Barab, Kenneth E. Hay, Nancy Butler Songer, Daniel T. Hickey, 2017-09-05 William Wordsworth 1770 1850 needs little introduction as the central figure in Romantic poetry and a crucial influence in the development of poetry generally This broad ranging survey redefines the variety of his writing by showing how it incorporates contemporary concepts of language difference and the ways in which popular and serious literature were compared and distinguished during this period It discusses many of Wordsworth's later poems comparing his work with that of his regional contemporaries as well as major writers such as Scott The key theme of relationship both between characters within poems and between poet and reader is explored through Wordsworth's construction of community and his use of power relationships A serious discussion of the place of sexual feeling in his writing is also included      *News Literacy* Michelle Luhtala, Jacquelyn Whiting, 2018-05-09 At a time when misinformation in the media is abundant this book explains the difficulty in nurturing students to become critical researchers and offers practical lessons that empower students to excavate information that will help them learn This guide to teaching news literacy explores a wealth of resources and classroom tested lessons that educators in grades 7 12 can use in their own libraries and classrooms To introduce the concept of news literacy the authors explain the steps of the inquiry and research process in

detail and examine the Stanford History Education Group SHEG 2016 report Evaluating Information The Cornerstone of Civic Online Reasoning and related research studies Lesson plans corresponding to each stage of the process are coordinated to relevant standards from the CCSS and ISTE and are accompanied by rubrics for providing students feedback on their progress as well as samples of student work as it evolved through the stages Furthermore the authors anecdotal insights from their experiences in collaboratively implementing the lessons with colleagues are an invaluable addition for any librarian seeking to work with teachers to help students become critical researchers *Scientific Inquiry and Nature of Science* Lawrence Flick,N.G. successful in terms of faculty accomplishments students graduated and entering advanced study or professional workplace and showing evidence of high morale among both faculty and undergraduates Common elements in many of these programs are abandonment of an almost exclusive emphasis on problem solving and modification of the lecture format to permit teaching of underlying concepts Other variations in traditional introductory physics and chemistry courses are aimed at persuading those simply fulfilling graduation requirements to major in science at bringing minority students into the fold or at combining physics or various sub fields of chemistry in different ways to promote better understanding Harvard's chem phys is provided as an example of such a combination but also as a case study of how innovation can be stymied by a lack of university wide change The author uses methods of ethnography in reporting what makes individual programs interesting what their faculty are doing and what program participants are thinking PR
