Monographic Series Library of Congress,1974 National Library of Medicine Current Catalog National Library of Medicine (U.S.),1967 First multi year cumulation covers six years 1965 70 Concepts and Methods in Evolutionary Biology Robert N. Brandon,1996 This collection of Professor Brandon's recent essays covers all the traditional topics in the philosophy of evolutionary biology The Concept of Reduction Raphael van Riel,2014-02-19 This volume investigates the notion of reduction Building on the idea that philosophers employ the term reduction to reconcile diversity and directionality

with unity without relying on elimination the book offers a powerful explication of an ontological notion of reduction the extension of which is primarily formed by properties kinds individuals or processes It argues that related notions of reduction such as theory reduction and functional reduction should be defined in terms of this explication Thereby the book offers a coherent framework which sheds light on the history of the various reduction debates in the philosophy of science and in the philosophy of mind and on related topics such as reduction and unification the notion of a scientific level and physicalism The book takes its point of departure in the examination of a puzzle about reduction To illustrate the book takes as an example the reduction of water If water reduces to H2O then water is identical to H2O thus we get unity Unity does not come at the price of elimination claiming that water reduces to H2O we do not thereby claim that there is no water But what about diversity and directionality Intuitively there should be a difference between water and H2O such that we get diversity This is required for there to be directionality in a sense if water reduces to H2O then H2O is prior to or more basic than water At least if water reduces to H2O then H2O does not reduce to water But how can this be if water is identical to H2O The book shows that the application of current models of reduction does not solve this puzzle and proposes a new coherent definition according to which unity is tied to identity diversity is descriptive in nature and directionality is the directionality of explanation Subject Guide to Books in Print ,1997 The Craft of Research, Third Edition Wayne C. Booth, Gregory G. Colomb, Joseph M. Williams, 2009-05-15 With more than 400 000 copies now in print The Craft of Research is the unrivaled resource for researchers at every level from first year undergraduates to research reporters at corporations and government offices Seasoned researchers and educators Gregory G Colomb and Joseph M Williams present an updated third edition of their classic handbook whose first and second editions were written in collaboration with the late Wayne C Booth The Craft of Research explains how to build an argument that motivates readers to accept a claim how to anticipate the reservations of readers and to respond to them appropriately and how to create introductions and conclusions that answer that most demanding question So what The third edition includes an expanded discussion of the essential early stages of a research task planning and drafting a paper The authors have revised and fully updated their section on electronic research emphasizing the need to distinguish between trustworthy sources such as those found in libraries and less reliable sources found with a quick Web search A chapter on warrants has also been thoroughly reviewed to make this difficult subject easier for researchers Throughout the authors have preserved the amiable tone the reliable voice and the sense of directness that have made this book indispensable for anyone undertaking a research project Concepts in Biology Eldon Enger, Frederick Ross, David Bailey, 2008-01-16 Enger Ross Bailey Concepts in Biology is a relatively brief introductory general biology text written for students with no previous science background The authors strive to use the most accessible vocabulary and writing style possible while still maintaining scientific accuracy.
