Concept Development Practice Page 20 2:

Writing on the Wall Philip Van Notten, 2005 Although the significance of 9 11 is subject to debate it is symbolic of a general sentiment of discontinuity whereby society is vulnerable to undefined and highly disruptive events Recent catalysts of this sentiment are eye catching developments such as the SARS Severe Acute Respiratory Syndrome and bird flu outbreaks the Enron and Parmalat scandals political assassinations in Sweden and the Netherlands regime changes in Iraq and Afghanistan and terrorist attacks in Bali Istanbul Madrid and various parts of the Middle East However recent discontinuities should not be seen as evidence that discontinuities occur more frequently now than they did before Looking back in history we see that disruptive processes are common For example 25 years ago few Europeans would have predicted the upcoming upheavals on their own continent the collapse of communism Berlin as the capital of a reunited Germany the wars in the former Yugoslavia the single European currency and the near doubling of the number of European Union member states Changes elsewhere have been no less discontinuous and unforeseen the fall of the Asian tigers the emergence of the Internet and mobile telecommunication and the presidency of Nelson Mandela Societal discontinuity is a relatively new area of concern in policy development Since the 1970s the consideration of change and discontinuity has gained some ground over predictive forecasting which tended to reason from continuous developments and linear processes Rather than making forecasting the future it has become popular to use scenarios as a manner to consider several possible futures Scenarios are coherent descriptions of alternative hypothetical futures that reflect different perspectives on past present and future developments which can serve as a basis for action Scenario development aims to combine analytical knowledge with creative thinking in an effort to capture a wide range of possible future developments in a limited number of outlooks Scenario development assumes that the future is uncertain and the directions in which current developments might range from the conventional to the revolutionary In theory scenario development is a way to consider future discontinuity However there are indications that the theoretical promise is not reflected in scenario practice Research has shown that scenarios do not consider the idea of discontinuity as a matter of course In our research we found that a scenario study would benefit from efforts to create and foster a culture of curiosity for exploring the future and the possible discontinuities rather than simply commissioning a scenario study to provide insights about the future Only then can one read the writing on the wall of future developments

Butts,Karen L. Rich,2021-08-16 Philosophies and Theories for Advanced Nursing Practice Fourth Edition provides a broad foundation in philosophy for nursing students with its focus on the structure function and evaluation of theory **Theoretical Nursing** Afaf Ibrahim Meleis,2011 An additional assumption was that the processes for theory development were new to nursing and hence nurses in graduate programs learned strategies for advancing knowledge from other disciplines This assumption was debunked with the knowledge that nurses were always engaged in knowledge development driven by their experiences in clinical practice Because of these assumptions most of the early writing about theory development was about outlining strategies that should be used rather than strategies that have already been used in the discipline to develop theories Theorists themselves did not uncover or adequately discuss ways by which they developed their theories therefore the tendency was to describe processes that were based on theories developed in other disciplines mainly the physical and social sciences And an implicit assumption was made that there should be a single strategy for theory development some claiming to begin the process from practice and others believing it should be driven by research Provided by publisher
