From Cairo To Wall Street Voices From The Global Spring:

From Cairo to Wall Street Anya Schiffrin, Eamon Kircher-Allen, 2015-06-02 The first essential text of a new and remarkably dynamic era of social activism that has already brought profound change to the world Bob Herbert Something was in the air in 2011 as protest movements swept through the world from the Arab Spring to Spain's Indignados to the Occupy Wall Street movement that spread from Zuccotti Park in downtown Manhattan across the United States in the wake of the global financial collapse This volume collects firsthand accounts and essays about this extraordinary period providing not only an overview of recent historical events and personal insights about what motivates people to take a stand but also food for thought on how these events marked a turning point that shaped our current world *Women, Civil Society and Policy Change in the Arab World* Nasser Yassin, Robert Hoppe, 2019-03-19 This book examines the ways in which Arab civil society actors have attempted to influence public policies In particular the book studies the drive towards a change of policies that affect women and their well being It does so through the lens of women civil society activism and through analysis of cases of policy reform in three Arab countries namely Lebanon Morocco and Yemen The book addresses the tension between policy change and state repression between Islamic traditional religious values and civil secular ones between the formal and the informal channels for policy making One of the first books to reflect on the capability of Arab civil society actors to influence change it traces recent policy evolution from before the Arab Uprisings in 2011 until the present day and describes the limited ability of civil society actors to induce change and substantiate it over recent decades The book explores the use of policy theories in the analysis of cases and reflects on the possibility of applying and adapting those concepts largely applied in the Western world to encompass policymaking in the Arab world without conceptual overstretch

Ageism in Youth Studies Gayle Kimball, 2017-05-11 Ageism is prevalent in a great deal of current scholarship in the social sciences as scholars fault youth for being delinquent or politically apathetic Researchers ignore young people's actual voices despite their leadership in recent global uprisings some of which unseated entrenched dictators Neoliberalism must be exposed in its focus on youth sub cultures and styles rather than economic barriers caused by growing inequality and rising youth unemployment rates Ageism in Youth Studies also discusses the debate about Generation We or Me and if Millennials are narcissistic Resources about global youth studies are included along with the results of the author's surveys and interviews with over 4 000 young people from 88 countries **Reconfiguring European States in Crisis** Desmond S. King, Patrick Le Galès, 2017 Reconfiguring European States in Crisis offers a ground breaking analysis by some of Europe's leading political scientists examining how the European national state and the European Union state have dealt with two sorts of changes in the last two decades Firstly the volume analyses the growth of performance measurement in government the rise of new sorts of policy delivery agencies the devolution of power to regions and cities and the spread of neoliberal ideas in economic policy The volume demonstrates how the rise of non state controlled organizations and norms combine

with Europeanization to reconfigure European states Secondly the volume focuses on how the current crises in fiscal policy Brexit security and terrorism and migration through a borderless European Union have had dramatic effects on European states and will continue to do so *Spontaneous Combustion* Jason Del Gandio,AK Thompson,2017-08-28 From the events of May 1968 to the Arab Spring and Occupy we have seen social movements develop spontaneously around the globe propelling thousands and at times millions of people into the streets to demand an end to oppression In order to make sense of such events the authors draw on George Katsiaficas's conception of the eros effect which picks up and takes off from concepts developed by Herbert Marcuse This effect describes moments in which the instinctual human need for justice and freedom undergoes a massive spontaneous awakening Drawing on Marcuse the concept foregrounds the instinctual foundation of the desire for freedom in which a biologically based pleasure drive eros is given free play from the Foreword by Peter Marcuse However even as the eros effect provides a valuable framework for understanding spontaneous global uprisings Katsiaficas has acknowledged that the concept has remained underdeveloped *Spontaneous Combustion* provides an introduction to the eros effect along with a series of elaborations applications and critical rejoinders concerning its implications A truly interdisciplinary venture the book features contributions from cutting edge scholars and activists on the frontlines of today's struggles

World Protests Isabel Ortiz,Sara Burke,Mohamed Berrada,Hernán Saenz Cortés,2021-11-03 This is an open access book The start of the 21st century has seen the world shaken by protests from the Arab Spring to the Yellow Vests from the Occupy movement to the social uprisings in Latin America There are periods in history when large numbers of people have rebelled against the way things are demanding change such as in 1848 1917 and 1968 Today we are living in another time of outrage and discontent a time that has already produced some of the largest protests in world history This book analyzes almost three thousand protests that occurred between 2006 and 2020 in 101 countries covering over 93 per cent of the world population The study focuses on the major demands driving world protests such as those for real democracy jobs public services social protection civil rights global justice and those against austerity and corruption It also analyzes who was demonstrating in each protest what protest methods they used who the protestors opposed what was achieved whether protests were repressed and trends such as inequality and the rise of women's and radical right protests The book concludes that the demands of protestors in most of the protests surveyed are in full accordance with human rights and internationally agreed upon UN development goals The book calls for policy makers to listen and act on these demands

The Watchdog That Didn't Bark Dean Starkman,2014-01-07 The Pulitzer Prize winning reporter details how the U S business press could miss the most important economic implosion of the past eighty years Eric Alterman media columnist for The Nation In this sweeping incisive post mortem Dean Starkman exposes the critical shortcomings that softened coverage in the business press during the mortgage era and the years leading up to the financial collapse of 2008 He examines the deep cultural and structural shifts some unavoidable some self inflicted that eroded journalism's appetite for its role as watchdog

The result was a deafening silence about systemic corruption in the financial industry Tragically this silence grew only more profound as the mortgage madness reached its terrible apogee from 2004 through 2006 Starkman frames his analysis in a broad argument about journalism itself dividing the profession into two competing approaches access reporting and accountability reporting which rely on entirely different sources and produce radically different representations of reality As Starkman explains access journalism came to dominate business reporting in the 1990s a process he calls CNBCization and rather than examining risky even corrupt corporate behavior mainstream reporters focused on profiling executives and informing investors Starkman concludes with a critique of the digital news ideology and corporate influence which threaten to further undermine investigative reporting and he shows how financial coverage and journalism as a whole can reclaim its bite Can stand as a potentially enduring case study of what went wrong and why Alec Klein national bestselling author of Aftermath With detailed statistics Starkman provides keen analysis of how the media failed in its mission at a crucial time for the U S economy Booklist

Political Power and Economic Inequality Charles F. Andrain, 2014-02-14 Political Power and Economic Inequality offers a balanced comparative analysis of worldwide income inequality Charles F Andrain explores the ways that government institutions political parties private corporations labor unions and protest movements influence public programs How do these organizations mobilize resources so that their preferences become government decisions What impact do these policies have on different geographic regions occupations ethnic religious groups and genders Drawing on comprehensive worldwide data the author highlights the similarities and differences among nations By focusing on global trends he explains the connections that link domestic conditions with foreign trade overseas investment labor migration and communications media Andrain argues that the globalization of income inequality explains contemporary political life in the United States as well as in other parts of the world To fully understand global income distribution we need to grasp how historical changes affect these trends why social movements stage protests against the growing income gap and how a comparative approach best explains income differences Andrain s tightly written interdisciplinary study stresses the impact of this problem on political life and social change in the United States Europe Asia and Latin America The comparative evidence probes the full dynamics of this controversial issue and its consequences for society as a whole

detainees in Argentina Gareth Jones's coverage of the Ukraine famine of 1932 33 missionary newspapers coverage of Chinese foot binding in the nineteenth century Dwarkanath Ganguli's expos of the British coolie trade in nineteenth century Assam India and many others Edited by the noted author and journalist Anya Schiffrin *Global Muckraking* is a sweeping introduction to international journalism that has galvanized the world's attention In an era when human rights are in the spotlight and the fate of newspapers hangs in the balance here is both a riveting read and a sweeping argument for why the world needs long form investigative reporting *Spaces of Governmentality* Martina Tazzioli, 2014-11-24 Much work has been done on the causes and characteristics of the Arab Spring but relatively little research has examined the political and spatial consequences that have developed following the uprisings This book engages with the ways in which spaces in Southern Europe and Northern Africa have been negotiated and transformed by migrants in the wake of the uprisings showing that their struggles are a continuation of their political movement Drawing on an innovative countermapping approach based on radical cartography Martina Tazzioli illustrates the spatial upheavals caused by migration in the Mediterranean and the transformations created by migration controls applied by European nations With critical insight on the application of Foucault's concept of governmentality to migration studies exploration of a reconfigured theory of autonomy of migration and discussion of the politics of invisibility that underpins migration this book sheds new light on the enduring struggles that follow the Arab Spring ***Women's Journey to Empowerment in the 21st Century*** Kristen Zaleski, Annalisa V. Enrile, Eugenia L. Weiss, 2020 Written through the lens of transnational feminism *Women's Journey to Empowerment in the 21st Century* offers a global view into the patriarchal attitudes that shape cultural practices that oppress women and continue to take form in the modern era By examining a range of issues the book compels readers to utilize a contextual framework in taking a closer look at contemporary violence and oppression against women in our world

Civil Society and World Regions Lorenzo Fioramonti, 2013-12-11 Supranational regionalism and regional integration have for a long time been top down processes led by the few and imposed on the many The role of citizens especially those active in civil society has been neglected by scholars students and commentators of regionalism In reaction to the prevalence of these top down models a new regionalism approach has proliferated in the past few years This book aims to further develop such a research agenda by providing an up to date overview of the contribution of civil society to world regionalism from Europe to Africa Asia and the Americas This is not only relevant as a research topic it is also of critical importance from a political standpoint As regions across the world experience prolonged governance crises it becomes paramount to understand the extent to which these new regional formations actually reflect the interests and needs of their people While old regionalism was accepted as a de facto elite driven byproduct of both the Cold War and neoliberal globalization the twenty first century regionalism if it is to survive will need to refocus its objectives through new forms of participation and inclusion Regions without citizens are unlikely to stand the test of time especially in times of crises *Cartographies of*

Madrid Silvia Bermudez, Anthony L. Geist, 2021-04-30 One of this book's goals is to evaluate the complex ways that Madrid has served as the political economic and cultural capital of the Global South from the end of the Franco dictatorship to the present. The other is to examine the city as lived experience where citizens contest capital's push to shape urban space in its own image through activities of the imagination. Scholars, investigative journalists, political activists, and a filmmaker combine to document the vast array of Madrid's grassroots movements.

The Fractal Self John L. Culliney, David Jones, 2017-07-31 Our universe science reveals began in utter simplicity then evolved into burgeoning complexity. Starting with subatomic particles, dissimilar entities formed associations, binding, bonding, growing, branching, catalyzing, cooperating, as self joined other, following universal laws with names such as gravity, chemical attraction, and natural selection. Ultimately, life arose in a world of dynamic organic chemistry, and complexity exploded with wondrous new potential. Fast forward to human evolution and a tension that had existed for billions of years now played out in an unprecedented arena of conscious calculation and cultural diversity. Cooperation interleaving with competition, intimacy oscillating with integrity, we dwell in a world where yin meets yang in human affairs on many levels. In *The Fractal Self*, John Culliney and David Jones uncover surprising intersections between science and philosophy. Connecting evidence from evolutionary science with early insights of Daoist and Buddhist thinkers, among others, they maintain that sagely behavior envisioned in these ancient traditions represents a pinnacle of human achievement emerging out of our evolutionary heritage. They identify an archetype, the fractal self: a person in any walk of life who cultivates a cooperative spirit. A fractal self is a sage in training who joins others in common cause, leads from within, and achieves personal satisfaction in coordinating smooth performance of the group, team, or institution in which he or she is embedded. Fractal selves commonly operate with dedication and compassionate practice in the service of human society or in conserving our planet. But the competitive side of human nature is susceptible to greed and aggression. Self-aggrandizement, dictatorial power, and ego-driven enforcement of will are the goals of those following a self-serving path. Individuals the authors identify as antisages: Terrorist leaders are an especially murderous breed, but aggrandizers can be found throughout business, religion, educational institutions, and governments. Humanity has reached an existential tipping point; will the horizon already in view expand with cooperative progress toward godlike emergent opportunities, or contract in the thrall of corrupt oligarchs and tribal animosities? We have brought ourselves to a chaotic edge between immense promise and existential danger and are even now making our greatest choice.

Decolonising the University Gurinder K. Bhabra, Dalia Gebrial, Kerem Nişancıolu, 2018-08-20 In 2015, students at the University of Cape Town demanded the removal of a statue of Cecil Rhodes, the imperialist racist business magnate, from their campus. The battle cry *Rhodes Must Fall* sparked an international movement calling for the decolonisation of the world's universities. Today, as this movement grows, how will it radically transform the terms upon which universities exist? In this book, students, activists, and scholars discuss the possibilities and the pitfalls of doing decolonial work in the home of the coloniser, in the heart of the

establishment Subverting curricula enforcing diversity and destroying old boundaries this is a radical call for a new era of education Offering resources for students and academics to challenge and resist coloniality inside and outside the classroom Decolonising the University provides the tools for radical pedagogical disciplinary and institutional change

Turkey, Power and the West Ali Bilgic, 2016-09-29 During the leadership of Recep Tayyip Erdogan and the AKP the Turkish government shifted from a reactive to an activist foreign policy As a result many in the West increasingly began to see Turkey as a key actor in the international relations of the region and indeed the wider international stage Turkey and the West offers a unique approach to this transformation and considers questions of Turkish national identity and its relations with the West through the lens of gender studies From the Ottoman Empire to the present day the book constructs an image of Turkish foreign policy as reflecting a gendered

insecurity one of a non Western Turkish masculinity subordinated to a Western hegemonic masculinity and shows how Turkey's subordination has in turn been internalised by its own politicians Across a diverse range of sources Bilgic takes advantage of new theories such as critical security studies CSS to paint a picture of a Turkish republic anxious to make its mark on the world stage yet perennially insecure about its position as a global power Turkey and the West is essential for students and researchers interested in Turkish politics and the international relations of the Middle East as well as those with an interest in gender and identity studies
