**The Curiosity of School** Zander Sherman,2012-08-07 It s one thing we all have in common We ve all been to school But as Zander Sherman shows in this fascinating often shocking account of institutionalized education sending your kids off to school was not always normal In fact school is a very recent invention Taking the reader back to 19th century Prussia where generals worried about soldiers troubling individuality sought a way to standardize every young man of military age through to the most controversial debates that swirl around the world about the topic of education today Sherman tells the often astonishing stories of the men and women and corporations that have defined what we have come to think of as both the privilege and the responsibility of being educated Along the way we discover that the SAT was invented as an intelligence test designed to allow the state to sterilize imbeciles that suicide in the wake of disappointing results in the state university placement exams is the fifth leading cause of death in China and that commercialized higher education seduces students into debt as cynically as credit card companies do Provocative entertaining and even educational *The Curiosity of School* lays bare the forces that shape the institution that shapes all of us

*The Elephant in the Room* Lotte Svalgaard, 2023-03-17 A group is working on a business challenge The group members are under pressure They have a lot to accomplish and a limited amount of time After first attempting to develop an overview of their common task they try to make a plan to ensure an efficient group process The planning is proving difficult We've all been there We are in a working group or at a meeting discussing a topic or a challenge and all the while as a separate track running underneath our conversation there is a subtext that no one explicitly addresses This is an example of the elephant in the room Most of us notice the elephant it gets in the way and it's difficult to deal with until someone points at it and says There it is let's take a look at it and reduce its impact With an engaging use of examples and questions the book addresses how we can best deal with the elephant and thus promote job satisfaction creativity and productivity In the context of action what we notice often recedes into the background and gradually slips out of focus until we eventually reconnect with our need to reflect and recreate a space for it This book addresses the challenge of focusing on holding on to and acting on what we notice in the middle of it all Maintaining a simultaneous focus on task and process what we do and what we notice is what I define as double awareness Double awareness is not only a core capacity but also a core challenge The aim of the book is to promote understanding and awareness of this core challenge and to inspire both reflection and action in anyone wishing to improve their capacity for double awareness How can we define and understand the practice of mindful avoidance And can we as members of groups and organizations begin to practice mindful action by engaging in and acting on what we notice in real time

From Electrons to Elephants and Elections Shyam Wuppuluri, Ian Stewart, 2022-04-08 This highly interdisciplinary book covering more than six fields from philosophy and sciences all the way up to the humanities and with contributions from eminent authors addresses the interplay between content and context reductionism and holism and their meeting point the notion of emergence Much of today's science is reductionist bottom up in other words behaviour on one level is explained by reducing it to components on a lower level Chemistry is reduced to atoms ecosystems are explained in

terms of DNA and proteins etc This approach fails quickly since we can't cannot extrapolate to the properties of atoms solely from Schrödinger's equation nor figure out protein folding from an amino acid sequence or obtain the phenotype of an organism from its genotype An alternative approach to this is holism top down Consider an ecosystem or an organism as a whole seek patterns on the same scale Model a galaxy not as 400 billion point masses stars but as an object in its own right with its own properties spiral elliptic Or a hurricane as a structured form of moist air and water vapour Reductionism is largely about content whereas holistic models are more attuned to context Reductionism content and holism context are not opposing philosophies in fact they work best in tandem Join us on a journey to understand the multifaceted dialectic concerning this duo and how they shape the foundations of sciences and humanities our thoughts and the very nature of reality itself
