Human Liberation Ananta Kumar Giri, 2014-11-01 Human liberation has become an epochal challenge in today's world requiring not only emancipation from oppressive structures but also from the oppressive self. It is a multidimensional struggle and aspiration in which knowledge, self, social and spiritual can play a transformative role. Knowledge and Human Liberation Towards Planetary Realizations undertakes such a journey of transformation and seeks to rethink knowledge vis-à-vis the familiar themes of human interest, critical theory, enlightenment, ethnography, democracy, pluralism, rationality, secularism and cosmopolitanism. Philosophy of Social Science Ted Benton, Ian Craib, 2023-02-09 Philosophers and social scientists share a common goal to explore fundamental truths about ourselves and the nature of the world in which we live. But in what ways do these two distinct disciplines inform each other and arrive at these truths? This third revised edition of this highly regarded text directly responds to such issues as it introduces students to the philosophy of social science. This classic text has been brought up to date with a new introduction and commentaries reflecting on the original chapters in the context of more recent developments. Two brand new chapters discuss critical social science and one of the most pressing issues concerning social scientists today: how we interrogate human society's complex relationship with nature and its impact on biodiversity and climate change. The book clearly introduces the theoretical underpinnings of social science assuming no prior knowledge. Addresses critical issues relating to the nature of social science. Interrogates the relationship between social science and natural science. Encompasses traditional and contemporary perspectives. Introduces and critiques a wide range of approaches from empiricism and positivism to post-structuralism and rationalism. Written in an engaging and student-friendly style, the book introduces key ideas and concepts while raising questions and opening debates. A cornerstone text in the Traditions in Social Theory series, this book remains essential reading for all students of social theory and social science research.

African-American Perspectives on Biomedical Ethics Harley Flack, Edmund D. Pellegrino, 1992 By analyzing the amalgam of Greek philosophy, Jewish and Christian teachings and secular humanism that composes our dominant ethical

system the authors of this volume explore the question of whether or not Western and non Western moral values can be commingled without bilateral loss of cultural integrity They take as their philosophical point of departure the observation that both ethical relativism and ethical absolutism have become morally indefensible in the context of the multicultural American life and they variously consider the need for an ethical middle ground *A Pluralist Theory of the Mind* David Ludwig, 2015-10-22 This book challenges common debates in philosophy of mind by questioning the framework of placement problems in contemporary metaphysics The author argues that placement problems arise when exactly one fundamental ontology serves as the base for all entities and will propose a pluralist alternative that takes the diversity of our conceptual resources and ontologies seriously This general pluralist account is applied to issues in philosophy of mind to argue that contemporary debates about the mind body problem are built on this problematic framework of placement problems The starting point is the plurality of ontologies in scientific practice Not only can we describe the world in terms of physical biological or psychological ontologies but any serious engagement with scientific ontologies will identify more specific ontologies in each domain For example there is not one unified ontology for biology but rather a diversity of scientific specializations with different ontological needs Based on this account of scientific practice the author argues that there is no reason to assume that ontological unification must be possible everywhere Without this ideal the scope of ontological unification turns out to be an open empirical question and there is no need to present unification failures as philosophically puzzling placement problems *Things New and Old Relative to Life: Being Sermons on Different Subjects* Thomas Hughes (of Market Rasen.), 1871

Language and Reality Kanti Lal Das, Jyotish Chandra Basak, 2006 Language is always directed to Reality whatever its nature may be The valuable articles incorporated in this book examine the following questions in particular What is relation between Language and Reality What are different dimensions of Reality Can all types of Reality be expressed through language Can the relation between Language and Reality be explained as internal or external Can meaning of Language be equated with its existence All the contributors of this Volume have discussed at length the relation between Language and Reality from the Eastern as well as Western perspectives This volume is the result of intensive and matured thinking of the scholars working in this field for a longer period of time *Indian Philosophy in English* Nalini Bhushan, Jay L. Garfield, 2011-08-26 This book publishes for the first time in decades and in many cases for the first time in a readily accessible edition English language philosophical literature written in India during the period of British rule Bhushan s and Garfield s own essays on the work of this period contextualize the philosophical essays collected and connect them to broader intellectual artistic and political movements in India This volume yields a new understanding of cosmopolitan consciousness in a colonial context of the intellectual agency of colonial academic communities and of the roots of cross cultural philosophy as it is practiced today It transforms the canon of global philosophy presenting for the first time a usable collection and a systematic study of Anglophone Indian philosophy Many historians of Indian philosophy see a radical

disjuncture between traditional Indian philosophy and contemporary Indian academic philosophy that has abandoned its roots amid globalization This volume provides a corrective to this common view The literature collected and studied in this volume is at the same time Indian and global demonstrating that the colonial Indian philosophical communities were important participants in global dialogues and revealing the roots of contemporary Indian philosophical thought The scholars whose work is published here will be unfamiliar to many contemporary philosophers But the reader will discover that their work is creative exciting and original and introduces distinctive voices into global conversations These were the teachers who trained the best Indian scholars of the post Independence period They engaged creatively both with the classical Indian tradition and with the philosophy of the West forging a new Indian philosophical idiom to which contemporary Indian and global philosophy are indebted

The Ends of Philosophy of Religion T. Knepper, 2013-08-20 Knepper criticizes existing efforts in the philosophy of religion for being out of step with and therefore useless to the academic study of religion then forwards a new program for philosophy of religion that is in step with and therefore useful to the academic study of religion

Working with Parents and Families in Early Childhood Education Ute Ward, Bob Perry, 2020-05-21 This book reports initiatives to listen to parents and families to ascertain what families believe and do as they seek to engage collaboratively with their children s educators and what educators and educational systems might do to facilitate and or establish barriers to such engagement Parental engagement in children s learning and development has many positive benefits However in the current environments of accountability and performativity which are pervading early childhood education in many countries the opportunities for parents and other family members to be part of the development of respectful collaborative relationships with their children s early childhood educators are becoming more and more restricted Many educators feel forced to choose between curriculum outcomes and parental engagement as both involve their time There is a danger that the voices of parents and families in their children s early learning and development will not always be heard seen or fully understood This volume addresses this important issue Researchers educators and families will all benefit from this book to the ultimate benefit of the young children who are the future This book was originally published as a special issue of the European Early Childhood Education Research Journal
