Bracey, 2015-05-12 General Daniel Chappie James Jr USAF fought in three American wars and became the first African American to attain the rank of four star general in the United States Armed Forces He was a talented military leader an excellent orator and an advocate for equal rights for blacks in the military James was once one of the most powerful men in the world and today he is often classed with such great American generals as Patton MacArthur and Pershing This biography explores James s life and assesses his place in American military history From his childhood through his role and service in World War II Korea and Vietnam the book traces his personal and career development his influences and his climb through the military ranks Photographs of James are included as well as detailed bibliographical information at the end of each chapter *Air Force Chaplains, 1971-1980* John Eliot Groh, 1986 **Federal Register**, 1983-08-08 *Torture and Democracy* Darius Rejali, 2009-06-08 This is the most comprehensive and most comprehensively chilling study of modern torture yet written Darius Rejali one of the world s leading experts on torture takes the reader from the late nineteenth century to the aftermath of Abu Ghraib from slavery and the electric chair to electrocution in American inner cities and from French and British colonial prison cells and the Spanish American War to the fields of Vietnam the wars of the Middle East and the new democracies of Latin America and Europe As Rejali traces the development and application of one torture technique after another in these settings he reaches startling conclusions As the twentieth century progressed he argues democracies not only tortured but set the international pace for torture Dictatorships may have tortured more and more indiscriminately but the United States Britain and France pioneered and exported techniques that have become the lingua franca of modern torture methods that leave no marks Under the watchful eyes of reporters and human rights activists low level authorities in the world s oldest democracies were the first to learn that to scar a victim was to advertise iniquity

and invite scandal Long before the CIA even existed police and soldiers turned instead to clean techniques such as torture by electricity ice water noise drugs and stress positions As democracy and human rights spread after World War II so too did these methods Rejali makes this troubling case in fluid arresting prose and on the basis of unprecedented research conducted in multiple languages and on several continents begun years before most of us had ever heard of Osama bin Laden or Abu Ghraib The author of a major study of Iranian torture Rejali also tackles the controversial question of whether torture really works answering the new apologists for torture point by point A brave and disturbing book this is the benchmark against which all future studies of modern torture will be measured **Philippines, Post Report** ,1985 The Strategist
