Morgan, Ida Sue Baron, Joseph H. Ricker, 2010-10-29 Casebook of Clinical Neuropsychology features actual clinical neuropsychological cases drawn from leading experts files Each chapter represents a different case completed by a different expert Cases cover the lifespan from child to adult to geriatric and the types of cases will represent a broad spectrum of prototypical cases of well known and well documented disorders as well as some rarer disorders Chapter authors were specifically chosen for their expertise with particular disorders When a practitioner is going to see a child or an adult with X problem they can turn to the case and find up to date critical information to help them understand the issues related to the diagnosis a brief synopsis of the literature the patient s symptom presentation the evaluation including neuropsychological test results and other results from consultants along with treatments and recommendations Clinical cases represent a long established tradition as a teaching vehicle in the clinical sciences most prominently in medicine and psychology Case studies provide the student with actual clinical material data in the form of observations of the patient examination test data relevant history and related test results all of which must be integrated into a diagnostic conclusion and ultimately provide the patient with appropriate recommendations Critical to this educational heuristic process is the opportunity for the reader to view the thought processes of the clinician that resulted in the conclusions and recommendations offered With the science of the disorder as the foundation of this process readers learn how the integration of multiple sources of data furthers critical thinking skills **Trouble in Mind** Jenni Ogden PhD, 2012-02-01 In Trouble in Mind neuropsychologist Jenni Ogden author of Fractured Minds transports the reader into the world of some of her most memorable neurological patients as she explores with compassion insight and vivid description the human side of brain damage These are tales of patients who as the result of stroke brain tumor car crash or neurological disease begin thinking and behaving strangely and with their loved ones support embark on the long journey to recovery acceptance of disability and sometimes death There is Luke the gang member who loses his speech but finds he can still sing his favorite blues number Trouble in Mind and HM who teaches the world about memory and becomes the most studied single case in medical history You will meet Julian who misplaces his internal map of the human body and Melody a singer who risks losing her song when she undergoes brain surgery to cure her epilepsy Then there is Kim with a severe head injury and Sophie who has just enough time to put her house in order before Alzheimer s dementia steals her insight For these and the many other patients whose stories are told in this book the struggle to understand their disordered minds and disobedient bodies takes extraordinary courage determination and patience For health professionals and researchers working with these patients the ethical and emotional challenges can be as demanding as the intellectual and treatment decisions they make daily Trouble In

Mind is written in an accessible narrative style that is both accurate and intimate It will be enjoyed by readers whether students researchers or professionals in mental health and neuroscience patients with neurological disorders and their families or general readers who want to learn more about brain disorders and the doctors who care for those who suffer them

The Neuropsychology Fact-Finding Casebook Kirk J. Stucky PsyD, ABPP, Shane S. Bush PhD, ABPP, 2017-01-04

Formal training in clinical neuropsychology introduces trainees to diverse patient populations with a variety of conditions and disorders Learning to competently apply a structured fact finding approach to case conceptualization differential diagnosis and treatment planning is an essential goal at all levels of training This approach provides a valuable exercise and method of examining practitioner competence The structured approach to case analysis promotes good clinical decision making and exercises based on such an approach can help prepare clinicians for the oral exams that are a part of board certification The Neuropsychology Fact Finding Casebook is a resource for both supervisors and trainees in clinical neuropsychology as well as for clinicians preparing for board certification The volume provides 24 compelling and diverse fact finding cases one for each month of a two year residency Each case is presented in a stepwise fashion presenting problem and referral question background information and patient report behavioral observations and test findings At the end of each case a summary diagnostic impression recommendations and questions are provided to assess reinforce and teach core competencies an outcome section describes what occurred after the full case evaluation is completed and critical teaching points are discussed This Casebook is a standardized approach to fact finding that training programs at various levels can use to help trainees develop such evaluation skills

The Neuropsychology Casebook Donna L. Orsini, Wilfred G. Van Gorp, Kyle B. Boone, 2013-11-11

The Neuropsychology Casebook was developed to fill the existing gap in the current body of literature on clinical neuropsychology Although texts are available that describe neuropsychological tests and others provide information on syndromes this volume provides descriptions of neuropsychological test performance for individuals with various syndromes It was designed to illustrate the process of clinical interpretation of test findings and report writing for the individual case Our aims are to provide both the student and practicing professional with a collection of actual neuropsychological case studies that typify many of the cardinal disorders or syndromes frequently seen by practicing clinical neuropsychologists We have not provided an exhaustive survey of case studies representing many of the disorders commonly seen in neuropsychology rather we have focused on a few select cases that illustrate some of the more common disorders This book includes detailed case reports complete with referral questions historical information relevant neuroradiological findings actual neuropsychological test data and clinical interpretations that take into account all available information on the patient The cases are discussed in the chapter commentaries with reference to how each compares and contrasts with the prototypic case for that disorder or syndrome Such case studies help to highlight the various types of behavioral and cognitive sequelae associated with common clinical disorders The case studies which are examined through

an hypothesis testing approach are also aimed at demonstrating how neuropsychological principles and methods are applied

Neuropsychology of Malingering Casebook Joel E. Morgan, Jerry J. Sweet, 2015-06-12 Clinical neuropsychologists frequently evaluate individuals within a forensic context and therefore must address questions regarding the possible presence of reduced effort response bias and or malingering This volume offers a wide range of instructive real world case examples involving the complex differential diagnosis where symptom exaggeration and or malingering cloud the picture Written by expert forensic neuropsychologists the scenarios described provide informed empirically based and scientifically derived opinions on the topic Issues related to malingering such as response bias and insufficient effort are discussed thoroughly with regard to a large number of clinical conditions and assessment instruments Test data and non test information are considered and integrated by the numerous experts Expert guidance for clinicians who must address the issue of malingering is provided in a straightforward and well organized format To date there has not been a comparable collection of rich case material relevant to forensic practice in clinical neuropsychology

Forensic Neuropsychology Casebook Robert L. Heilbrunner, 2005-06-15 Featuring compelling case presentations from experienced neuropsychologists this volume offers a window into the complexities of conducting forensic assessments and serving as an expert witness Covering both the civil and criminal arenas the contributors demonstrate evidence based procedures for evaluating premorbid functioning competency malingering and other forensic issues Each case includes step by step details on the clinical interview behavioral observations neuropsychological test results and preparation for deposition or courtroom testimony The concluding Ask the Experts section provides a thought provoking Q A on salient professional and ethical issues An ideal format for translating science to practice the casebook yields valuable insights on navigating the twists and turns of the legal system
