Research Methods Jason Hughes, 2012-06-25 Historically social researchers have shown a willingness to exploit new technologies to enhance facilitate and support their various activities However arguably no other technological development has influenced the landscape of social research as rapidly and fundamentally as the Internet This collection avoids both uncritical embrace and wholesale dismissal by considering some of the key literature in the field of Internet research methods Volume One Core Issues Debates and Controversies in Internet Research introduces themes and issues that run across all four volumes such as epistemology ontology and methodology in the online world access social divisions and the digital divide and the ethics of online research Volume Two Taking Research Online Internet Survey and Sampling addresses the range of resources digital archives and Internet based data sources that exist online from relatively straightforward and practical guides to such material through to more polemical pieces which consider problems relating to the use access and analysis of online data and resources Volume Three Taking Research Online Qualitative Approaches considers the broad range of approaches to conducting researching via or in the Internet The focus is on conventional methods that have been taken online and which in doing so have become transformed in scope and character Volume Four Research On and In the Internet Investigating the Online World follows logically from that which precedes it in exploring how social research has been taken online not simply through the deployment of existing methods and techniques via the Internet but in researchers increasing recognition and investigation of the online world as a sphere of human interaction a socio cultural arena to be explored from the desktop as it were

Research Methods in Applied Settings Jeffrey A. Gliner, George A.

Morgan, Nancy L. Leech, 2000-02-01 The authors of this unique text found that while most students can crunch the numbers quite easily and accurately with a calculator or computer many have trouble seeing the big picture or seeing how research questions and design influence data analysis As a result the authors developed a semantically consistent framework that integrates traditional research approaches experimental quasi experimental comparative into three basic kinds of research questions difference associational and descriptive which in turn lead to three kinds or groups of statistics with the same names This text helps students become good consumers of research by demonstrating how to analyze and evaluate research articles offers a number of summarizing diagrams and tables that clarify confusing or difficult to learn topics points out the value of qualitative research and how it should lead quantitative researchers to be more flexible divides all quantitative research questions into five logically consistent categories that help students select appropriate statistics and understand their cause and effect and classifies design into three major types between groups within subjects and mixed groups and shows that although these three types use the same general type of statistics e g ANOVA the specific statistics in between groups design are different from those in within subjects and mixed groups
