1. A crate filled with delicious junk food rests on a horizontal floor. Only gravity and the support force of the floor act on it, as shown by the vectors for weight  $W$  and normal force  $n$ .

- a. The net force on the crate is (zero) (greater than zero).  
b. Evidence for this is no acceleration.

2. A slight pull  $P$  is exerted on the crate, not enough to move it.

- a. The force of friction  $f$  acting on the crate is (less than) (equal to) (greater than)  $P$ .  
b. The net force on the crate is (zero) (greater than zero).

3. Pull  $P$  is increased until the crate begins to move. It is pulled so that it moves with constant velocity across the floor.

- a. Friction  $f$  is (less than) (equal to) (greater than)  $P$ .  
b. Constant velocity means acceleration is (zero) (greater than zero).  
c. The net force on the crate is (less than) (equal to) (greater than) zero.

4. Pull  $P$  is further increased and is now greater than friction  $f$ .

- a. The net force on the crate is (less than) (equal to) (greater than) zero.  
b. The net force acts toward the right, so acceleration acts toward the (left) (right).

5. If the pulling force  $P$  is 150 N and the crate doesn't move, what is the magnitude of  $f$ ? 150 N  
6. If the pulling force  $P$  is 200 N and the crate doesn't move, what is the magnitude of  $f$ ? 200 N  
7. If the force of sliding friction is 250 N, what force is necessary to keep the crate sliding at constant velocity? 250 N  
8. If the mass of the crate is 50 kg and sliding friction is 250 N, what is the acceleration of the crate when the pulling force is 250 N? 0 m/s<sup>2</sup> 300 N? 1 m/s<sup>2</sup> 500 N? 5 m/s<sup>2</sup>

**Practices of Physics** R. I. G. Hughes, 2012-04-05 R I G Hughes offers an original approach to the philosophical understanding of physics instead of examining theories he examines the theoretical practices which physicists use He starts with a critical study of the accounts that physicists give of their practices and asks Given that these practices are successful what is the nature of their success Eight of the nine essays are illustrated by case studies of particular episodes in the history of physics In three essays these case studies are strictly historical the others deal with physics since 1900 Three essays deal with standard topics in the philosophical literature laws explanation and realism but are here considered from the perspective that an examination of theoretical practice affords The five essays at the centre of the book all deal with different aspects of modelling in physics Another examines the discourse of physics in particular the languages in which physical narratives are told and experimental work is described The final essay draws out the implications of the earlier essays for the thesis of scientific realism
