this by addressing a range of cases and issues in relation to Southeast Asia Brunei Darussalam Indonesia Malaysia the Philippines and North East India The several chapters demonstrate the ways in which the various forms of knowledge of the environment and its categorizations are important in areas such as landscape and resource management and conservation They also demonstrate that environmental knowledge and the practical skills which accompany it are not necessarily widely shared This book sends important messages to those who care about the sustainability of our environment the maintenance of its biocultural diversity or at least the maintenance of what remains of it because much has changed This interdisciplinary collection draws from a wide range of disciplines and is of appeal to students and scholars in anthropology environmental studies geography biodiversity and linguistics Sampling the Green World Tod F. Stuessy, S. H. Sohmer, 1996 Outlining a plan for mapping phytodiversity in the next half century this book focuses on the protocols and procedures for collecting

Stuessy, 2020-07-01 The Juan Fernandez Archipelago is located in the Pacific Ocean west of Chile at 33 S latitude Robinson Crusoe Island is 667 km from the continent and approximately four million years old Alejandro Selkirk Island is an additional 181 km west and only one million years old The natural impacts of subsidence and erosion have shaped the landscapes of these islands resulting in progressive changes to their subtropical vegetation The older island has undergone more substantial changes due to both natural causes and human impacts After the discovery of Robinson Crusoe Island in 1574 people began cutting down forests for lumber to construct boats and homes for firewood and to make room for pastures Domesticated plants and animals were introduced some of which have since become feral or invasive causing damage to the local vegetation The wealth of historical records on these activities provides a detailed chronicle of how human beings use their environment for survival in a new ecosystem This book offers an excellent case study on the impacts that people can have on the resources of an oceanic island *Noble Hardwoods Network* Jozef Turok, G Eriksson, K. Russel, 2002

*Molecular Ecology and Evolution: Approaches and Applications* B. Schierwater, B. Streit, G.P. Wagner, R. DeSalle, 2013-06-29 The past 25 years have witnessed a revolution in the way ecologists and evolutionary biologists approach their disciplines Modern molecular techniques are now reshaping the spectrum of questions that can be addressed while studying the mechanisms and consequences of the ecology and evolution of living organisms *Molecular Ecology and Evolution Approaches and Applications* describes from a molecular perspective several methodological and technical approaches used in the fields of ecology evolution population biology molecular systematics conservation genetics and development Modern techniques are introduced and older more classic ones refined The advantages limitations and potentials of each are discussed in detail and thereby illustrate the widening range of cross field research and applications which this modern technology is stimulating This book will serve as an important textbook for graduate and advanced undergraduate students and as a key reference work for researchers **SIDA, Contributions to Botany**, 1994

**Natural Laws in Scientific Practice** Marc Lange, 2000-06-08 Philosopher of science Marc Lange aims to develop a new account of the roles that laws of nature play in scientific reasoning such as counterfactual conditionals inductive projections and scientific explanations and what those roles imply about the very nature of natural laws Plant Taxonomy and Biosystematics Clive A. Stace, 1989 A concise up to date and fully integrated discussion of present day plant taxonomy

Plant Variation and Evolution David Briggs, S. Max Walters, 2016-06-30 We are in the midst of a biological revolution Molecular tools are now providing new means of critically testing hypotheses and models of microevolution in populations of wild cultivated weedy and feral plants They are also offering the opportunity for significant progress in the investigation of long term evolution of flowering plants as part of molecular phylogenetic studies of the Tree of Life This long awaited fourth

edition fully revised by David Briggs reflects new insights provided by molecular investigations and advances in computer science Briggs considers the implications of these for our understanding of the evolution of flowering plants as well as the potential for future advances Numerous new sections on important topics such as the evolutionary impact of human activities taxonomic challenges gene flow and distribution hybridisation speciation and extinction conservation and the molecular genetic basis of breeding systems will ensure that this remains a classic text for both undergraduate and graduate students in the field The Michigan Botanist, 1999 **Botanical Gardens and Their Role in Plant Conservation** T.

*Conservation and Utilization of Threatened Medicinal Plants* P.E. Rajasekharan, Shabir Hussain Wani, 2020-07-20 Medicinal plants are globally valuable sources of herbal products Plant based remedies have been used for centuries and have had no alternative in the western medicine repertoire while others and their bioactive derivatives are in high demand and have been the central focus of biomedical research As Medicinal plants move from fringe to mainstream with a greater number of individuals seeking treatments free of side effects considerable attention has been paid to utilize plant based products for the prevention and cure of human diseases An unintended consequence of this increased demand however is that the existence of many medicinal plants is now threatened due to their small population size narrow distribution area habitat specificity and destructive mode of harvesting In addition climate change habitat loss and genetic drift have further endangered these unique species Although extensive research has been carried out on medicinal and aromatic plants there is

relatively little information available on their global distribution patterns conservation and the associated laws prevailing This book reviews the current status of threatened medicinal plants in light of increased surge in the demand for herbal medicine It brings together chapters on both wild non cultivated and domestic cultivated species having therapeutic values Thematically conventional and contemporary approaches to conservation of such threatened medicinal plants with commercial feasibility are presented The topics of interest include but not limited to biotechnology sustainable development in situ and ex situ conservation and even the relevance of IPR on threatened medicinal plants We believe this book is useful to horticulturists botanists policy makers conservationists NGOs and researchers in the academia and the industry sectors
