*China and the Future of Globalization* U.S.-China Economic and Security Review Commission,2005

*The Changing Dynamics of the Relations among China, Taiwan, and the United States* Cal Clark,Janet Clark,2011-01-18 Ever since Chiang Kai shek and his Kuomintang evacuated to Taiwan at the end of the Chinese Civil War in 1949 China and Taiwan have been divided by a fundamental and irreconcilable sovereignty dispute over Taiwan s international status In addition the United States has played a central role in the rivalry between Beijing and Taipei Despite the immutable nature of this sovereignty dispute between China and Taiwan the triangular relations among Beijing Taipei and Washington have changed quite considerably over time Over the last three decades for example relations in the Taiwan Strait were fairly tranquil during the 1980s and early 1990s became much tenser from 1995 to 2008 and then reverted to amicable relations among China Taiwan and the United States after the election of a new Taiwanese President in 2008 This book seeks to understand and analyze the relations among China Taiwan and the United States in the early twenty first century In particular it explores what causes change in the relations among Beijing Taipei and Washington and how stable the new era is likely to be Consequently special emphasis is placed on the factors promoting

change or stability in the interactions among these three countries and upon the policy choices facing their governments The major topics include the dynamics of the strategic triangle that defines cross Strait relations Chapters 2 to 4 and 8 the domestic politics and policies of Taiwan and China Chapters 3 to 8 and the growing economic integration across the Taiwan Strait Chapters 9 to 12 Overall the future of this trilateral relationship appears to be fairly open ended Despite the current rapprochement the ultimate goals of China and Taiwan remain incompatible cross Strait relations remain a viciously polarizing issue in Taiwan s domestic politics and there is profound scholarly disagreement over the broader implications of the growing economic ties across the Strait

*China's Growth* Wojciech Maliszewski, Ms. Longmei Zhang, 2015-05-27 The paper analyzes the recent growth dynamics in China evaluating both cyclical positions and long term growth prospects The analysis shows that financial cycles play a more important role than traditional inflation based cycles in shaping the dynamics of growth Currently the finance neutral gap our measure of the financial cycle is large and positive reflecting imbalances accumulated in the economy since the Global Financial Crisis A period of slower growth is therefore both likely and needed in the near term to restore the economy to equilibrium In the medium term growth will slow as China moves closer to the technology frontier but a steadfast implementation of reforms can ensure that China follows the path of the Asia Tigers and achieves successful convergence to high income status
