Computer Science Ks2 Scheme Of Work:

Teaching Computational Thinking and Coding in Primary Schools David Morris, Gurmit Uppal, David Wells, 2017-05-22

This is a guide to the teaching of computing and coding in primary schools and an exploration of how children develop their computational thinking. It covers all areas of the National Curriculum for primary computing and offers insight into effective teaching. The text considers three strands of computer science: digital literacy and information technology. The teaching of coding is especially challenging for primary teachers, so it highlights learning on this, giving practical examples of how this can be taught. For all areas of the computing curriculum, the text also provides guidance on planning age appropriate activities with step by step guides and details of educationally appropriate software and hardware. This book helps you to connect what you need to teach with how it can be taught and opens up opportunities in the new curriculum for creative and imaginative teaching. It also includes the full National Curriculum Programme of Study for Computing key stages 1 and 2 as a useful reference for trainee teachers.
