From Darwin To Hitler Evolutionary Ethics Eugenics And Racism In Germany:

From Darwin to Hitler R. Weikart, 2016-09-27 In this work Richard Weikart explains the revolutionary impact Darwinism had on ethics and morality He demonstrates that many leading Darwinian biologists and social thinkers in Germany believed that Darwinism overturned traditional Judeo Christian and Enlightenment ethics especially the view that human life is sacred Many of these thinkers supported moral relativism yet simultaneously exalted evolutionary fitness especially intelligence and health to the highest arbiter of morality Darwinism played a key role in the rise not only of eugenics but also euthanasia infanticide abortion and racial extermination This was especially important in Germany since Hitler built his view of ethics on Darwinian principles not on nihilism *Racial Science in Hitler's New Europe, 1938-1945*

Anton Weiss-Wendt, Rory Yeomans, 2020-04-01 In *Racial Science in Hitler's New Europe 1938-1945* international scholars examine the theories of race that informed the legal political and social policies aimed against ethnic minorities in Nazi dominated Europe The essays explicate how racial science preexisting racist sentiments and pseudoscientific theories of race that were preeminent in interwar Europe ultimately facilitated Nazi racial designs for a New Europe The volume examines racial theories in a number of European nation states in order to understand racial thinking at large the origins of the Holocaust and the history of ethnic discrimination in each of those countries The essays by uncovering neglected layers of complexity diversity and nuance demonstrate how local discourse on race paralleled Nazi racial theory but had unique nationalist intellectual traditions of racial thought Written by rising scholars who are new to English language audiences this work examines the scientific foundations that central eastern northern and southern European countries laid for ethnic discrimination the attempted annihilation of Jews and the elimination of other so called inferior peoples *From a "Race of Masters" to a "Master Race": 1948 to 1848 A.E.*

Samaan, 2020-11-09 Nazism remains an enigma Historians do not know whether to slot Nazism as a phenomenon of the political right or left largely because of a misunderstanding of how central eugenics was to the regime Eugenics or racial hygiene was at the core of National Socialism's domestic policy foreign policy culture wars and even Hitler's obsession with cars highways and city planning Thus no coherent understanding of the regime is possible without first grasping the nature of eugenics Eugenics did not originate with Nazi Germany It was the culmination of a worldwide movement that was widely accepted by the global scientific and academic community This book traces the origins of the Nazi eugenics state working backward down the timeline tracing from leaf down to the root We investigate this 100 year trajectory from its beginnings in British and American Academia delving into the conveniently forgotten inner workings of a scientific era uncovering previously unpublished manuscripts professional correspondence and conveniently forgotten publications With the centenary of The Holocaust looming uprooting the web of professional connections that engendered this movement is in order The seeds of Holocaust denial take root and prosper with misinformation Clarity and transparency are imperative as they leave no room for denial theories that would deprive the victims of justice or rob the

Breeding Contempt Mark A. Largent, 2011 From the Publisher Most closely associated today with the Nazis and World War II atrocities eugenics is sometimes described as a government orchestrated breeding program other times as a pseudo science and often as the first step leading to genocide Less frequently is it depicted as a movement having links to America a nation that has historically prided itself for its scientific rationality But eugenics does have a history in the United States a history that is largely the story of biologist Charles Davenport Davenport who led the Eugenics Records Office in the late nineteenth century provided physicians social scientists and lawmakers with the scientific data and authority that enabled them to coercively sterilize men and women who were thought to be socially deviant unfit to pass on their genes and unable to raise healthy children Moreover Mark A Largent shows how even in modern times remnants of eugenics philosophies persist in this country as certain public figures advocate a brand of birth control such as progesterone shots for male criminals that are only steps away from the castrations that were once performed

Evidences for God and His Creations: Nature, the Flood, and the Bible Dr. T. J. Tofflemire, 2011-07-21 This book provides summary apologetics from about 200 references It is unique in that many authors with differing viewpoints are put together in brief key point summaries Some of the books covered are 1100 pages long The original authors views are briefly integrated and compared The different views of creation are also discussed and compared and given an open minded weighing Are you concerned about the fact that 70% of our youth no longer attend church and do not have a biblical world view The naturalistic or humanistic world view they adopt from schooling favors the following

- 1 Man evolved from primates and is a biological machine with no purpose
- 2 There is no source of true morals and thus morals are relative and determined by whatever a given group decides or whatever is most popular
- 3 Since man is only an animal there is no basis for individual human rights only rights for the masses

There are some good arguments provided in the book to counter all of this and provide a biblical world view These arguments are brief and easy to share in witnessing situations

Social Democracy in the Making Gary Dorrien, 2019-04-23 An expansive and ambitious intellectual history of democratic socialism from one of the world's leading intellectual historians and social ethicists The fallout from twenty years of neoliberal economic globalism has sparked a surge of interest in the old idea of democratic socialism a democracy in which the people control the economy and government no group dominates any other and every citizen is free equal and included With a focus on the intertwined legacies of Christian socialism and Social Democratic politics in Britain and Germany this book traces the story of democratic socialism from its

birth in the nineteenth century through the mid 1960s Examining the tenets on which the movement was founded and how it adapted to different cultural religious and economic contexts from its beginnings through the social and political traumas of the twentieth century Gary Dorrien reminds us that Christian socialism paved the way for all liberation theologies that make the struggles of oppressed peoples the subject of redemption He argues for a decentralized economic democracy and anti imperial internationalism

Why War? Richard Overy, 2024-06-04 An Economist Best Book of 2024 Why has war been such a consistent presence throughout the human past A leading historian explains drawing on rich examples and keen insight Richard Overy is not the first scholar to take up the title question In 1931 at the request of the League of Nations Albert Einstein asked Sigmund Freud to collaborate on a short work examining whether there was a way of delivering mankind from the menace of war Published the next year as a pamphlet entitled Why War it conveyed Freud's conclusion that the death drive made any deliverance impossible the psychological impulse to destruction was universal in the animal kingdom The global wars of the later 1930s and 1940s seemed ample evidence of the dismal conclusion A preeminent historian of those wars Overy brings vast knowledge to the title question and years of experience unraveling the knotted motivations of war His approach is to separate the major drivers and motivations and consider the ways each has contributed to organized conflict They range from the impulses embedded in human biology and psychology to the incentives to conflict developed through cultural evolution to competition for resources conflicts stirred by the passions of belief the effects of ecological stresses the drive for power in leaders and nations and the search for security The discussions show remarkable range delving deep into the Neolithic past through the twentieth century world wars and up to the current conflict in Ukraine The examples are absorbing from the Roman Empire's voracious appetite for resources to the impulse to power evident in Alexander the Great Napoleon and Hitler The conclusion is not hopeful but Overy's book is a gift to readers a compact judicious engrossing examination of a fundamental question

The main theme of volume 4 of *Eco ethica* is Ethics and Politics In the first and second part the authors examine the sometimes conflictual relationship between ethics and politics from an eco ethical perspective They investigate how our conceptions of both ethics and politics have been shaped historically as well as by today's technological conjuncture The third part continues the discussion of French philosopher Paul Ricoeur 1913 2005 begun in volume 3 The essays here focus on how his conception of the connections and differences between ethics and politics led him to embrace certain paradoxes in politics and forced him to become suspicious of apolitical thinking Germany and the Modern World, 1880-1914 Mark Hewitson, 2018-07-05 The German Empire before 1914 had the fastest growing economy in Europe and was the strongest military power in the world Yet it appeared from a reading of many contemporaries accounts to be lagging behind other nation states and to be losing the race to divide up the rest of the globe This book is an ambitious re assessment of how Wilhelmine Germans conceived of themselves and the German Empire's place in the world in the lead up to the First World War Mark Hewitson re examines the varying forms of national identification allegiance and politics following the creation and consolidation of a German nation state in light of contemporary debates about modernity race industrialization colonialism and military power Despite the new claims being made for the importance of empire to Germany's development he reveals that the majority of transnational networks and contemporaries interactions and horizons remained intra European or transatlantic rather than truly global The Philosophy of Human Evolution Michael Ruse, 2012-01-12 Provides a unique discussion of human evolution from a philosophical viewpoint covering such issues as religion race and gender **The Mirage of Dignity on the Highways of Human 'Progress'** Lukman Harees, 2012-01-16 The Modern Man is hypocritically boasting of unprecedented material progress in a world where inter alia millions daily go to bed hungry die or get killed through unwanted wars and preventable causes live in inhumane conditions vulnerable being exploited with ever widening inequality and might still ruling over right in international relations even in the post UDHR era an indictment on the collective conscience of mankind Besides the flame of materialism has been devouring time tested moral values causing chaos within the basic unit in society the family and relegating Man and his dignity to the level of animals and even manipulating his identity Therefore questions arise Is Moral law fading are political economic systems and institutions like UN failing in realizing the lofty goal of affording due dignity basic rights and social justice humanity deserves Can the bystanders be mere onlookers anymore This book seeks to dispassionately survey the yawning gap between the rhetoric and the ground reality in bringing about dignity and social justice for humanity from bystanders perspective in the light of these questions and underlines the imperative need for moral progress to go hand in hand to make Man assume his due role as the trustee on earth It also exhorts bystanders to close ranks as human dignity champions rights defenders identity protectors against onslaughts from power hungry politicians mighty powers and vested interests This is the need of the times and what
