value of overall pressure ratio rather than for any value that met or exceeded it and internal computation of efficiency rather than the use of input values The modified code was shown to be capable of computing efficiencies that are compatible with those of five multistage compressors and one fan that were tested experimentally This report serves as a users manual for the revised code Compressor Spanline Analysis CSPAN The modeling modifications including two internal loss correlations are presented Program input and output are described A sample case for a multistage compressor is included Glassman Arthur J Unspecified Center NAG3 1165 RTOP 505 69 50
