**Financial Crises and Earnings Management Behavior** Bruno Maria Franceschetti, 2017-08-03 This book approaches the question of the relation between financial crises and earnings management from two philosophical perspectives positivism and critical realism The results obtained using the positivist approach indicate that financial crises tend to have no consistent effect on earnings quality since managers earnings behavior does not differ from the pre crisis to the crisis period The author accordingly argues against the existence of a causal law based on a constant conjunction model i e whenever a financial crisis happens earnings management occurs and concludes that financial crises cannot be seen as the cause of earnings management The critical realism perspective on the other hand casts light on managers reasons for acting like an earnings manager in conjunction with the more traditional positivist approach it assists in refuting the idea of financial crises as a generative mechanism for earnings management The

author concludes by exploring other structures at work that might be responsible for earnings management This book will be of interest to both academics and a wide range of professionals

**Innovation and Market Value. The Case of Tourism Enterprises** Dawid Szutowski, 2017-03-18 In contemporary economics only one thing is constant constant change Gunday et al 2011 The notion of change relates directly to innovation The very nature of innovation constitutes combining existing factors in a new changed way Since the early stage of the scientific investigation of innovation research has focused mainly on the solutions actually implemented Schumpeter 1939 Yet it is only through implementation that the benefits of innovation may materialise The task is not simple The process of obtaining the gains is complex as innovation may pass through different stages Thus for almost half century the scientific community has considered innovation to be a complex process and not just a simple occurrence Myers and Marquis 1969 Innovation pushes

progress forward Thus previous scientific investigation limited the concept of innovation to implementations which generate positive effects Nelson and Winter 1982 The above scientific considerations still hold today Moss Kanter 2006 Innovation is of crucial importance for tourism companies which cover accommodation for visitors food and beverage serving activities passenger transportation travel agencies and other reservation activities cultural activities sports and recreational activities and retail trade of country specific tourism characteristic goods UNWTO 2010 It provides them with competitive advantage and hence the firms with market power gain more from innovation Tirole 1995 A firm s innovation interacts with the environment It delivers diverse benefits to the consumers in the form of new products and lower prices which in turn impact positively on the company Shiller 2006 In the context of tourism the ongoing scientific discussion on innovation seems not to have achieved any definite conclusions yet The implementation of innovation in tourism enterprises leads to the achievement of diverse ends From this point of view the measurement of the effects of innovation is of vital importance There are a number of financial measures covering substantially different fields The most comprehensive amongst them is a company s value It covers all the aspects of a company s activity Bodie and Merton 2000 However due to its importance and complexity numerous approaches to company value were created The basic distinction covers book and market value based approaches The proponents of book value assume that the balance sheet yields a reliable estimate of the value of assets and equities However numerous shortcomings emerge the static character dealing with historical figures failing to include intangibles and treating all classes of accounts as having equal importance Nunes 2003 The market value based approach stands for the price that assets would fetch in the marketplace Fabrozi and Drake 2009 The main objective of the research is to measure the short and long term impact of innovation announcements on the market value of equity of tourism enterprises
