Filling The Ark Animal Welfare In Disasters Animals And Ethics:

Filling the Ark Leslie Irvine, 2021-06-30 When disasters strike people are not the only victims Hurricane Katrina raised public attention about how disasters affect dogs cats and other animals considered members of the human family In this short but powerful book noted sociologist Leslie Irvine goes beyond Katrina to examine how disasters like oil spills fires and other calamities affect various animal populations on factory farms in research facilities and in the wild Filling the Ark argues that humans cause most of the risks faced by animals and urges for better decisions about the treatment of animals in disasters Furthermore it makes a broad appeal for the ethical necessity of better planning to keep animals out of jeopardy Irvine not only offers policy recommendations and practical advice for evacuating animals she also makes a strong case for rethinking our use of animals suggesting ways to create more secure conditions **Animal Ethics and Philosophy** Elisa

Aaltola, John Hadley, 2014-11-24 Debate in animal ethics needs reenergizing To date philosophers have focused on a relatively limited number of specific themes whilst leaving metaphilosophical issues that require urgent attention largely unexamined This timely collection of essays brings together new theory and critical perspectives on key topics in animal ethics foregrounding questions relating to moral status moral epistemology and moral psychology Is an individualistic approach based upon capacities the best way to ground the moral status of non human animals or should philosophers pursue relational perspectives What does it mean to know animals and speak for them What is the role of emotions such as disgust empathy and love in animal ethics and how does emotion inform the rationalism inherent in analytic animal ethics theory The collection aims to broaden the scope of animal ethics rendering it more inclusive of important contemporary philosophical themes and pushing the discipline in new directions **The Routledge International Handbook of Human-Animal**

Interactions and Anthrozoology Aubrey H. Fine, Megan K. Mueller, Zenithson Y. Ng, Alan M. Beck, Jose M.

Peralta, 2023-09-26 This diverse global and interdisciplinary volume explores the existing research practice and ethical issues pertinent to the field of human animal interactions HAIs interventions and anthrozoology focusing on the perceived physical and mental health benefits to humans and the challenges derived from these relationships The book begins by exploring the basic theoretical principles of anthrozoology and HAI such as the evolution and history of the field the importance of language the economic costs and current perspectives to physical and mental wellbeing the origins of domestication of animals anthropomorphism and how animals fit into human societies Chapters then move onto practice covering topics such as how animals help childhood and adulthood development pet ownership disability the roles of pets for people with psychiatric disorders the links between animal and domestic abuse and then more widely into the therapeutic roles of animals animal assisted therapies interactions outside the home working animals animals in popular culture and animals in research for leisure and food Including chapters on a wide range of animals from domesticated pets to wildlife this collection examines the benefits yet also reveals the complexity and often dark side of human animal relations Interweaving accessible

commentaries with revealing chapters throughout the text this collection would be of great interest to students and practitioners in the fields of mental health psychology veterinary medicine zoology biology social work history and sociology

Epidemiology and Environmental Hygiene in Veterinary Public Health Tanmoy Rana, 2025-03-18 Understanding the emergence and progress of zoonotic diseases Veterinary epidemiology is the study of the connection between animal exposure to chemical or disease agents and the observation of adverse effects Veterinary epidemiologists observe the patterns by which diseases emerge in a population and play a crucial role in controlling emerging disease outbreaks and preventing infections The major factors in environmental hygiene which have a tendency to produce disease and adverse health effects in animals require extensive study and play a potentially massive role in public health Epidemiology and Environmental Hygiene in Veterinary Public Health provides a one stop reference for professionals in this vital field Its exploration of environmental illnesses and pollutants in combination with biological disease vectors has no current rivals in the marketplace With readable design and coverage of all major factors of epidemiological significance the volume offers a unique contribution to the control of animal disease Epidemiology and Environmental Hygiene in Veterinary Public Health readers will also find Schematic overview of the fundamentals of environmental hygiene and epidemiology Detailed discussion of topics including etiological factors preventative and control strategies major disease agents and many more Color figures line figures and tables to illustrate key concepts Epidemiology and Environmental Hygiene in Veterinary Public Health is ideal for all professionals and researchers in animal epidemiology and environmental hygiene as well as for farm managers agricultural veterinarians and other professionals involved in large scale animal care **Ethical and Political Approaches to Nonhuman Animal Issues** Andrew Woodhall, Gabriel Garmendia da Trindade, 2017-08-28 This book offers ethical and political approaches to issues that nonhuman animals face The recent political turn in interspecies ethics from ethical to political approaches has arisen due to the apparent lack of success of the nonhuman animal movement and dissatisfaction with traditional approaches Current works largely present general positions rather than address specific issues and principally rely on mainstream approaches This book offers alternative positions such as cosmopolitan libertarian and left humanist thought as well as applying ethical and political thought to specific issues such as experimentation factory farming nonhuman political agency and intervention Presenting work by theorists and activists insights are offered from both ethics and politics that impact theory and practice and offer essential considerations for those engaging in interspecies ethics within the political turn era Animals in Our Midst: The Challenges of Co-existing with Animals in the Anthropocene Bernice Bovenkerk, Jozef Keulartz, 2021-04-29 This Open Access book brings together authoritative voices in animal and environmental ethics who address the many different facets of changing human animal relationships in the Anthropocene As we are living in complex times the issue of how to establish meaningful relationships with other animals under Anthropocene conditions needs to be approached from a multitude of angles This book offers the reader insight into the different

discussions that exist around the topics of how we should understand animal agency how we could take animal agency seriously in farms urban areas and the wild and what technologies are appropriate and morally desirable to use regarding animals This book is of interest to both animal studies scholars and environmental ethics scholars as well as to practitioners working with animals such as wildlife managers zookeepers and conservation biologists *Tourism and Animal Ethics* David A. Fennell,2024-02-26 This timely book provides a critical account of the role that animals play in the tourism industry representing an extension of the sustainability imperative and environmental theory Written by a leading academic and author this volume explores the rich history of animal ethics research both inside and outside of tourism studies for the purpose of providing greater theoretical empirical conceptual and practical guidance It examines historical and current practices of the use of animals in the tourism industry from both in situ to ex situ consumption and production perspectives identifying a range of ethical issues associated with such use This second edition has been updated to reflect contemporary research and thinking around animal welfare hunting and consumption with new chapters on animals as food and policy at the national and international levels New case studies have been integrated throughout Offering an interdisciplinary overview of the moral issues related to the use of animals in tourism through cutting edge research this book is essential reading for students academics and researchers interested in tourism ethics sustainable tourism and wildlife tourism

Heritage - Between and Beyond Nature, Culture and Agency Joanna Godlewicz-Adamiec,Monika Stobiecka,2025-08-11 In an era of climate emergency and political upheaval heritage demands radical rethinking This volume confronts the Enlightenment rooted dualisms that fragment heritage into opposing categories By embracing posthumanist concepts like naturecultures and agency this volume explores entangled human and nonhuman pasts from the contested Biaowie a Forest to ancient sensory environments Through case studies spanning archaeology museum studies and literary analysis contributors unravel heritage as a dynamic more than human meshwork This collection is an urgent call to transcend reductive binaries fostering an ethical responsive and sustainable heritage practice attuned to our shared precarious futures *Animal Welfare* Christina Fisanick,2011-03-25 In Hinduism cows are sacred respected and treated as a motherly giving animal The thought of eating them or using their skin for accessories is sickening So many cultures across the globe have their own understandings of animal welfare This fantastic collection of essays shares international beliefs about animals and animal welfare Essays includes speeches government documents and articles from international magazines and news sources Readers will explore global perspectives about cultural and religious views on animal rights They will evaluate animal welfare in relation to biomedical research Essays examine the world food industry The last chapter covers animal ownership and welfare in various cultures Zoopolis Sue Donaldson,Will Kymlicka,2011-11-25 Zoopolis offers a new agenda for the theory and practice of animal rights Most animal rights theory focuses on the intrinsic capacities or interests of animals and the moral status and moral rights that these intrinsic characteristics give rise to Zoopolis shifts

the debate from the realm of moral theory and applied ethics to the realm of political theory focusing on the relational obligations that arise from the varied ways that animals relate to human societies and institutions Building on recent developments in the political theory of group differentiated citizenship Zoopolis introduces us to the genuine political animal It argues that different types of animals stand in different relationships to human political communities Domesticated animals should be seen as full members of human animal mixed communities participating in the cooperative project of shared citizenship Wilderness animals by contrast form their own sovereign communities entitled to protection against colonization invasion domination and other threats to self determination Liminal animals who are wild but live in the midst of human settlement such as crows or raccoons should be seen as denizens resident of our societies but not fully included in rights and responsibilities of citizenship To all of these animals we owe respect for their basic inviolable rights But we inevitably and appropriately have very different relations with them with different types of obligations Humans and animals are inextricably bound in a complex web of relationships and Zoopolis offers an original and profoundly affirmative vision of how to ground this complex web of relations on principles of justice and compassion

Surviving with Companion Animals in Japan

Hazuki Kajiwar, 2020-07-14 This book examines how relationships between guardians and companion animals were challenged during a large scale disaster the tsunami of March 2011 and the following nuclear disaster in Fukushima The author interrogates 1 How did guardians and their companion animals survive the large disaster 2 Why was the relationship between guardians and their companion animals ignored during and after a disaster and 3 What structures and or mechanisms shaped the outcomes for animals and their guardians Through a critical realist framework combined with a theoretical perspective developed by Roy Bhaskar and his colleagues the author argues that despite the trivialization of companion animals by government officials relationships between animals and guardians were often able to be maintained in some cases through great pains by the guardians While the notion of human animal relationships in Japan has thus far been dominated by economic logic the author reveals dynamics between guardians and companion animal transcend such structures forging the concept of bonding rights

Mourning Animals Margo DeMello, 2016-08-01 We live more intimately with nonhuman animals than ever before in history The change in the way we cohabitate with animals can be seen in the way we treat them when they die There is an almost infinite variety of ways to help us cope with the loss of our nonhuman friends from burial cremation and taxidermy to wearing or displaying the remains ashes fur or other parts of our deceased animals in jewelry tattoos or other artwork to counselors who specialize in helping people mourn pets to classes for veterinarians to tips to help the surviving animals who are grieving their animal friends to pet psychics and memorial websites But the reality is that these practices and related beliefs about animal souls or animal afterlife generally only extend with very few exceptions to certain kinds of animals pets Most animals in most cultures are not mourned and the question of an animal afterlife is not contemplated at all *Mourning Animals* investigates how we mourn animal deaths which animals are grievable and what the

implications are for all animals *Handbook of Environmental Sociology* Beth Schaefer Caniglia, Andrew Jorgenson, Stephanie A. Malin, Lori Peek, David N. Pellow, Xiaorui Huang, 2021-11-01 This handbook defines the contours of environmental sociology and invites readers to push boundaries in their exploration of this important subdiscipline It offers a comprehensive overview of the evolution of environmental sociology and its role in this era of intensified national and global environmental crises Its timely frameworks and high impact chapters will assist in navigating this moment of great environmental inequality and uncertainty The handbook brings together an outstanding group of scholars who have helped redefine the scope of environmental sociology and expand its reach and impact Their contributions speak to key themes of the subdiscipline inequality justice population social movements and health Chapter topics include environmental demography food systems animals and the environment climate change disasters and much more The emphasis on public environmental sociology and the forward thinking approach of this collection is what sets this volume apart This handbook can serve as an introduction for students new to environmental sociology or as an insightful treatment that current experts can use to further their own research and publication It will leave readers with a strong understanding of environmental sociology and the motivation to apply it to their work **Putting the Horse Before Descartes** Bernard Rollin, 2011-01-14 Putting the Horse before Descartes showcases this passionate animal advocate at his best In witty often disarming detail Rollin describes how he became an outspoken critic of how animals were treated in veterinary and medical schools and research laboratories He recalls teaching veterinary students about ethical issues and engaging in face offs with ranchers and cowboys about branding methods and rodeo roping competitions Rollin also describes his efforts to legally mandate more humane conditions for agricultural and laboratory animals As public concern about animal welfare and the safety of the food supply heighten Rollin carries on his work on a global scale in classrooms in lecture halls in legislatures in meetings of agricultural associations in industrial settings and in print Book Jacket *Animals and Ourselves* Kathy Merlock Jackson, Kathy Shepherd Stolley, Lisa Lyon Payne, 2020-10-13 The relationship between humans and animals has always been strong symbiotic and complicated Animals real and fictional have been a mainstay in the arts and entertainment figuring prominently in literature film television social media and live performances Increasingly though people are anthropomorphizing animals assigning them humanoid roles tasks and identities At the same time humans such as members of the furry culture or college mascots find pleasure in adopting animal identities and characteristics This book is the first of its kind to explore these growing phenomena across media The contributors to this collection represent various disciplines to include the arts humanities social sciences and healthcare Their essays demonstrate the various ways that human and animal lives are intertwined and constantly evolving **Pet Politics** Susan Hunter, Richard A. Brisbin, 2016-02-15 Although scholars in the disciplines of law psychology philosophy and sociology have published a considerable number of prescriptive normative and theoretical studies of animals in society Pet Politics presents the first study of the development of companion

animal or pet law and policy in Canada and the United States by political scientists The authors examine how people and governments classify three species of pets or companion animals cats dogs and horses for various degrees of legal protection They then detail how interest groups shape the agenda for companion animal legislation and regulation and the legislative and administrative formulation of anticruelty kennel licensing horse slaughter feral and roaming cat and breed ban policies Finally they examine the enforcement of these laws and policies by agencies and the courts Using an eclectic mix of original empirical data original case studies and interviews and relying on general theories and research about the policy process and the sociopolitical function of legality the authors illustrate that pet policy is a unique field of political struggle a conflict that originates from differing perspectives about whether pets are property or autonomous beings and clashing norms about the care of animals The result of the political struggle the authors argue is difficulty in the enactment of policies and especially in the implementation and enforcement of laws that might improve the welfare of companion animals

Human-Animal Interactions in Anthropocene Asia Victor Teo, 2023-03-03 This book examines the theme of human animal interactions contextualized against the idea of the Anthropocene Focused on China and its immediate Asian borderlands this interdisciplinary collection provides a powerful and insightful analysis of the ecological challenges that mankind's traditional activities have created Through in depth case studies each focusing on a particular human animal dynamic the book contextualizes and advances the understanding of existing environmental and ecological problems faced by local communities in Asia In particular the book hopes to transcend the duality of the nature versus culture debate by locating animal ecological problems in the behavior of human institutions beliefs and practices which are often affected by prevailing cultural proclivities political ideologies economic interests and scientific agendas Through interrogation of theoretical concepts of Anthropocene and human animal binary the volume highlights the controversial debates that follow their usage as well as their empirical utility understanding human animal interactions historically thereby engaging a broader interdisciplinary conversation increasingly links these two fields together Providing a platform for discussion and dialogue for a wide audience this book will appeal to students and scholars of environmental history and politics anthropology political science and policy studies China studies and Asian studies more generally

The Ethics of Canine Care Craig Banks Merow, 2023-06-14 The social status of dogs has changed dramatically in the past 75 years Today most dog owners and small animal veterinarians consider companion canines to be members of their families and communities However the attitudes of some dog owners concerning their responsibilities to their dogs and many of the laws that regulate dog ownership and veterinary medical practice largely reflect the human canine relationship and ethical norms of an earlier era This incongruity leads to unmet needs for companion canines and high levels of stress for many veterinary clinicians This book presents arguments for human responsibilities to companion canines a detailed analysis of what those responsibilities entail and the professional ethical standards and laws needed to ensure that responsibilities are met A new moral framework the Custodial

Property Framework is created for the care and medical treatment of companion canines and is grounded in a detailed analysis of the responsibilities of care generated by the relationship we have with our best friends Dancing with Disaster
Kate Rigby, 2015-03-06 The calamitous impacts of climate change that are beginning to be felt around the world today expose the inextricability of human and natural histories Arguing for a more complex account of such calamities Kate Rigby examines a variety of past disasters from the Black Death of the Middle Ages to the mega hurricanes of the twenty first century revealing the dynamic interaction of diverse human and nonhuman factors in their causation unfolding and aftermath Focusing on the link between the ways disasters are framed by the stories told about them and how people tend to respond to them in practice Rigby also shows how works of narrative fiction invite ethical reflection on human relations with one another with our often unruly earthly environs and with other species in the face of eco catastrophe In its investigation of an array of authors from the Romantic period to the present including Heinrich von Kleist Mary Shelley Theodor Storm Colin Thiele and Alexis Wright Dancing with Disaster demonstrates the importance of the environmental humanities in the development of more creative compassionate ecologically oriented and socially just responses to the perils and possibilities of the Anthropocene Under the Sign of Nature Explorations in Ecocriticism Library Journal , 2009
