Freshwater Ecosystems Of The Himalaya:

Freshwater Ecosystems of the Himalaya Ashok K. Pandit, 1999 Freshwater Ecosystems of the Himalaya A.K.

Pandit, 1998-12-15 This is a graduate level textbook and reference book that evaluates in detail all the interrelated aspects of freshwater ecosystems. It uses data drawn from research in the physical, chemical, biological, and socioeconomic sciences and focuses on wetlands and the Dal Lake ecosystem in the Kashmir to as representative of areas currently threatened by eutrophication and over exploitation as a result of increasing human pressures. The book contains ten major chapters dealing with the geology and climate of the Kashmir valley, abiotic and biotic components of wetland ecosystems, the physico-chemical nature of lake systems, primary and secondary producers, ecosystem processes, macrophytes, human use of freshwater ecosystems, and freshwater ecosystem threats, management and conservation. Includes bibliographic references and index.

Biodiversity of Freshwater Ecosystems Suhaib A. Bandh, Basharat Mushtaq, Mohammad Farooq Mir, Shahid A.

Wani, 2022-12-22 This new volume examines the ecological importance, threats, protection, and management of the biodiversity of freshwater ecosystems such as lakes, ponds, rivers, streams, reservoirs, pools, and wetlands. As populations have been increasing exponentially, humans are using freshwater ecosystems severely, resulting in habitat destruction and breakdown. Environmental contamination, climate change, the introduction of harmful and invasive organisms, unplanned dredging and de-weeding processes, disposal of sewer systems in freshwater bodies, and badly planned water diversions are the leading causes of habitat loss in freshwaters. These impacts have led to significant decreases in the numbers and productivity of many freshwater species and decreased biodiversity in freshwater. This book presents a selection of primary research and review papers on several freshwater aquatic biodiversity studies which involve evaluating plants, macroinvertebrates, macrophytes, benthic zones, and fish diversity in freshwater ecosystems. It provides an abundance of new information on freshwater biodiversity distribution, status, and patterns. Key features: Discusses the importance, threats, and management of biodiversity of freshwater ecosystems. Provides detailed coverage of modern and updated techniques used in the evaluation and conservation of freshwater biodiversity. Looks at the impact of pesticides, pollution on freshwater environs, and on aquatic and terrestrial life. Reviews how global climate change affects freshwater biodiversity. Biodiversity of Freshwater Ecosystems: Threats, Protection, and Management promotes the enhancement and strengthening of freshwater protection and its unique biodiversity for scientists, policymakers, scholars, researchers, NGOs, and the public, providing necessary background knowledge and practical tools to help manage aquatic ecosystems and their biodiversity in a holistic manner.

Freshwater Fishes of the Eastern Himalayas Waikhom Vishwanath, 2021-07-23 Freshwater Fishes of the Eastern Himalayas provides a guide to describe the internationally accepted methods used in the accurate identification of fishes: morphometry i.e. body proportions, meristics i.e. counts of countable characters viz. scales, fin rays, pores, vertebrae etc. characters of bones wherever necessary, special characters viz. serrations of fin spines, axillary lobes, lobes, color patterns etc.

All the available taxa of the region are covered making this an essential reference that provides the original description of genera and species. Diagnostic characters in the book can be easily examined by an unaided eye or by a binocular dissecting microscope with transmitted light. Provides diagnostic characters which are unique for a species or a combination of characters to differentiate each species from its congeners. Includes both verbal and technical aspects along with color illustrations of the particular part of the fish showing the distinguishing character. Presents diagnostic characters, illustrations or images of the fish and of its parts showing the unique character and distribution to make it easy for species identification.

Biodiversity of the Himalaya: Jammu and Kashmir State Ghulam Hassan Dar, Anzar A. Khuroo, 2020-02-26 The Himalaya a global biodiversity hotspot sustains about one fifth of the humankind. Nestled within the north western mountain ranges of the Himalaya, the Jammu and Kashmir J K State harbours more than half of the biodiversity found in the Indian Himalaya. The wide expanse of State spread across the subtropical Jammu through the temperate Kashmir valley to the cold arid Ladakh is typical representative of the extensive elevational and topographical diversity encountered in the entire Himalaya. This book the most comprehensive and updated synthesis ever made available on biodiversity of the J K State is a valuable addition to the biodiversity literature with global and regional relevance. The book arranged into 7 parts comprises of 42 chapters contributed by 87 researchers each of whom is an expert in his/her own field of research. The precious baseline data contained in the book would form the foundation for assessing current status of knowledge about the bioresources, identify the knowledge gaps and help prioritization of conservation strategies to steer the sustainable use of biodiversity in this Himalayan region. Given the breadth of topics covered under the banner of biodiversity in this book, it can surely serve as a model for documentation of biodiversity in other regions of the world. The book will be of immense value to all those who directly or indirectly have to deal with biodiversity including students, teachers, researchers, naturalists, environmentalists, resource managers, planners, government agencies, NGOs and the general public at large.

Biodiversity of the Himalaya Rajesh Kumar, Suresh Kumar, 2025-10-28 This new two volume set pays tribute to the incredibly diversified Himalaya. It presents and assesses the various threats and challenges to Himalayan biodiversity, documenting the multifaceted approaches for conservation and sustainable management of biological resources in the Himalayan region. Volume 2 focuses on the utilization, conservation and management of animal resources in the Himalayan region. It covers traditional knowledge of insects and animals for food and medicinal purposes and discusses adverse changing climatic conditions, the overuse of chemical and synthetic pesticides, ecotourism, wildlife tourism and hunting tourism, radiation from cell phone towers, invasive alien animal and plant species, habitat destruction etc and how they impact the region. Sustainable mitigation and conservation strategies are described as well, offering hope for preservation of the rich biodiversity of the Himalaya. Volume 1 Utilization, Conservation and Management of Plant Resources focuses on the flora of the area, exploring the diversity.
