From Elections to Democracy Susan Rose-Ackerman, 2005 The countries of Central Europe in the first round for admission to the European Union have all established constitutional electoral democracies and market economies However much remains to be done to achieve fully consolidated democratic states This study documents the weaknesses of public oversight and participation in policymaking in Hungary and Poland two of the most advanced countries in the region It discusses five alternative routes to accountability including European Union oversight constitutional institutions such as presidents and courts devolution to lower level governments the use of neo corporatist bodies and open ended participation rights It urges more emphasis on the fifth option public participation Case studies of the environmental movement in Hungary and of student groups in Poland illustrate these general points The book reviews the United States experience of open ended public participation and draws some lessons for the transition countries from the strengths and weaknesses of the American system

Hungary's Crisis of Democracy Peter Wilkin, 2016-08-26 This book examines the crisis of

democracy that has arisen in Hungary since the election of the Fidesz government in 2010. After moving swiftly to transform the Hungarian constitution, Fidesz created a new political system which has led its critics to argue that the era of democracy in Hungary is over. US Senator John McCain has gone so far as to describe Hungary as an illiberal democracy on a path toward fascism. The author argues that Fidesz has sought to challenge the capitalist and democratic transformation that shaped Hungary for 20 years after the fall of communism by increasing the power of the state over crucial aspects of the economy, society and the political system. In so doing, Fidesz's actions resemble those undertaken by many authoritarian states that have emerged since the end of the Second World War, all aiming to build up a national capitalism and protect their economies whilst undertaking nation building. To make sense of this, the author draws upon two traditions of thought: world systems analysis, which situates Hungary in the context of its incorporation in the modern capitalist world system after the fall of communism, and anarchist social thought, which provides a unique way of seeing the actions of states and political elites. In so doing, the book argues that the events unfolding in Hungary cannot be explained on the basis of Hungarian exceptionalism but must be situated in the broader political and economic context that has shaped the development of Hungary since 1990. The form of capitalism introduced in Hungary and across the region of East and Central Europe has systematically undermined the strong state and social security that had existed under communism, and when added to the failure of the left and liberals in the region, it has paved the way for far right and neo fascist political movements to emerge, claiming the mantle of defenders of society from the market. This represents a fundamental threat to the enlightenment traditions that have shaped dominant modern political ideologies and raises profound problems for both the EU and NATO.

Understanding Accountability: New Perspectives on a Fractured World Matthew Flinders, Gergana Dimova, Chris Monaghan, 2025-07-31. This book brings clarity and understanding to the concept of accountability through the lens of conceptual political analysis. As the structure of the modern state has become more complex, the architecture of accountability has itself needed to evolve and re-orientate in an attempt to keep pace. This has led to an increased emphasis not on accountability per se but on different kinds or types of accountability. As such, it is argued here that accountability has emerged to become a concept with adjectives, and there is a real need to properly understand accountability in an increasingly fractured world. The theoretical and analytical glue that binds all of the chapters in this collection is a commitment to working within the contours of the work of the philosopher Giovanni Sartori. This is an approach that has been used to tease apart and interrogate a range of concepts including terrorism, governance, coups, gender equality, deliberation, warfare, clientelism, hybrid regimes, democracy, right through to art, love, rape and violence. It is also an approach that facilitates the cultivation of complex debates concerning the limits of conceptual flexibility. The volume consists of twelve chapters grouped into three main parts. The introductory part provides the foundations for the collection. Part I on Power explores the normative dimensions of accountability as a means to control and regulate power. Part II on Politics focuses inter

alia on accountability following a period of crisis and the emergence of new technology such as algorithms The final part Part III on Particularities looks at concepts such as social accountability and what is meant by supplementary accountability This broad ranging collection increases the conceptual toolkit that social and political scientists and lawyers can use to interrogate change at a number of levels and in a range of sectors Whether through a focus on moral individual or gendered accountability or through a shift towards clashing stakeholder or social accountability there is a clear flow and coherence through the chapters The volume will be of interest to academics and researchers working in the areas of Legal and Political Theory Legal and Political Philosophy and Accountability Studies

Mafias on the Move Federico Varese, 2013-02-24 Annotation Organised crime is spreading like a global virus as mobs take advantage of open borders to establish local franchises at will This book argues that mafiosi often find themselves abroad against their will rather than through a strategic plan to colonise the territories *Contesting Nordicness* Jani Marjanen, Johan Strang, Mary Hilson, 2021-12-20 The terms Nordic and Scandinavian are widely used to refer to the politics society and culture of Denmark Finland Iceland Norway and Sweden But why have people felt the need to frame things as Nordic and why has the adjective Nordic become so prominent This book adopts a rhetorical approach analysing the speech acts which have shaped the meanings of the term What do the different terms Nordic and Scandinavian have in common and how have the uses of these terms changed in different historical periods What accounts for the apparent upsurge in uses of the rhetoric of Nordicness in the 2010s Drawing on eight case studies of the uses of Nordic and Scandinavian from the nineteenth century to the present day the book explores the appeal and the flexibility of the rhetoric of Nordicness in relation to race openness gender equality food crime fiction Nordic co operation and the Nordic model Arguing that Nordic and Scandinavian are flexible and contested concepts that have been used in different often contradictory and inherently political ways the book suggests that the usage of the term has evolved from a means of creating a cultural community to forging political co operation and further to marketing models in politics and popular culture The rhetorical approach also shows how many of the hallmarks of Nordic political culture such as the Nordic model Nordic gender equality or Nordic openness are more recent conceptualisations than usually assumed As such the book

argues for the need to turn attention away from analysing the different components of Nordicness into studying how when and for what purpose different features were made Nordic *Democratization and the European Union* Leonardo Morlino, Wojciech Sadurski, 2010-05-31 This book examines in depth the impact of the EU on aspects of the quality of democracy in eight selected post communist countries Considering both the political and legal aspects of the dynamics among institutions and focussing on inter institutional accountability the book analyses how constitutional designs have been effectively implemented to achieve this and to what extent this was the result of EU action In order to make a comparative assessment of the EU on democracies the book features detailed case studies according to their different status vis vis the EU including older new member states Poland and Hungary newer new member states Romania and Bulgaria potential candidates Albania and Serbia and neighbour and remote neighbour states Ukraine and Armenia Each chapter addresses a range of dimensions and most relevant domains of inter institutional accountability that is executive legislative relationships constitutional justice decentralisation and regionalism and the role of ombudsman or other relevant authorities Seeking to assess how important the role of the EU has been in influencing the modes and characteristic of democracies and fundamental rights established in these regions this book will be of interest to students and scholars of comparative politics EU politics Post communist studies and democratization studies Public Administration Reformation Yogesh K. Dwivedi, Mahmud Shareef, Sanjay K Pandey, Vinod Kumar, 2013-11-12 In an attempt to instil trust in their performance credibility integrity efficiency cost effectiveness and good governance many public organizations are in effect viewing tax paying citizens as consumers Little research exists to explore synergies between the market economy public administration reformation and their complex bilateral effects This book takes a timely look at the heightened need for public administration reform as a result of the economic challenges currently faced by nations across the globe In particular it explores the roles of eGovernment and a citizen centric focus in this transformation Public Administration Reform examines several commonly held assumptions about public administration the public sector is slow and bureaucratic government employees are frequently disengaged and government agencies are sometimes wasteful eGovernment is proposed as a key tool in the improvement of both public services and reputations of public organizations *Comparative Administrative Law* Susan Rose-Ackerman, Peter L. Lindseth, Blake Emerson, 2017-08-25 A comprehensive overview of the field of comparative administrative law that builds on the first edition with many new and revised chapters additional topics and extended geographical coverage This Research Handbook s broad multi method approach combines history and social science with more strictly legal analyses This new edition demonstrates the growth and dynamism of recent efforts spearheaded by the first edition to stimulate comparative research in administrative law and public law more generally reaching across different countries and scholarly disciplines *Beyond NGO-ization* Kerstin Jacobsson, Steven Saxonberg, 2016-04-15 The celebrations marking the 20th anniversary of the fall of the Berlin Wall provoked a debate on the outcomes of the transition process in the

post communist countries including a debate on the functioning of civil society This provided a good opportunity for researchers to collect new data and revise the discourse on collective action and the dynamics of civil society in these countries Jacobsson and Saxonberg s collection of essays looks at social movements and their forms of mobilization and organization as well as action repertoires in relation to the social context and their success or failure The book meets an important need in the discourse on post communist social movements by going beyond the usual discourse about the weak and non participatory civil society in the post communist context This book gives a nuanced and updated view of social movements in post communist Europe by looking at the cases of relatively successful mobilization by examining groups that have often been neglected in the discourse on social movements and civil society including animal rights groups racist movements and non feminist family organizations and by giving a deeper analysis of the different strategies that civil society organizations and groups can use Rather than expecting social movements in post communist Europe to follow the same patterns and operate in the same fashion as in Western Europe this volume shows that a wider view of contentious action is needed in order to understand the variety of strategies employed by collective actors operating in this context
