Nilsson, 2010-04-20 Italy is a country that exercises a hold on the imagination of people all over the world Its long history has left an inexhaustible treasure chest of cultural achievement The historic cities of Rome Florence and Venice are among the most sought after destinations in the world for tourists and art lovers and Italy s natural beauty and cuisine are rightly renowned Italy s history and politics are also a source of endless fascination Modern Italy has consistently been a political laboratory for the rest of Europe In the 19th century Italian patriotism was of crucial importance in the struggle against the absolute governments reintroduced after the Congress of Vienna 1814 15 After the fall of Fascism during World War II Italy became a model of rapid economic development though its politics has never been less than contentious and its democracy has remained a troubled one The A to Z of Modern Italy is an attempt to introduce the key personalities events social developments and cultural achievements of Italy since the beginning of the 19th century when Italy first began to emerge as something more than a geographical entity and national feeling began to grow This is done through a chronology a list of acronyms and abbreviations an introductory essay a map a bibliography and some 400 cross referenced dictionary entries on prominent individuals basic institutions crucial events history politics economics society and culture **Sequence Comparison in Historical Linguistics** Mattis List, 2014-07-21 The comparison of sound sequences words morphemes constitutes the core of many techniques and methods in historical linguistics With the help of these

techniques corresponding sounds can be determined historically related words can be identified and the history of languages can be uncovered So far the application of traditional techniques for sequence comparison is very tedious and time consuming since scholars have to apply them manually without computational support In this study algorithms from bioinformatics are used to develop computational methods for sequence comparison in historical linguistics The new methods automatize several steps of the traditional comparative method and can thus help to ease the painstaking work of language comparison
