Freshwater Fishes in Britain Cynthia Davies, Jonathan Shelley, Paul Harding, Ian McLean, Ross Gardiner, Graeme Peirson, 2021-10-25 For most British natural historians there is one vertebrate order that could well be said to be out of sight out of mind This is our freshwater fishes familiar principally only to anglers those concerned with managing rivers and other waterbodies and a few research scientists The results of this project which ran from 1998 2002 are published here in the form of comprehensive 10km square dot distribution maps for the 54 species inhabiting England Scotland Wales the Channel Islands and the Isle of Man These indicate the vulnerability of several of our native British species Following a wide ranging introductory chapter and further chapters on distribution and the history of the project Chapter 4 comprises the individual species accounts under the headings Description Biology and behaviour Habitat Distribution in Britain World distribution Status Hybrids and related species and a final section of the relationship of each species with Man In addition to a map each species is illustrated by fine lithographs taken from Francis Day s famous 19th century work skilfully supplemented by Michael J Roberts for those species unknown to Day Chapter 5 covers conservation and management of freshwater fishes and is followed by four Appendices relating to 1 Publications 2 and 4 Selected websites relating to environmental protection biodiversity information and fish conservation The book concludes with a Glossary a comprehensive Bibliography and an Index In his Foreword Sir John Burnett Chairman of the National Biodiversity Network Trust commends this books as a unique reliable source of clear and comprehensive information that is pleasing both to the mind and to the eyes and expresses the hope that it will lead to the more effective conservation of this alien race in our midst A joint project of the Environment Agency the Centre for Ecology and Hydrology and the Joint Nature Conservation Committee written by a team of 38 authors and compiled and edited by Cynthia Davies CEH Jonathan Shelley EA Paul Harding Biological Records Centre CEH Ian McLean JNCC Ross Gardiner Fisheries Research Services and Graeme Peirson EA *Field Guide to Invasive Plants and Animals in Britain* Olaf Booy, Max Wade, Helen Roy, 2015-04-23 This field guide will enable the identification of a range of invasive plants and animals now found in Britain The impact of invasive organisms is second only to habitat loss as a threat to biodiversity and yet despite increasing ecological awareness people remain largely unaware of these plants and animals and their potentially devastating impact Although most biological introductions fail many prove successful and these can prove disastrous for native fauna and flora Though these species are of particular concern to conservationists there has previously been no unified guide devoted to their recognition This book will act both as an ID guide appealing to the amateur naturalist and as an important tool for ecologists and land managers attempting to tackle the problem posed by invasive species
