Video Game Addiction Austin Mardon, Catherine Mardon, Monica Thakadu, 2021-10. An in-depth look at video games: Their creation, their impact, how they can be addictive, and the controversies surrounding them.

Video Game Addiction Worldwide James W. Miller, 2010. Computer and video game addiction is an issue growing rapidly around the world. From children playing games instead of completing school work to adults playing at work or not going to work in order to fill the addiction, through to spouses cheating with others they meet through online gaming and web use, it is a real problem and has real consequences. Health, financial, and many other major problems are being caused by video game and internet addiction.

Hooked on Games Andrew P. Doan, Brooke Strickland, 2012. About the Book: The multi-billion dollar video game industry is in the business of creating fun and enticing games that can be addictive. As addicted gamers feast on digital indulgences, real life is neglected and their reality crumbles around them. Headlines related to video games: New Mexico mom gets 25 years for starving daughter; Fox News: China used prisoners in lucrative Internet gaming work; Guardian News Online: gamer killed for selling virtual weapon; Sydney Morning Herald: South Korean dies after games sessions; BBC News: Hooked on Games is written by Brooke Strickland and Andrew Doan, MD PhD, a physician with a research background in neuroscience who battled his own addictions with video games. Dr. Doan was an addicted gamer who at his peak invested over 20,000 hours of playing games over a period of nine years. Dr. Doan's reckless compulsion to play games transformed him into a monster that almost destroyed his family, marriage, and career. He shares his expertise to educate others on the dangers of video game addiction and to provide hope for video game addicts and their families. Dr. Doan shares steps for gaming addicts to achieve recovery and steps for families and loved ones to intervene. Without attention to this quickest growing addiction, our society will suffer from the creation of Generation Vidiot: millions of people devoid of innovation and skills to live in the physical world. As is true with many addictions, overuse of video games steals our valuable and limited time and minds.
