[The Legend of Charlemagne in the Middle Ages](#) M. Gabriele, J. Stuckey, 2008-09-29 These essays take advantage of a new exciting trend towards interdisciplinary research on the Charlemagne legend Written by historians art historians and literary scholars these essays focus on the multifaceted ways the Charlemagne legend functioned in the Middle Ages and how central the shared if nonetheless fictional memory of the great Frankish ruler was to the medieval West A gateway to new research on memory crusading apocalyptic expectation Carolingian historiography and medieval kingship the contributors demonstrate the fuzzy line separating fact and fiction in the Middle Ages **Living Memory** Fabio Troncarelli, 2025-03-10 Fabio Troncarelli examines the Late Antique Cassiodorian edition of the Consolation of Philosophy by Boethius in this new study consisting of five chapters The first one offers a brief sketch of the lives of the two protagonists of the story The second concerns the medieval copies of the edition some very close to the original archetype preserving even its formal aspect and the indication of its first transcription in Ravenna in the sixth century The third chapter establishes a comparison between some typical rhetorical philosophical and editorial methods used by Cassiodorus and the ones found in Boethius's edition The fourth chapter explores possible reasons for Cassiodorus's decision to produce such an edition during the years of the collapse of Ostrogothic rule in Italy The final chapter discusses the living memory of Boethius's reputation at Vivarium and the relationships between his murder and Amalsuintha's murder as understood and covertly preserved by the Vivarian monks

[The Publications of the Champlain Society](#), 1977 **History of Computing: Learning from the Past** Arthur Tatnall, 2010-08-13 History of Computing Learning from the Past Why is the history of computing important Given that the computer as we now know it came into existence less than 70 years ago it might seem a little odd to some people that we are concerned with its history Isn't history about old things Computing of course goes back much further than 70 years with many earlier vices rightly being known as computers and their history is of course important It is only the history of electronic digital computers that is relatively recent History is often justified by use of a quote from George Santayana who

famously said that Those who cannot remember the past are condemned to repeat it It is arguable whether there are particular mistakes in the history of computing that we should avoid in the future but there is some circularity in this question as the only way we will know the answer to this is to study our history This book contains papers on a wide range of topics relating to the history of computing written both by historians and also by those who were involved in creating this history The papers are the result of an international conference on the History of Computing that was held as a part of the IFIP World Computer Congress in Brisbane in September 2010

Warfare in Tenth-century Germany

David S. Bachrach,2012 A complete survey of the military campaigns of the early Saxons tactics strategy and logistics demonstrating in particular the sophistication of the administration involved Over the course of half a century the first two kings of the Saxon dynasty Henry I 919 936 and Otto I 936 973 waged war across the length and breadth of Europe Ottonian armies campaigned from the banks of the Oder in the east to the Seine in the west and from the shores of the Baltic Sea in the north to the Adriatic and Mediterranean in the south In the course of scores of military operations accompanied by diligent diplomatic efforts Henry and Otto recreated the empire of Charlemagne and established themselves as the hegemonic rulers in Western Europe This book shows how Henry I and Otto I achieved this remarkable feat and provides a comprehensive analysis of the organization training morale tactics and strategy of Ottonian armies over a long half century Drawing on a vast array of sources including exceptionally important information developed through archaeological excavations it demonstrates that the Ottonian kings commanded very large armies in military operations that focused primarily on the capture of fortifications including many fortress cities of Roman origin This long term military success shows

that Henry I and Otto I building upon the inheritance of their Carolingian predecessors and ultimately that of the late Roman empire possessed an extensive and well organized administration and indeed bureaucracy which mobilized the resources that were necessary for the successful conduct of war David S Bachrach is Associate Professor of History at the University of New Hampshire **General Catalogue of Printed Books to 1955** British Museum.
