Multilingualism in the Middle Ages and Early Modern Age Albrecht Classen, 2016-09-12 Bi and multilingualism are of great interest for contemporary linguists since this phenomenon deeply reflects on language acquisition language use and sociolinguistic conditions in many different circumstances all over the world Multilingualism was however certainly rather common already if not especially in the premodern world For some time now research has started to explore this issue through a number of specialized studies The present volume continues with the investigation of multilingualism through a collection of case studies focusing on important examples in medieval and early modern societies that is in linguistic and cultural contact zones such as England Spain the Holy Land but also the New World As all contributors confirm the numerous cases of multilingualism discussed here indicate strongly that the premodern period knew considerably less barriers between people of different social classes cultural background and religious orientation But we also have to acknowledge that already then human communication could fail because of linguistic hurdles which prevented mutual understanding in religious and cultural terms

Narrating Law and Laws of Narration in Medieval Scandinavia

Roland Scheel, 2020-01-20 Disputes lie at the heart of the sagas Consequently literary texts have been treated as sources of legal practice narrations of law while the sagas themselves and the handling of legal matters by the figures adhere to laws of narration The volume addresses this intricate relationship between literature and social practice from the perspective of historians as well as philologists The contributions focus not only on disputes and their solution in saga literature but also on the representation of law and its history in sagas and Latin historiography from Scandinavia as well as the representation of laws and norms in mythological texts They demonstrate that narrations of law provide an indispensable insight into legal culture and its connection to a wider framework of social norms adjusting the impression given by the laws The philological approaches underline that the narrative texts also have an agenda of their own when it comes to their representation of law providing a mirror of conduct criticising inequity reinforcing the political and juridical position of kings or negotiating norms in mythological texts Altogether the volume underlines the unifying force exerted by a common fiction of law beyond its letter

Die deutschen Dominikaner und Dominikanerinnen im Mittelalter Sabine von Heusinger, Elias H.
