Political Power and Economic Inequality Charles F. Andrain,2014-02-14 Political Power and Economic Inequality offers a balanced comparative analysis of worldwide income inequality Charles F Andrain explores the ways that government institutions political parties private corporations labor unions and protest movements influence public programs How do these organizations mobilize resources so that their preferences become government decisions What impact do these policies have on different geographic regions occupations ethnic religious groups and genders Drawing on comprehensive worldwide data the author highlights the similarities and differences among nations By focusing on global trends he explains the connections that link domestic conditions with foreign trade overseas investment labor migration and communications media Andrain argues that the globalization of income inequality explains contemporary political life in the United States as well as in other parts of the world To fully understand global income distribution we need to grasp how historical changes affect these trends why social movements stage protests against the growing income gap and how a comparative approach best explains income differences Andrain s tightly written interdisciplinary study stresses the impact of this problem on political life and social change in the United States Europe Asia and Latin America The comparative evidence probes the full dynamics of this controversial issue and its consequences for society as a whole      Tools for Constructing Chronologies Caitlin E. *Liberalism's Last Man* Vikash Yadav,2023-08-23 A modern reframing of Friedrich Hayek s most famous work for the 21st century Friedrich Hayek s *The Road to Serfdom* was both an intellectual milestone and a source of political division spurring fiery debates around capitalism and its discontents In the ensuing discord Hayek s true message was lost liberalism is a thing to be protected above all else and its alternatives are perilous In *Liberalism s Last Man* Vikash Yadav revives the core of Hayek s famed work to map today s primary political anxiety the tenuous state of liberal meritocratic capitalism particularly in North America Europe and Asia in the face of strengthening political capitalist powers like China Vietnam and Singapore As open societies struggle to match the economic productivity of authoritarian capitalist economies the promises of a meritocracy fade Yadav channels Hayek to articulate how liberalism s moral backbone is its greatest defense against repressive social structures      **Catalogue of Title-entries of Books and Other Articles Entered in the Office of the**
