listed on the major exchanges and ECN s like MarketAxess and Bonds.com Even though these bonds are carried on the major exchanges their trading does not mostly take place on them Note This example description is shorted due to publishing restrictions Each term is explained with 600 words and more **Journal of the American Society of CLU & ChFC.**, 1980

complex There is an important caveat for individuals filing taxes They can not claim their own personal exemption when someone else claims them as a dependent on their tax return This is one of the elements that separate exemptions from deductions in the world of tax terminology Each individual filing is permitted to claim his or her personal deduction Looking at a real world example helps to clarify the complicated rules Young college students who have a job while they go to school will typically be claimed by their parents like a dependent on the parents income tax return Note This example description is shorted due to publish restrictions Each term is explained with 600 words and more [Harriman's Financial Dictionary](#) Simon Briscoe,Jane Fuller,2007 A comprehensive dictionary focusing on financial and investment terminology An essential reference work for anyone working in the City or related industries More than 2 600 essential financial terms and acronyms covering the stock options futures and capital markets as well as personal finance Based on the popular website [www Finance Glossary com](#) The majority of terms are cross referenced and any relevant URLs are also provided Edited by two highly experienced financial writers

Example What is a Custodian Bank A custodian bank is a special financial institution that carries the responsibility for protecting the financial assets of individuals or companies These institutions can also be called simply custodians Such outfits serve as a third party check that protects the assets they are guarding against the fund managers and any illegal activities they may pursue Congress established these custodian banks with the Investment Company Act of 1940 in order to protect investors Thanks to this particular legislation investment companies must adhere to specific stringent listing requirements and must be registered with the Securities and Exchange Commission The custodian bank performs a number of activities in their primary function of watching over the financial assets of businesses and individuals They settle sales and purchases of bonds and equities and physically protect the certificates of these assets These institutions also gather information about and income from such assets When the assets are stocks this means dividends When the instruments are bonds they collect the interest from the coupons The custodians also disperse information they gather pertaining to yearly general meetings and

shareholder voting They handle any foreign exchange transfers as necessary and manage all cash transactions Finally custodians deliver routine reports on their various activities to the customers Custodians banks provide reports on every trade or deal which they transact on behalf of the clients They must be consistently delivered Along with these reports they furnish information on the companies whose assets they hold besides information on general meetings When a custodian is holding foreign shares or bonds they will also have to change currencies as necessary This is the case when the fund manager buys or sells foreign currency assets It is also necessary when companies pay out dividends or bonds receive interest with these overseas financial instruments Custodian banks are a critical component of the modern investment environment Without them to carry out these functions all of the important financial record keeping and housekeeping items would be neglected Not all custodian banks are national operations in the United States A number of the major international financial institutions offer these services around the globe Note This example description is shorted due to publish restrictions Each term is explained with 600 words and more *Futures*, 2004 The Compact Edition of the Oxford English Dictionary Sir James Augustus Henry Murray, 1971 Micrographic reproduction of the 13 volume Oxford English dictionary published in 1933 **Financial Terms Dictionary - Trading Terminology Explained** Wesley Crowder, Thomas Herold, 2017-06-30 Make Better Financial Decisions Understand Trading Terms This practical financial dictionary for trading terms helps you understand and comprehend most common trading lingo It was written with an emphasis to quickly grasp the context without using jargon Each of the 226 Trading terms is explained in detail and also gives practical examples It is based on common usage as practiced by financial professionals Compiled over the last 3 years from questions and feedback to financial articles published by the Wealth Building Course education program Mastering the Trade This book is useful if you are new to business and finance It includes most trading terms for businesses investors and entrepreneurs It also covers the lingo that was introduced in the financial crisis of 2008 until 2017 With the alphabetical order it makes it quick and easy to find what you are looking for Financial Dictionary Series Additional financial dictionaries are available in this series Please also check out Accounting Banking Retirement Corporate Finance Economics Investments Laws Regulations Acronyms Real Estate Click on the author name to see them Example What is Currency Trading Currency trading is speculating on the largest financial market on earth Despite the fact that this is the world's largest most liquid and most impressive market many individual traders do not know much about it This is mostly because until Internet trading became popular access to these markets was limited Only the large banks multinational businesses and shadowy hedge funds were able to trade them Today the currency markets trade 24 hours per day 6 days per week This several trillion dollar market trades on every continent Trillions of dollars per day change hands in the foreign exchange marketplace All of this combines to make currency trading markets the most easily accessed on earth This speculative currency trading is not the main reason that the Forex or Foreign Exchange markets exist They were set up to help big international companies change currencies from one

kind to another Many of these corporations need to trade currency constantly to pay for such costs as international goods and services payments payroll and acquisitions overseas Despite the origins of these currency markets only around 20% of the total market volume comes from these company trades An incredible 80% of the daily trades in the currency markets are from speculative currency trading hedge funds large banks and individual investors who want to take a position on one of the major currency pairs Currency traders are able to engage in these markets without many of the constraints that plague the stock markets If individuals believe that the GBP USD pair will drop dramatically they are able to short sell as much of the currency pair as they desire There are no uptick rules with currency trading There are similarly no position size limits in currency trading Traders could buy tens of billions of any currency pair if they had the money to cover the trade There are also no rules on insider trading with this type of currency trading It does not exist Economic data in Europe is routinely leaked several days ahead of the official release date Another way that currency markets are different from stock markets is that there are no commissions in foreign exchange markets All currency companies are dealers These dealers take on the counterparty currency in any trade They earn their money with the spreads between the bid the cost to buy the currency pair and the ask the cost to sell it Note This example description is shorted due to publish restrictions Each term is explained with 600 words and more
