Abrams,2019-01-25 Archaeologists and the public at large have long been fascinated by monumental architecture built by past societies Whether considering the earthworks in the Ohio Valley or the grandest pyramids in Egypt and Mexico people have been curious as to how pre modern societies with limited technology were capable of constructing monuments of such outstanding scale and quality Architectural energetics is a methodology within archaeology that generates estimates of the amount of labor and time allocated to construct these past monuments This methodology allows for detailed analyses of architecture and especially the analysis of the social power underlying such projects Architectural Energetics in Archaeology assembles an international array of scholars who have analyzed architecture from archaeological and historic societies using architectural energetics It is the first such volume of its kind In addition to applying architectural energetics to a global range of architectural works it outlines in detail the estimates of costs that can be used in future architectural analyses This volume will serve archaeology and classics researchers and lecturers teaching undergraduate and graduate courses related to social power and architecture It also will interest architects examining past construction and engineering projects      Castles of the Western World Armin Tuulse,2002-01-01 This superb archive focuses on more than 200 structures from temples palaces and walls of ancient Egypt Greece and Rome to Romansque strongholds of the Normans and Gothic edifices of the crusaders and Teutonic knights to lavish palaces built in Italy France England Germany Austria and Scandinavia 240 illustrations including 98 plans and drawings      The English Castle A. Hamilton Thompson,2013-04-10 Once a seat of government as well as the private residence of its owners the medieval castle was also a military base and stronghold for the surrounding geographical area The development of these sturdy fortifications in England during the Middle Ages is carefully examined in this profusely illustrated book From early chapters dealing with primitive earthworks and Roman stations the text goes on to explore the construction of the English castle following the Norman Conquest the beginnings of the stone castle and the Norman keep bastions of the thirteenth century military architecture fortified towns in the later Middle Ages and more Students of architecture military history and medieval studies as well as anyone interested in the evolution of castle construction will find this work a fascinating and valuable reference      **Castles** Sidney

Toy,2013-04-09 Concise scholarly survey traces castle development from ancient roots Nearly 200 photographs and drawings illustrate moats keeps baileys and many other features Caernarvon Castle Dover Castle Hadrian s Wall Tower of London and more 199 black and white illustrations *Castrum to Castle* J. E. Kaufmann,H. W. Kaufmann,2018-10-30 A richly illustrated history of military fortifications in ancient and medieval times For over a thousand years from the time of the Roman Empire to the classic period of castle building in the twelfth and thirteenth centuries fortified sites played a key role in European warfare This highly illustrated history gives a fascinating insight into their design and development and into the centuries of violence and conflict they were part of The study traces the evolution of fortifications starting with those of the Romans and their successors Included are the defenses erected to resist Islamic invasions and Viking raids and the castles built during outbreaks of warfare As the authors demonstrate castles and other fortifications were essential factors in military calculations and campaigns They were of direct strategic and tactical importance wherever there was an attempt to take or hold territory The factors that influenced their location layout and construction are analyzed in this fascinating book as is the way in which they were adapted to meet the challenges of new tactics and weapons **Welsh Castle Builders** John

Marshall,2022-12-02 The Edwardian castles of north Wales were built by a Savoyard master mason but also by many other artisans from Savoy What is more extraordinary is that the constables of Flint Rhuddlan Conwy and Harlech were also Savoyards the Justiciar and Deputy Justiciar at Caernarfon were Savoyards and the head of the English army leading the relief of the sieges of Flint and Rhuddlan was a future Count of Savoy The explanatory story is fundamentally of two men the builder of castles Master James of St George and Justiciar Sir Othon de Grandson and the relationship of these two men with King Edward I But it is also the story of many others a story that begins with the marriage of Alianor de Provence to Edward s father Henry III and the influx of her kinsmen to England such as Pierre de Savoie It is impossible to understand the development of the castles in north Wales without an understanding of the Savoyards where they came from and their impact on English and Welsh history The defining work of Arnold Taylor in exploring the Savoyard history of Welsh castles is now many years past and mostly out of print it is time for the story to be revisited and expanded upon in the light of new evidence

*Castle to Fortress* J. E. Kaufmann,H. W. Kaufmann,2019-07-30 The authors of *Castrum to Castle* trace the evolution of defensive architecture at the turn of the late Middle Ages and the beginning of the Renaissance Old Barbed Wire Blog Across western Europe the long tradition of castle building took on its most sophisticated form in the later Medieval period and then in response to the development of gunpowder weapons it underwent a fundamental change from castle to fortress This the second volume of a highly illustrated new study of medieval fortification gives a fascinating insight into the last great age of castles and the centuries of violence and conflict they were part of It traces the advances made between the twelfth and the fifteenth centuries looking in particular at the form these fortifications took in contexts as different as Italy Wales France and the Iberian Peninsula Many would regard this period in the history of castles as the classic age It was followed by a phase of

relative decline as the conditions of warfare changed and castles had to be adapted to cope with cannon The conventional castle gave way to new styles of fortification But as the authors demonstrate they were still essential factors in military calculations and campaigns they were of direct strategic and tactical importance wherever there was an attempt to take or hold territory A fascinating treatise on the way such buildings were modified to provide protection from growing threats
