## **Concept Time Early Twentieth Century Philosophy:**

**The Concept of Time in Early Twentieth-Century Philosophy** Flavia Santoianni, 2015-11-26 This book presents a collection of authoritative contributions on the concept of time in early twentieth century philosophy. It is structured in the form of a thematic atlas; each section is accompanied by relevant elementary logic maps that reproduce in a spatial form the directionalities, arguments, and/or discourses reported on in the text. The book is divided into three main sections: the first of which covers phenomenology and the perception of time by analyzing the works of Bergson, Husserl, Sartre, Merleau-Ponty, Deleuze, Guattari, and Derrida. The second section focuses on the language and conceptualization of time, examining the works of Cassirer, Wittgenstein, Heidegger, Lacan, Ricoeur, and Foucault, while the last section addresses the science and logic of time as they appear in the works of Guillaume, Einstein, Reichenbach, Prigogine, and Barbour. The purpose of the book is threefold: to provide readers with a comprehensive overview of the concept of time in early twentieth century philosophy; to show how conceptual reasoning can be supported by accompanying linguistic and spatial representations; and to stimulate novel research in the humanistic field concerning the complex role of graphic representations in the comprehension of concepts.

*Grammar in Early Twentieth-Century Philosophy* Richard Gaskin, 2013-04-15 This book is a systematic and historical exploration of the philosophical significance of grammar. In the first half of the twentieth century and in particular in the writings of Frege, Husserl, Russell, Carnap, and Wittgenstein, there was sustained philosophical reflection on the nature of grammar and on the relevance of grammar to metaphysics, logic, and science. **Transforming Philosophy in the Early**

**Twentieth Century** Bohang Chen, 2024-11-15 This book conducts a historico-critical investigation into a proposal to transform philosophy in the early twentieth century. Driven by the Great Differentiation, the emancipation of the sciences from philosophy in the nineteenth century, several early twentieth century philosophical movements advocated the transformation of philosophy from an endeavor to unify all conceivable human knowledge into a practice focused on the logical analysis of the differentiated sciences and broader human knowledge. However, this proposal was not subsequently adopted, leading to the establishment of academic philosophy as a discipline characterized by unique philosophical problems and solutions. Drawing on a variety of sources, this book posits that the transformation proposal offers crucial insights for understanding the history of philosophy, especially at its critical turning point in the early twentieth century. Moreover, although not pursued in academic philosophy today, this proposal still offers insights for rethinking the future role of philosophy. In response to Max Weber's fundamental challenge to philosophy post-Differentiation, it is argued that logical analysis offers a viable methodological approach and that the realm of values serves as a remaining substantive domain for practical philosophy. The book will be attractive to researchers and students interested in the history of philosophy and science, as well as general intellectual history. *Teaching and Mobile Learning* Flavia Santoianni, Corrado

**Anthropocene** Carl A. Maida, 2023-11-13 Learning in the Anthropocene Reimagining Education in the Twenty First Century reimagines the education of future generations in our complex society Carl A Maida argues we are living in an era of transition that has been repeatedly called an age of acceleration and in this time of crisis diverse constituencies will need to coalesce and create place based arenas for critical inquiry and reflection around biodiversity energy and sustainability concerns Education is therefore critical to the public sphere which is polarized by contentious debates over class ethnicity culture and more recently the fate of the planet He posits that two provinces the school and society can join together to

afford students greater freedom to produce future knowledge by advancing experiential instructional approaches as humanity faces profound challenges to its existence

### **History, Literature and the Writing of the Canadian Prairies**

Alison Calder, Robert Wardhaugh, 2005-05-16 The Canadian Prairie has long been represented as a timeless and unchanging location defined by settlement and landscape Now a new generation of writers and historians challenge that perception and argue instead that it is a region with an evolving culture and history In a collection of ten essays History Literature and the Writing of the Canadian Prairies explores a more contemporary prairie identity and reconfigures the prairie as a construct that is non linear and diverse responding to the impact of geographical historical and political currents These writers explore the connections between document and imagination between history and culture and between geography and time The subjects of the essays range widely the non linear structure of Carol Shield s The Stone Diaries the impact of Aberhart s Social Credit Marshall McLuhan and Mesopotamian myth on Robert Kroetsch s prairie postmodernism the role of document in long prairie poems the connection between cultural tourism and heritage the theme of regeneration in Margaret Laurence s Manawaka writing the influence of imagination on geography in Thomas Wharton s Icefields and the effects on an alpine climber of pre WWII ideological concepts of time and individualism

**America's Revolutionary Mind** C. Bradley Thompson, 2019-11-05 America s Revolutionary Mind is the first major reinterpretation of the American Revolution since the publication of Bernard Bailyn s The Ideological Origins of the American Revolution and Gordon S Wood s The Creation of the American Republic The purpose of this book is twofold first to elucidate the logic principles and significance of the Declaration of Independence as the embodiment of the American mind and second to shed light on what John Adams once called the real American Revolution that is the moral revolution that occurred in the minds of the people in the fifteen years before 1776 The Declaration is used here as an ideological road map by which to chart the intellectual and moral terrain traveled by American Revolutionaries as they searched for new moral principles to deal with the changed political circumstances of the 1760s and early 1770s This volume identifies and analyzes the modes of reasoning the patterns of thought and the new moral and political principles that served American Revolutionaries first in their intellectual battle with Great Britain before 1776 and then in their attempt to create new Revolutionary societies after 1776 The book reconstructs what amounts to a near unified system of thought what Thomas Jefferson called an American mind or what I call America s Revolutionary mind This American mind was I argue united in its fealty to a common philosophy that was expressed in the Declaration and launched with the words We hold these truths to be self evident

**Interrogating Networks** Lin Foxhall, 2021-06-09 Network theory and methodologies have become central to exploring and explaining social economic and political relationships and connections in past societies However in archaeology the deployment of networks has sometimes been more descriptive than analytical Methodologies have often depended upon underlying assumptions which inevitably simplify relationships that were complex and multi faceted However the fragmentary heterogenous and usually proxy data we possess are not always amenable to reconstructing that complexity In ancient societies we must infer the movement of knowledge about how to make things largely from objects themselves This is because we usually lack direct evidence of the human relationships that entwined people with objects and their makers and hence have only imperfect understanding of the full range of diverse factors that shaped the relationships that constituted these networks The chapters in this volume aim to interrogate the interpretative potential of network concepts for understanding the movement over time and space of ideas about making using and moving things through a range of archaeological case studies which reveal both functional and dysfunctional relationships The purpose is to consider how more broadly contextualized and multi faceted studies can both enhance and be enhanced by network and related approaches The volume contributes to the search for greater understanding of the movement and transmission of knowledge or in some cases their absence and to debates about how best to expand the utility of network concepts and approaches

**Changing the Rules** Trudy Dehue, 1995-05-26 Brother Bear learns about fear and getting back in the saddle when a ghost haunts the riding

academy The Art and Science of Making the New Man in Early 20th-Century Russia Yvonne Howell, Nikolai Krementsov, 2021-12-02 The idea that morally mentally and physically superior new men might replace the currently existing mankind has periodically seized the imagination of intellectuals leaders and reformers throughout history This volume offers a multidisciplinary investigation into how the new man was made in Russia and the early Soviet Union in the first third of the 20th century The traditional narrative of the Soviet new man as a creature forged by propaganda is challenged by the strikingly new and varied case studies presented here The book focuses on the interplay between the rapidly developing experimental life sciences such as biology medicine and psychology and countless cultural products ranging from film and fiction dolls and museum exhibits to pedagogical projects sculptures and exemplary agricultural fairs With contributions from scholars based in the United States Canada the UK Germany and Russia the picture that emerges is emphatically more complex contradictory and suggestive of strong parallels with other new man visions in Europe and elsewhere In contrast to previous interpretations that focused largely on the apparent disconnect between utopian new man rhetoric and the harsh realities of everyday life in the Soviet Union this volume brings to light the surprising historical trajectories of new man visions their often obscure origins acclaimed and forgotten champions unexpected and complicated results and mutual interrelations In short the volume is a timely examination of a recurring theme in modern history when dramatic advancements in science and technology conjoin with anxieties about the future to fuel dreams of a new and improved mankind

**After Taste. Critique of insufficient reason** Slavko Kacunko, 2021-06-02 After Taste is an inquiry into a field of study dedicated to the reconsideration reconstruction and rehabilitation of the concept of Taste Taste is the category whose systematic historical and actual dimensions have traditionally been located in a variety of disciplines The actuality and potential of the study is based on a variety of collected facts from readings and experiences which materialize in the following features One concept figurative Taste two thinking traditions analytic and synthetic continental and three interrelated dimensions systematic historic and actual are presented in three volumes As such the study presents a salient comprehensive companion for wider readership of humanities approaching conceptions of Taste for the first time Moreover After Taste is intended for anyone who hopes to make a further contribution to the subject Since its appearance and apparently short triumph some 250 years ago the concept of non literary Taste remained the linchpin of aesthetic theory and practice but also a category outreaching aesthetics Taste as the personal unity of the production theory and criticism of art and literature which was still largely taken as a given in the eighteenth century has meanwhile given way to a highly differentiated art world in which aesthetic discourse is placed in such a way that it can seemingly no longer have a conceptual or linguistic effect on general opinion making The critical role of Taste judges ratings and rankings in the feuilleton politics and social media on the one hand and the responding search for new canons on the other have had a huge impact on the academic and popular discourse today However Taste s impact on society is in fact all encompassing and yet without getting even close to the magnetic North of the academic compass After Taste fills the gaps of systematic research by a comprehensive tracing of the emergence of the doctrines discourses and disciplinary dimensions of Taste up to the peak of its systematic and historical trajectory in the eighteenth century and onwards into the present day The guiding goal is a post disciplinary rehabilitation of the contested category as a preparation for its productive usage in emerging academic and popular contexts Three intertwined research hypotheses form the guiding goal of an overall study of the agencies of Taste its institutionalizations and expert cultures The 1 first part provides a missing systematic perspective on the concept of Taste as a key factor for understanding the human faculties value theories and practices of valuating The 2 second part traces the events at the peak of Taste s systematic and historical trajectories up until the late eighteenth century and verifies the historiographical hypothesis about the instrumentality of Taste for the production reception and distribution of culture The 3 third part reconstructs the major moments in which the contested concept of Taste experiences its post disciplinary rehabilitation in preparation for its future productive usage in the academic and popular discourses and practices It shows how the category of Taste became the foundation legitimation and the catalyst for the emerging division of labour faculties and disciplines confirming the hypothesis of the immense impact and actuality of Taste in the contemporary world

*Political Philosophy in the Twentieth Century* Catherine H. Zuckert, 2011-08-29 This book demonstrates the rich diversity and depth of political philosophy in the twentieth century Catherine H Zuckert has compiled a collection of essays recounting

the lives of political theorists connecting each biography with the theorist's life work and explaining the significance of the contribution to modern political thought. The essays are organized to highlight the major political alternatives and approaches. Beginning with essays on John Dewey, Carl Schmitt, and Antonio Gramsci representing the three main political alternatives: liberal, fascist, and communist at mid-century, the book proceeds to consider the lives and works of migrants such as Hannah Arendt, Eric Voegelin, and Leo Strauss, who brought a continental perspective to the United States after World War II. The second half of the collection contains essays on recent defenders of liberalism such as Friedrich Hayek, Isaiah Berlin, and John Rawls, and liberalism's many critics including Michel Foucault, Jürgen Habermas, and Alasdair MacIntyre.

Mutating Concepts, Evolving Disciplines: Genetics, Medicine, and Society L.S. Parker, Rachel A. Ankeny, 2012-12-06

Advances in genetics such as the Human Genome Project's successful mapping of the human genome and the discovery of ever more sites of disease-related mutations invite re-examination of basic concepts underlying our fundamental social practices and institutions. Having children, assigning responsibility, identifying causes using social and scientific resources to improve human well-being among other concepts will never be the same. Our concepts of moral and legal responsibility, cause and effect, disease prevention, health, disability, enhancement, personal identity, and reproductive autonomy and responsibility are all subtly changing in response to developments in genetics. Biology, law, medicine, and other disciplines are also evolving in response to mutating concepts in genetics itself, for example, dominance, causation, behavior, gene expression, and gene. The selections in this volume employ philosophical and historical perspectives to shed light on classic social, ethical, and philosophical issues raised with renewed urgency against the backdrop of the mapping of the human genome.
