The many topics addressed include interviewing parents and children testifying in court, writing custody evaluations, assessing the capacity to parent, assessing the attachment of children to their parents, planning custody and parental access, children's adjustment to divorce, domestic violence, drug and alcohol abuse, mental illness, parental alienation, and on-going evaluation.

**Conducting Child Custody Evaluations** Philip M. Stahl, 2011  
Addresses key topics such as the best interests of the child, custody and time share, divorce and its impact on children and children's developmental needs.

This book covers these three essential areas to walk readers through the evaluation process clearly and concisely. **Clinician's Guide to Child Custody Evaluations** Marc J. Guide to Child Custody Evaluations is the definitive guide to this field for students and practitioners      **Conducting Child Custody Evaluations** Philip Michael Stahl, 2011 This work is a combination of two previously published books Conducting Child Custody Evaluations and Complex Issues in Child Custody Evaluations The book was written as a guide to help students and practitioners walk through the process of conducting a child custody evaluation a critical skill for mental health practitioners      **Complex Issues in Child Custody Evaluations** Philip M. Stahl, 1999-05-21 This text is excellent and very timely Philip Michael Stahl's second volume is the perfect supplement to his Conducting Child Custody Evaluations because it deals with specific issues of great concern to evaluators parental alienation allegations of sexual abuse domestic violence move away situations and high conflict families The chapter dealing with child considerations is also very well done His discussion of developmental considerations is clear and supported by the latest research in the field I also liked his treatment of children's reaction to parental conflict weighing the needs of the individual child with the needs of the sibling group and giving the child a voice while protecting their privacy I also appreciated his discussion of components of the evaluator's recommendation use of psychological testing Rosemary Vasquez's discussion of cultural issues tackling the terror of testifying and ethical issues Phil Stahl has written a very important text It is timely well written and comprehensive Nice work Hugh McIsaac Oregon Family Institute When performing a custody evaluation how do professionals deal with the issue of domestic violence What impact does one parent's moving away have on the evaluation How should an evaluator handle high conflict divorces Over the past five to ten years there has been a significant increase in the use of child custody evaluations by the courts At the same time the issues have become more complex and difficult In this book the author provides a theoretical and practical understanding of many of the factors that make custody evaluations complex A key component is the integration of disparate research findings into a comprehensive resource that will enable the evaluator and the court to understand these complex issues A second component is to provide a thorough understanding of the fact that divorce brings with it a set of complex needs and evaluators and the courts must develop a paradigm for weighing these needs in a comprehensive manner This book provides that paradigm      *A Comprehensive Guide to Child Custody Evaluations: Mental Health and Legal Perspectives* Joanna Bunker Rohrbach, 2007-11-26 Whether assessing general family functioning or specific areas of conflict professionals preparing child custody evaluations require sound knowledge of three interrelated fields up to date legal issues psychological findings and forensic procedures This book covers these three essential areas to walk readers through the evaluation process clearly and concisely It further provides a unique combination of legal guidelines with social science research      *The Custody Evaluation Handbook* Barry Bricklin, 2013-06-20 Joint custody Same sex custody Young children with the mother Which is the best arrangement Unfortunately for those who seek a trustworthy solution research has proven that there is no single best arrangement for all children This timely volume however does offer a practical and realistic methodology with which to confront the challenging and often confusing issues

facing the custody evaluator THE only book of its kind The Custody Evaluation Handbook offers a strikingly helpful model for evaluating and assigning weight to the mountains of disparate information accumulated during a custody suit Written by an unparalleled expert in the field of custody evaluation the book eschews what the author calls the negative incident model in which each parent responds to the custody process by compiling a long list of grievances against the hated opponent It advocates instead a test based approach that measures how successful each parent actually is at the job of parenting The book describes numerous tests and tools for eliciting reliable information from both children and parents With an eye to learning the actual impact a parent has on a child rather than what a given parent may or may not be doing the book emphasizes obtaining measurements from the involved child Parent tests are designed to reflect the effectiveness with which a parent responds to typical childcare situations and the degree to which a parent truly knows and can satisfy the needs of a particular child The volume also sets forth concepts derived from extensive research that are particularly helpful in understanding parent child interactions and provides a specific system of nonadversary communication strategies that can be used and modeled in all interchanges with evaluation participants and in the wording of all written reports Readers will also welcome the numerous suggestions from evaluators all over the country on specific custody dilemmas they have faced The book is based on many years meticulous research and is informed by a number of conceptual approaches that include The proven premise that whatever certain parents intend to communicate is often not what their children are in fact perceiving and reacting to The Utilization Model of Milton E Erikson The Thomas Chess and Birch goodness of fit model of parent child interaction Bandler and Grinders assertion that the meaning of a communication is the response it elicits regardless of the intentions of the sender Clearly spelling out the targets of a truly comprehensive and reliable evaluation The Custody Evaluation Handbook will be an invaluable handbook for custody evaluators and marriage and family therapists as well as other involved mental health professionals *The Handbook of Forensic Psychology* Irving B. Weiner, Randy K.
