

- e) Click NEXT to move to Step 25. Label these structures in the dose-up view: **Heart Stomach Liver Fat Body**

- f) Click NEXT to move to Step 28. The fat bodies, heart and liver have been removed to expose the lungs (small, dark, spongy organs) and the gall bladder (a round sac-like structure). Label these structures below:

Lungs
Gall Bladder
Stomach
Intestine

- g) Click NEXT to move to the Step 30 (the final step). The stomach and intestines have been removed to expose the kidneys at the back of the abdominal cavity and two small light, bean-like structures (the Testes). Label these structures on the diagram: **Kidneys Testes**

Is the frog shown male or female? _____

Activity 3: On the diagram below, label all the indicated organs:

[4 marks]

Heart
Lung
Stomach
Gall Bladder
Liver
Small Intestine
Large Intestine
Cloaca (similar to the anus)

Manual and Dissection Guide of the Frog Fred Bohensky, 2002 The Bohensky Dissection Series has been used successfully by more than 300 000 biology students nationwide Each book in the series is designed to guide the student through the study of anatomical structures The books do this through the use of clearly marked photographs and illustrations Accompanying text offers the student both easy to follow dissection instructions and factual information about the section under observation At the end of each chapter there are tests that can be used for self study or for grade course evaluation Within the traditional dissection portion of a biology course many programs include the sheep heart eye and brain Within many of these guides the author has incorporated photographs of these structures to more closely follow standard course curriculum The author also provides important information on human organs such as the eye ear and heart In this way the student can better understand the role and function of these organs as they relate to human life processes Add to this each book s large size format lay flat spiral binding and reasonable cost and you can see why the Bohensky Dissection Series has become one of the most successful dissection guides used throughout this country s schools **Laboratory Guide for the Study of the Frog** Bertram Garner Smith, 2015-06-27 Excerpt from Laboratory Guide for the Study of the Frog For the introductory study of the structure and physiology of a typical vertebrate there is no form better adapted than the common frog The present course is based largely on the well known works of Huxley Marshall and Holmes the author s task has been mainly that of simplification and adaptation primarily to meet the needs of his own students These directions are the outcome of eight years experience in teaching the biology of the frog in the University of Michigan Syracuse University the University of Wisconsin and the Michigan State Normal College the author is naturally much indebted to his former teachers and associates particularly to Prof S J Holmes As a general rule the order of topics in the text should be followed since it is planned to give a distinct picture of each organ system in its relation to the whole with the greatest economy of time and material For pedagogical reasons an exception should be made in the case of certain histological topics it seems best to begin the microscopical work with the study of some simple tissues such as the stratum corneum cartilage and perhaps also blood connective tissue and unstriated muscle fiber before attempting the study of cross sections of such complex structures as the alimentary canal and the kidney By following the sequence of topics in this manual all the study of gross anatomy excepting the work on the circulatory system and the skeleton may be done with a single specimen In connection with the laboratory work the student should read the corresponding portions of Holmes Biology of the Frog As a rule the reading on a given topic should follow rather than precede the laboratory study of that topic In case time is limited the work may be shortened by a judicious omission of topics The chapters on the eye and the ear the thyroid glands and even the skeleton and the muscles may be omitted without serious detriment to the remainder of the work In case material is limited an entire frog may be saved for each student by omitting the special dissection of the venous system About the Publisher Forgotten Books

publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
