From Idea to Profit Jule A. Miller,1986 **Technology Policy and Its Effect on the National Economy** United States. Congress. House. Committee on Science, Space, and Technology. Technology Policy Task Force,1989 **Proceedings of the 5th International Conference on Flexible Manufacturing Systems** Keith Rathmill,2013-11-27 *Industrial Management- Control and Profit* Gideon Halevi,2014-05-21 This volume presents controlling tools for management in order to be in a position to communicate with control engineers concerning technological decisions The main objective of manufacturing management is to make profit However in traditional manufacturing systems none of the separate stages in the process support this objective Management is not expert in any of these stages and therefore is dependent on specific experts at each stage and must follow their decisions Each stage has its own first priority which is not profit and cost This means that management does not have real control over these functional stages nor over the process as a whole This book presents controlling tools for management in order to allow them to communicate better with the experts of the particular manufacturing stages to reach better results and higher profits It is shown that most enterprises can improve their efficiency rate by between 25 and 60% by using the tools developed here Welding Journal ,1986 Applied mechanics reviews ,1948 **Business** □□□□□□□□□□,2003 **Technical Book Review Index** ,1986 *1992 International Engineering Management Conference* ,1992 *SAM Advanced Management Journal* ,1958 **IEEE International Engineering Management Conference** ,1992 Proceedings of the ... International Conference on Information and Knowledge Management ,2004 *Advanced Manufacturing Technology Management* Mike Harrison,1990 *Encyclopedia of Production and Manufacturing Management* Paul M. Swamidass,2006-09-21 The Encyclopedia of Production and Manufacturing Management is an encyclopedia that has been developed to serve this field as the fundamental reference work Over the past twenty years the field of production and operations management has grown more rapidly than ever and consequently its boundaries have been stretched in all directions For example in the last two decades production and manufacturing management absorbed in rapid succession several new production management concepts manufacturing strategy focused factory just in time manufacturing concurrent engineering total quality management supply chain management flexible manufacturing systems lean production and mass customization to name a few This explosive growth makes the need for this volume abundantly clear The manufacturing industry thinks and acts more broadly than it did several decades ago The most notable change has been the need for manufacturing managers to think in technological strategic and competitive terms This is a very favorable development and it leads to manufacturing success The entries in this encyclopedia include the most recent technical and strategic innovations in production and manufacturing management The encyclopedia consists of articles of varying lengths The longer articles on important concepts and practices range from five to fifteen pages There are about 100 such articles written by nearly 100 authors from around the world In addition there are

over 1000 shorter entries on concepts practices and principles The range of topics and depth of coverage is intended to suit both student and professional audiences The shorter entries provide digests of unfamiliar and complicated subjects Difficult subjects are made intelligible to the reader without oversimplification The strategic and technological perspectives on various topics give this Encyclopedia its distinctiveness and uniqueness The world of manufacturing today is increasingly competitive It is apparent that manufacturers must respond to these competitive pressures with technical and strategic innovation This encyclopedia has been developed to help researchers students and those in the manufacturing industry to understand and implement these ongoing changes in the field
