Conceptions Of Cosmos From Myths To The:

Conceptions of Cosmos Helge S. Kragh, 2006-12-07 This book is a historical account of how natural philosophers and scientists have endeavoured to understand the universe at large first in a mythical and later in a scientific context Starting with the creation stories of ancient Egypt and Mesopotamia the book covers all the major events in theoretical and observational cosmology from Aristotle's cosmos over the Copernican revolution to the discovery of the accelerating universe in the late 1990s It presents cosmology as a subject including scientific as well as non scientific dimensions and tells the story of how it developed into a true science of the heavens Contrary to most other books in the history of cosmology it offers an integrated account of the development with emphasis on the modern Einsteinian and post Einsteinian period Starting in the pre literary era it carries the story onwards to the early years of the 21st century

Conceptions of Cosmos Helge Kragh, 2007 Presenting a history of how the universe at large became the object of scientific understanding this title offers an integrated and comprehensive account of cosmology that covers all major events from Aristotle's Earth centred cosmos to the discovery of the accelerating universe

Accelerating Human Evolution by Theosophical Initiation Yves Mühlmatter, 2022-12-19 The main subjects of analysis in the present book are the stages of initiation in the grand scheme of Theosophical evolution These initiatory steps are connected to an idea of evolutionary self development by means of a set of virtues that are relative to the individual's position on the path of evolution The central thesis is that these stages were translated from the Hindu tradition to the Theosophical tradition through multifaceted hybridization processes in which several Indian members of the Theosophical Society partook Starting with Annie Besant's early Theosophy the stages of initiation are traced through Blavatsky's work to Manilal Dvivedi and T Subba Row both Indian members of the Theosophical Society and then on to the San tana Dharma Text Books In 1898 the English Theosophist Annie Besant and the Indian Theosophist Bhagavan Das together founded the Central Hindu College Benares which became the nucleus around which the Benares Hindu University was instituted in 1915 In this context the San tana Dharma Text Books were published Mühlmatter shows that the stages of initiation were the blueprint for Annie Besant's pedagogy which she implemented in the Central Hindu College in Benares In doing so he succeeds in making intelligible how esoteric knowledge was transferred to public institutions and how a broader public could be reached as a result The dissertation has been awarded the ESSWE PhD Thesis prize 2022 by the European Society for the Study of Western Esotericism

Conceiving God: The Cognitive Origin and Evolution of Religion David Lewis-Williams, 2010-03-01 A controversial exploration of the origin of religion in the neurology of the human brain In this book the noted cognitive archaeologist David Lewis Williams confronts a question that troubles many people in the world today Is there a supernatural realm that intervenes in the material world of daily life and leads to the evolution of religions Professor Lewis Williams first describes how science

developed within the cocoon of religion and then shows how the natural functioning of the human brain creates experiences that can lead to belief in a supernatural realm beings and interventions Once people have these experiences they formulate beliefs about them and thus creeds are born Forty thousand years ago people were leaving traces in the archaeological record of activities that we can label religious and Lewis Williams discusses in detail the evidence preserved in the Volp Caves in France He also shows that mental imagery produced by the functioning of the human brain can be detected in widely separated religious communities such as Hildegard of Bingen s in medieval Europe or the San hunters of southern Africa

Science and Religion in Dialogue Raymond E. Grizzle, 2012-05-04 This book provides an overview of the history of interactions between science and religion with an emphasis on Christianity Raymond E Grizzle examines his own history of self reflection on science and religion focusing on what we have learned about the structure history and functioning of creation Both histories are interpreted as histories of discarded images largely consisting of the replacement of images of creation provided by religion with those provided by the natural sciences Grizzle assesses the major kinds of creationism that exist today and explores conflicts arising from young Earth creationism and intelligent design He also provides examples of productive dialogue regarding how science and religion might inform one another Two major themes that run throughout the book are the importance of underlying beliefs and the reliability of modern science in producing a truthful understanding of the cosmos and the creation process Science and Religion in Dialogue concludes with some suggested principles for constructive self reflection and thoughts on how today s conflict might be replaced with productive discourse involving both science and religion

Wandering Myths Lucy Gaynor Audley-Miller, Beate Dignas, 2018-10-08 In spite of the growing amount of important new work being carried out on uses of myth in particular ancient contexts their appeal and reception beyond the framework of one culture have rarely been the primary object of enquiry in contemporary debate Highlighting the fact that ancient societies were linked by their shared use of mythological narratives *Wandering Myths* aims to advance our understanding of the mechanisms by which such tales were disseminated cross culturally and to investigate how they gained local resonances In order to assess both wider geographic circulations and to explore specific local features and interpretations a regional approach is adopted with a particular focus on Anatolia the Near East and Italy Contributions are drawn from a range of disciplines and cross a wide chronological span but all are interlinked by their engagement with questions focusing on the factors that guided the processes of reception and steered the facets of local interpretation The Preface and Epilogue evaluate the material in a synoptic way and frame the challenging questions and views expressed in the Introduction

Narrative, Social Myth and Reality in Contemporary Scottish and Irish Women's Writing Tudor

Balinisteanu, 2009-10-02 This book offers an original interdisciplinary analysis of the relations between myth identity and social reality involving elements of narratology theory linguistics philosophy anthropology and social theory harnessed to support an argument firmly located in the area of literary criticism This analysis yields a fairly extensive reinterpretation of the concept of myth which is applied to the examination of the relationship between narrative and social reality as represented in texts by contemporary Scottish and Irish women writers The main theoretical sources are Mikhail Bakhtin's theories of heteroglossia Jacques Derrida's theories of citationality and Judith Butler's theories of subjectivity The analysis framework developed in the book uses these theories to create a new way of understanding how literary texts change readers worldviews by enticing them to accept alternative possibilities of cultural expression of identity and social order The texts analysed in this book reconfigure naturalised stories that have become normative and constraining in conveying identities and visions of legitimate social orders The book's focus on feminine identities places it alongside feminist analyses of reconstructions of fairy tales myths or canonical stories that establish what counts as legitimate feminine identity Studied here for the first time together the writers whose texts form the interest of this book continue the revisionist work begun by other women writers who engage with the male generated literary philosophical and humanist tradition They share a view of narratives as tools for continually negotiating our identities social worlds and socialisation scenarios While the high level theoretical discourse of the first part of the book requires specialised knowledge the second part of the book offering close readings of the texts is both lively and accessible and should engage the interest of the general reader and academic alike This book is written for all those who are interested in the power words have to hold sway over our inner and outer social worlds *Dictionary of the History of Ideas: Law, conception of, to Protest movements* Philip Paul Wiener, 1973 Contains overviews of religious intellectual literary economic political and scientific concepts
