**The Heads-up on Sport Concussion** Gary S. Solomon, Karen M. Johnston, Mark R. Lovell, 2006 Concussions happen at all levels of sport from the earliest levels through the professional ranks Potentially catastrophic if not detected early concussions have ended the careers of many notable professional players and it is estimated that in high school football alone about 1 in 5 players suffers a concussion The Heads Up on Sport Concussion is a concise introductory book on sport concussion for professionals who work with athletes It provides a comprehensive review of current literature on sport concussion and it guides professionals in communicating with athletes parents and coaches regarding assessment treatment and other issues surrounding sport concussion In The Heads Up on Sport Concussion the authors detail what happens when the brain is injured appropriate assessment and evaluation tools sport specific issues how medical organizations are addressing the issue of sport concussion medical and nonmedical treatment and rehabilitation strategies recent research on a variety of topics in sport concussion and essential information for coaches athletes and parents This book is focused and authoritative in its treatment of a poorly understood medical problem Providing clear clinical management strategies for sport concussion injuries the text compiles the best available information from different resources and synthesizes the information with summaries and conclusions for easy comprehension The material is enhanced further with photos and illustrations depicting MRI scans and brain images showing chemical reactions in the brain after an injury In addition the text identifies particular sports and sport activities that have the greatest incidence of sport related concussions and it reports on and critiques those strategies that are currently in place to combat sport concussion across different sport groups In The Heads Up on Sport Concussion professionals in sports medicine neurology neurosurgery and neuropsychology offer strategies for recognizing and treating sport concussion The text provides appropriate research resources without getting bogged down by lengthy research critiques Many chapters include a Research Digest section that

identifies critical research data used in developing recommendations and conclusions Additionally an educational poster is available for download via the Internet for trainers physicians coaches and sports medicine professionals to use to educate athletes and their families about the signs symptoms and treatment of concussion The poster is available at HumanKinetics.com The Heads Up on Sport Concussion provides a current understanding of terminology assessment treatment and criteria for return to play for a range of readers Researchers medical professionals and health care specialists will have a more thorough grasp of the various aspects of sport concussion and thus be able to provide better care and education to athletes who sustain concussions Its complete treatment of a critical topic makes this a must read for anyone involved in the care and training of athletes

*Biosensor Based Advanced Cancer Diagnostics* Raju Khan, Arpana Parihar, S.K. Sanghi, 2021-08-25 Early diagnosis of cancer and other non oncological disorders gives a significant advantage for curing the disease and improving patient's life expectancy Recent advances in biosensor based techniques which are designed for specific biomarkers can be exploited for early diagnosis of diseases Biosensor Based Advanced Cancer Diagnostics covers all available biosensor based approaches and comprehensive technologies along with their application in diagnosis prognosis and therapeutic management of various oncological disorders Besides this current challenges and future aspects of these diagnostic approaches have also been discussed This book offers a view of recent advances and is also helpful for designing new biosensor based technologies in the field of medical science engineering and biomedical technology Biosensor Based Advanced Cancer Diagnostics helps biomedical engineers researchers molecular biologists oncologists and clinicians with the development of point of care devices for disease diagnostics and prognostics It also provides information on developing user friendly sensitive stable accurate low cost and minimally invasive modalities which can be adopted from lab to clinics This book covers in depth knowledge of disease biomarkers that can be exploited for designing and development of a range of biosensors The editors have summarized the potential cancer biomarkers and methodology for their detection plus transferring the developed system to clinical application by miniaturization and required integration with microfluidic systems Covers design and development of advanced platforms for rapid diagnosis of cancerous biomarkers Takes a multidisciplinary approach to sensitive transducers development nano enabled advanced imaging miniaturized analytical systems and device packaging for point of care applications Offers an insight into how to develop cost effective diagnostics for early detection of cancer
